PART I.

SUMMARY.

SUMMARY

OF

THE ADMINISTRATION REPORT OF BURMA FOR THE YEAR 1894-95.

MR. (now Sir) F. W. R. FRYER, C.S.I., officiated as Chief Commissioner from 1st April to 2nd May 1894. Sir A. Mackenzie, K.C.S.I., was in charge for the remainder of the year.

Administrative changes.

2. The number of Commissioners' divisions remained the same as in the previous year, and the number of districts was unaltered. Two new subdivisions were created in Lower Burma, and a reduction in the number of subdivisions in Upper Burma was under consideration.

The Shan States.

3. The Southern Shan States continued free from disturbance and from serious crime throughout the year and no alteration was made in the system of administration. Several of the Chiefs showed an enlightened interest in the improvement of communications in their States and in other measures for the amelioration of the condition of their people. Towards the close of the year* the Chief Commissioner held a durbar at Taunggyi, where, for the first time, Chiefs from all parts of the Southern Shan States were assembled together. The trade of the States increased to a remarkable extent. The assertion of more intimate control than heretofore in the trans-Salween States, the establishment of a military post at Kēngtūng, and the connection of Kēngtūng with Taunggyi by means of a road and telegraph line, were among the most important incidents of the year. In the Northern Shan States salutary reforms were carried out in Hsipaw and Tawngpeng and South Hsenwi was ably administered. The condition of North Hsenwi was less satisfactory and stringent measures had to be undertaken to induce the Sawbwa to bestir himself. The Kachins in the State, who in former years have given much trouble, were administered by an officer specially appointed for the purpose and remained at peace. Throughout the Shan States the tribute, which has been assessed at very moderate rates, was paid with commendable punctuality.

The Chin Hills.

4. In the Chin hills the most important events of the year were the substitution of a battalion of military police for the military garrison of the northern posts, the successful expedition against Thetta, and the withdrawal of a large number of guns from the southern tribes. The attitude of all the tribes was satisfactory and there was scarcely any serious crime. Friendly relations are being established between the Chins and their neighbours in the plains and traders now move freely about in the hill villages. The collection of a nominal tribute was effected without difficulty. The tours undertaken by the Assistant Political Officers were uneventful. No disturbances of any kind occurred in the Arakan Hill Tracts, and the frontier which is supervised by the Subdivisional Officer of Yawdwin was also at peace. Somewhat late in the season a short tour was undertaken among the tribes on this frontier.

* As regards the Shan States and other political charges, the year is reckoned from the 1st of June.

The Kachin Hills.

5. The Bhamo district, which formerly included all the Kachin tracts on the north-east frontier, was divided into the Bhamo and Myitkyina districts from the 1st April 1895. The usual tours were undertaken in the open season by Civil Officers with military police escorts. Except for the occurrence of a regretable incident at Khaittik village, the tours were perfectly peaceful. Among the most important events in these hills was the visit to Matin and the assumption of direct control over the Matin tract, which lies to the east of Bhamo and borders on one of the most important trade routes. The Jade Mines tract was also visited and a temporary post was established at Nanyaseik north of Mogaung, where rubies are said to be found. The Sana Kachins who burnt Myitkyina in 1892 continued to give trouble, and, though they are beyond the administrative border, will have to be visited and punished in the coming season. The Kachin Hill Tribes Regulation was enacted during the year, but did not come into effect till after its close.

Legislation.

6. Three Acts exclusively affecting Burma were passed during the year, namely, Act XI of 1894 (to amend the Lower Burma Village Act, 1889), Act XIV of 1894 (to amend the Burma Municipal Act, 1884), and Act XI of 1895 (to remove certain doubts as to the validity of certain proceedings and acts of certain officers of the Pegu and Tenasserim divisions in Lower Burma and to prevent their being raised in the future). Two Acts only, XII of 1850 (for avoiding loss by the default of Public Accountants) and XII of 1886 (the Petroleum Act) were extended to Upper Burma. A Bill to amend the Lower Burma Village Act and other enactments and a Regulation to amend the Upper Burma Village Regulation and other enactments were under consideration. A Regulation to define the law relative to Kachin Hill tribes was passed during the year.

Police.

7. During the year of report the re-organization of the Civil Police of Upper and Lower Burma was practically completed, the result being a considerable decrease in Upper Burma and a somewhat smaller increase in Lower Burma. The Upper Burma Military Police was also re-organized with a view to the constitution of the Northern Chin Hills Battalion, which took over the posts in the Northern Chin Hills towards the end of the year. The conduct of the Civil Police was somewhat better than in the previous year. Much attention was paid to the improvement of the beat-patrol system and to the development of Police training schools at district headquarters. The Bertillon system of anthropometry was tentatively introduced and its systematic extension is under consideration. Vigorous efforts were made to ensure the proper working of the village enactments and of the preventive provisions of the Code of Criminal Procedure. The effect of these measures for the improvement of police working was not conspicuously apparent in the year of report; but it may be hoped that in process of time the results will be more satisfactory.

In Lower Burma there was a large increase in the number of true cases of cognizable crime. In Upper Burma the number of cases was less than in the previous year. In some districts of Upper Burma there was a slight recrudescence of violent crime, but in all cases it was suitably dealt with. The effects of the complete suppression of dacoit gangs in Katha, and since the close of the year in Myingyan, and the success of the measures for keeping order in the Ruby Mines district, will be apparent in the records of the current year. In Lower Burma,

especially in districts of the Irrawaddy delta and in Shwegyin, violent crime was rife and the use of firearms was unduly frequent. The police in Lower Burma were not very successful in dealing with crime during the past year, the percentage of convictions to cases reported being very low. In respect of violent crime, much success was attained in Pegu and Shwegyin towards the close of the year and there were also signs of improvement in the districts of the Irrawaddy delta.

The constitution of the military police in Upper and Lower Burma remained unchanged, though its distribution by battalions in Upper Burma was modified. The general conduct of the force was good and its behaviour in action as usual admirable. The operations of the Police Supply Department were carried out with commendable efficiency. The total cost of the civil police amounted to Rs. 33,98,686 as compared with Rs. 34,15,138 in 1893. The cost of the military police was Rs. 49,30,109 in 1893 and Rs. 45,12,107 in the year of report.

Criminal Justice, Lower Burma.

8. There was a general increase in the number of offences in Lower Burma, which rose during the year from 49,155 to 54,632. Except in the Arakan division cattle-thefts, robberies and dacoities were more numerous than in the previous year. The general increase of crime was more marked in the Pegu division than in any of the other divisions of Lower Burma. The total of cases brought to trial was 46,452, as compared with 40,860 in 1893, and 3,141 more persons were tried than in the previous year. While in the Arakan and Irrawaddy divisions the percentage of convictions rose, there was a falling off in convictions in Pegu and Tenasserim. The average duration of cases rose during the year by one day. The number of persons proceeded against under the preventive sections of the Code of Criminal Procedure was twice as high as in 1893, and, in spite of the increase in prosecutions, the percentage of successful prosecutions was even higher than in the previous year. In the area under the control of the Judicial Commissioner, sentences of rigorous imprisonment and of whipping rose, but there was a diminution in the total number of fines imposed in this area. Judged of by the percentage of convictions, the result of sessions trials was not wholly satisfactory, but in the Pegu and Arakan divisions there is some improvement in this respect. Outside Rangoon appeals rose from 3,729 to 5,316, and, in consequence probably of this increase, the percentage of cases in which the Appellate Courts declined to interfere rose from 72·32 to 75·78.

Criminal Justice, Upper Burma.

9. The number of cases reported in 1894 was 16,365, or 272 more than in 1893, but the number of cases returned as true was lower than in the previous year. Murders, dacoities and cattle-thefts declined in number, while the number of cases of hurt rose to an appreciable extent. Otherwise the statistics of crime present no features of special interest. The number of persons tried during the year was 23,444 in all, as compared with 22,240 in 1893. Sessions cases declined slightly, though the number of persons brought to trial was 34 more than in the previous year, and in the greater portion of the province the result of sessions trials showed that the cases had been judiciously committed. The number of sentences of rigorous imprisonment rose, and, in spite of the fact that sentences of simple imprisonment fell, it is probable that the number of the latter is still unduly large. Previously convicted prisoners were generally more severely dealt with by the Courts than

they have been in the past. Appeals were more numerous than in previous years, and proportionately fewer sentences were upheld on appeal.

Jails.

10. The number of prisoners in confinement at the close of the year 1894 (13,625) was higher than any previously reached in Burma. There was an increase of nearly 5,000 in admissions and of almost 3,000 in discharges. Transfers and transportations fell to a small extent. The percentage of reconvicted prisoners among the adults admitted was slightly below 20 per cent., whereas in 1893 the percentage had been slightly in excess of 20 per cent. There were eight escapes during the year, and five of these eight prisoners were recaptured before its close. Jail offences other than those dealt with by criminal courts aggregated 39,586 or 8,207 more than in 1893. The expenditure incurred during the year in the maintenance of the prisoners confined in the jails in the province was Rs. 8,27,891 or Rs. 32,301 less than in the previous year. The average cost of maintenance during the year was Rs. 65 per prisoner per annum. This is a lower figure than any that has been reached in Burma during the past seven years. The net earnings of the jail population aggregated Rs. 4,83,126. The year was an unhealthy one and the total of deaths among the prisoners was 364, as compared with 290 in 1893.

Civil Justice, Lower Burma.

11. There was a general revival in litigation in the lower province during the year, the number of suits instituted being 42,408, or 2,426 more than in 1893. Similarly, the value of original suits rose from Rs. 56,18,969 in 1893 to Rs. 74,42,488. Out of the 44,563 cases which were before the civil courts during the year 13,021 were contested. The duration of contested cases rose during the year from 28 to 34 days and that of uncontested cases from 19 to 21. Regular appeals fell from 2,084 to 1,862, the number of appeals for disposal by District Judges being 1,421 as compared with 1,495 in 1893. The cost of original cases in Lower Burma amounted in all to Rs. 8,28,977. In the interior 29,308 more civil processes were issued than in the previous year and the receipts from processes increased considerably. The net financial result of the process-serving rules was satisfactory.

Civil Justice, Upper Burma.

12. As in Lower Burma, there was a general increase in litigation during the year in Upper Burma. The increase was most marked in the Southern and Eastern divisions. Out of 12,047 cases which came up for disposal during the year 4,274 were contested, and each of these contested cases was disposed of on the average in 29 days, as compared with 25 days in 1893. The number of appeals disposed of by Deputy Commissioners was 641. The percentage of the total cost to the total value of suits in Upper Burma rose from 9·39 to 12·40.

Registration.

13. One new registration office was opened in Burma during the year and none were closed. In Lower Burma the total number of documents registered was 16,493 or 16 less than in the preceding year; of these 14,199 affected immoveable and 2,246 moveable property. In Upper Burma the number of registrations by which immoveable property was affected was 2,874. In the Arakan division of Lower Burma greater recourse was had to the provisions of the Registration Act than in the past, but in other divisions there was no appreciable progress in registration.

Municipal administration.

14. The gross receipts of the Rangoon Municipality amounted to Rs. 21,22,570 as compared with Rs. 30,18,534 in 1893-94. The committee took up no loans, and, when the amounts borrowed during the latter year for the high-level water-works and the reclamation scheme are left out of consideration, there is no great difference between the receipts for the year of report and those of the preceding year. There was an increase from Rs. 13,97,566 to Rs. 14,51,392 in ordinary receipts, which was due mainly to larger realizations from assessed taxes and under the head of civil works and scavenging-tax; and the ordinary expenditure rose from Rs. 13,85,751 to Rs. 14,68,178, chiefly in consequence of enhanced outlay on the hospital, on day conservancy, and on the public gardens of the town. A large saving was effected under the head of civil works by a decrease in the expenditure on roads. A total of Rs. 3,86,070 was spent during the year on reclamation work in the town. The high-pressure water-supply was on the whole favourably reported on. Final orders will, it is hoped, shortly be passed on the scheme for supplying Rangoon with water from a reservoir which it is proposed to construct at Hlawga, a few miles north of the town. The Shone sewage system was extended during the year and is reported to have worked satisfactorily. The attendance at the General Hospital rose from 51,021 to 58,306, 7,241 of the patients who received treatment being indoor patients and 51,065 outdoor. By an amendment of section 41 of the Lower Burma Municipal Act power was taken during the year to levy the general municipal tax in Rangoon up to a limit of 10 per cent. on property within municipal limits.

Two new municipalities, those of Letpadan and Gyobingauk, were constituted in Lower Burma during the year; the number of Upper Burma municipalities remained unchanged. The total income of the municipalities of the province, exclusive of Rangoon, was Rs. 17,33,671 as compared with Rs. 17,24,634 in the previous year, and their total expenditure aggregated Rs. 17,47,851, against Rs. 17,60,878 in 1893-94. A carriage and cart tax was levied in Moulmein for the first time during the year, and the levy of a toll on carts entering the municipality was sanctioned. A new tax on households was imposed in Shwebo, and conservancy taxes were introduced into the municipalities of Shwebo and Minbu. In Akyab the rate of the scavenging-tax was enhanced during the year. Considerable progress was made in Moulmein in the realization of the outstandings of the scavenging-tax levied in that town. The total charges on account of office establishment and administration in the municipalities of Burma were higher than in the previous year; a part of this increase was due to the purchase by the Mandalay Municipal Committee of a municipal office. The expenditure on public safety was Rs. 1,63,841 in Upper Burma and Rs. 50,757 in Lower Burma. Street lighting was for the first time introduced into Ngathainggyaung-Daunggyi, and considerable expenditure was incurred in Mandalay in the purchase of street lamps and posts. Comparatively little was spent during the year by the municipalities of the province on account of the supply of water. The expenditure on conservancy amounted in all to Rs. 3,21,029. This is more than was spent in 1893-94, but the amount is still insufficient. The Moulmein Municipal Committee continued to carry out during the year the conservancy scheme drawn up for them in 1892. Medical charges absorbed a total of Rs. 1,84,720, or Rs. 7,317 less than in the

previous year. The expenditure on markets and slaughter-houses was a good deal less than in 1893-94, when the Prome, Yandoon, Ma-ubin and Myanaung municipalities all spent considerable sums on their bazaars, but the outlay under this head at Prome, Toungoo, and Pakôkku was somewhat above the average. Of public works as a whole there is little of importance to record. The expenditure on roads within municipal limits was generally higher than in the previous year. At Mônywa a bund is badly needed for the protection of the town. Its construction has been taken in hand since the close of the year. Several of the assignments made by municipal committees on behalf of education were reduced or withdrawn, and the outlay on public instruction was considerably lower than in 1893-94. Two new loans were taken up during the year, one of Rs. 20,000 for starting scavenging operations in Akyab, and the other of Rs. 10,000 for re-shingling the Shwegyin bazaar.

Military.

15. The strength of troops in the province at the beginning of the year was 3,832 Europeans and 10,474 Natives. At the end of the year the strength amounted to 4,417 Europeans and 9,613 Natives. The net charges in 1894-95 amounted to Rs. 97,22,860 as compared with Rs. 1,02,28,961 in 1893-94. The aggregate efficient strength of Volunteers rose from 1,765 at the beginning of the year to 2,243 at the end of the year.

Forests, Lower Burma.

16. The area of reserved forests was increased by 681 square miles of new acquisitions, and, after taking into account certain revisions made upon accurate survey, the total stood at 7,071 square miles at the close of June 1895. Boundaries measuring 418 miles were demarcated. The survey of the reserves near the Thaungyin river was completed and progress was made with the survey of other forests in the Hanthawaddy, Pegu, and Toungoo districts. The number of forest offences disposed of during the year was 3,030, of which 2,623 were compounded. The considerable increase was caused by prosecutions in the Prome and Thayetmyo districts for felling cutch and teak in jungle clearings. Protection from fire was attempted over 615 square miles and was successful over 549 square miles. Fifteen acres were added to the extent of regular teak plantations and 3,898 acres to the *taungya* plantations. The timber extracted during the year amounted to 16,077,693 cubic feet, of which 2,689,000 cubic feet were teak. Government extracted 1,912,206 cubic feet of teak and consumers and purchasers extracted the rest. The gross forest revenue of Lower Burma was Rs. 33,77,899, the amount being smaller than in the previous year in consequence of a block in the Pegu canal, a depression in the boat-building business, and the exhaustion of the cutch forests. The net revenue was Rs. 20,61,064. Imports of teak by the Salween aggregated 75,831 tons and imports into Lower Burma by the Irrawaddy and Sittang totalled 117,786 tons. Exports of teak rose from 171,345 to 191,266 tons. The Moulmein export trade declined slightly. From Rangoon more teak went to both Europe and India.

Forests, Upper Burma.

17. A new Forest division, called the Ruby Mines division, was created by partition of the Katha division in August 1894. The extent of reserved forests was increased by 459 square miles and was thus raised to 4,408 square miles. Enquiries were held

concerning 939 square miles proposed for reservation. Progress was made in the demarcation of reserve boundaries, and traverse surveys of 1,599 square miles were executed by local Forest officers in addition to the detail and linear surveys carried out by the Imperial Forest Survey Branch in the Pyinmana district. The forest offences disposed of in the year numbered 561, of which 345 were compounded by Forest officers. In the Eastern circle 43,888 and in the Western circle 205,440 acres of forest were protected from fire, and in 11,956 acres fire entered in spite of the measures taken. Only 2,809 teak trees were girdled. The Bombay-Burma Trading Corporation, Limited, extracted 133,181 tons of teak and two other lessees extracted 14,996 tons. Altogether 342,106 cubic feet of teak were extracted on Government account and 8,922,720 cubic feet by purchasers. Of minor forest-produce the amount and value extracted were less, mainly owing to the diminution of cutch-boiling licenses and to smaller extractions of India-rubber. The gross revenue from forests in Upper Burma was Rs. 22,17,987 and the net revenue was Rs. 16,70,321. Both figures are more than a lakh below those of the previous year. The decrease was due chiefly to the diminished extractions of teak by lessees, but cutch and India-rubber also affected the total.

Mines and quarries.

18. The output of petroleum was 10,920,951 gallons, and of coal 12,111 tons. The Nanyaseik ruby tract in the Myitkyina district was examined by a geologist, but its commercial value remains doubtful. The ruby mines at and near Mogôk continued to be worked by the Ruby Mines Company. The Jelebu Mining and Trading Company, Limited, acquired Captain Menzell's concession for tin in the Mergui district, and the total output of tin from that and other properties was 1,960 cwt., valued at Rs. 1,08,700. The Wuntho gold-field in Katha district continued to be prospected and three mining leases were granted.

Commercial Marine.

19. The total number of vessels engaged in the seaborne trade of the province was 6,335, or 15 more than in the previous year, and the total tonnage 3,975,148 tons, as compared with 3,797,096 in 1893-94. There was an improvement in foreign trade, due to the cessation of the effects produced by the combination of the Rangoon rice-merchants. There was, however, a falling off in the coasting trade, which must be attributed in part to the revival of trade with foreign countries. With one exception none of the shipping casualties which occurred during the year were important. The exception was the wreck of the Siamese steamer *Setthi*, which was lost in a cyclone in April 1894. No marine surveys were executed at any of the ports during the year, but tidal observations were taken at Rangoon, Moulmein, Akyab and Diamond Island. The administration of the Light-house Department was satisfactory. All the light-houses and light-vessels were inspected during the year. The *Martaban*, the new vessel constructed for duty at the Baragua flats, arrived in August 1894, but it was not found possible to place her at the flats as she was required for other and more urgent duties at the Spit and at the Krishna shoal. A new light-vessel, which is now in course of construction, will be placed at the Baragua flats. A second new light-vessel is also being built at the Kidderpore Dockyard. The schooner *Pharos*, which had been stationed temporarily at the Spit, foundered during the year. The receipts from the light dues during 1894-95 amounted to Rs. 2,75,809 or Rs. 21,770 more than during 1893-94. The

re ceiptsof the Rangoon Pilot Fund were Rs. 2,15,087 and its expenditure Rs. 1,95,554. Vacancies occurred in the Pilot-services at Bassein, Akyab and Moulmein, all of which were not filled up, as the reduction of the strength of the Bassein and Akyab Pilot services is in contemplation. The receipts of the Rangoon Port Fund were Rs. 11,75,920 and its expenditure Rs. 11,35,129. All the port funds of the province are in a solvent condition.

Seaborne trade.

20. The trade of the province suffered for the greater part of the year from the depression of 1893-94 caused by the rice-millers' league. Towards its close, however, there was a considerable revival of business. Imports of goods from abroad continued to be on a limited scale in almost every branch, and there was little ready money, as the cultivators had to apply their gains to make good the previous year's losses. The total trade of the province was valued at Rs. 22,22,42,542 against Rs. 21,53,82,475 in 1893-94, the principal feature being the large increase in exports of rice and teak timber. Most of the trade passed through Rangoon, but large shipments of rice were made also from Akyab and Bassein, and of rice and teak timber from Moulmein. The coasting import trade was active, and its value was about 18 lakhs more than in the previous year.

Inland trade.

21. The inland trade of Burma is carried on with Siam, Karenni, the Shan States and China. It was registered at six stations in Lower and at eleven stations in Upper Burma. Its total value was returned at Rs. 2,30,31,362 against Rs. 1,85,08,356 in 1893-94. Imports rose by 14·83 per cent. and exports by 40·03 per cent. The Lower Burma portion exhibited a decrease as the trade of Northern Siam partly returned to Bangkok. The Upper Burma trade increased owing partly to the increased safety of the routes into China and the Shan States. The recorded value of the trade between Lower and Upper Burma was 6·58 per cent. less than that of 1893-94; imports increased somewhat (5·03 per cent.), but exports fell off by 36·44 per cent. owing to a smaller general trade, especially in food-grains, there having been a good wheat and rice harvest in Upper Burma.

Public Works, Lower Burma.

22. In Lower Burma the total expenditure on Public Works during the year was Rs. 42,88,398. Excluding Establishment, Tools and Plant, Barrack Department services, and Suspense Accounts, Rs. 13,75,388 were spent on Civil Buildings, Rs. 10,58,709 on Communications, Rs. 1,77,348 on Military Works, Rs. 4,90,950 on Minor Works and Navigation, and Rs. 2,97,822 on Miscellaneous Public Improvements. The total cost of Establishment, including the Barrack Department, was Rs. 7,90,802, or a percentage of 23·26 on the total expenditure.

Considerable progress was made during the year on the new Government House, Rangoon. The new Cathedral at Rangoon was completed and brought into use in November 1894. The old Pro-Cathedral or Town Church on the Strand was dismantled, some of the materials being sold by public auction and the rest used for the new Cathedral. The old Field-to-Field Survey office in Godwin Road, Rangoon, was converted into a building suitable for the accommodation of an Engineering School. The two blocks of out-houses for the new Public Offices at Rangoon were finished, a Sub-Post Office was opened in one of the blocks for the convenience of the Public Offices located in the main building, and many petty

improvements were carried out. The Reformatory for Juveniles at Insein was practically completed during the year. The total mileage of open roads in Lower Burma to end of the year was. 2,866·5. During the year 88 miles of new road were opened.

Public Works, Upper Burma.

23. The total expenditure in Upper Burma from all sources was Rs. 40,11,282. Excluding Establishment, Tools and Plant, Barrack Department services, and Suspense Accounts, Rs. 6,55,619 were spent on Military Works, Rs. 9,35,539 on Civil Buildings, Rs. 9,27,766 on Communications, Rs. 79,188 on Miscellaneous Public Improvements, and Rs. 3,18,242 on Minor Works and Navigation. The total cost of Establishment, including the Barrack Department, was Rs. 10,76,448, or nearly 27 per cent. on the total outlay.

Barracks for the accommodation of Native troops were completed at Falam, Haka, Tiddim, and Fort White in the Chin Hills. Several military works were either completed or nearly so at Mandalay. A rifle-range for the British Infantry was completed at Meiktila. No Civil Works of special importance were executed. More Police buildings than usual were built during the year and the principal stations in the Chin Hills were provided with Post and Telegraph offices and other necessary public buildings. The Myingyan-Fort Stedman, Maymyo-Lashio, and Ruby Mines roads were improved by metalling some of the soft places. Communications in the Chin Hills were also improved and some roads in the Bhamo district were re-aligned. The total mileage of open roads in Upper Burma to end of the year was 2,902·4. During the year 86·70 miles of new road were opened.

Railways.

24. The gross earnings of the Burma State Railway for the calendar year ending the 31st December 1894 were Rs. 62,87,354, showing a decrease of Rs. 4,35,153. The net increase in earnings amounted to Rs. 80,836. The total length of line open on the 31st March 1895 was 745·49 miles, or 15·50 miles more than in the previous year. The difference is due to the opening of the branch from Wuntho to Nankan. The Burma State and Mu Valley Railways were amalgamated into one system on the 13th March 1895. The survey of the extension of the Mu Valley Railway from Mogaung to Myitkyina has been completed and the estimate was under preparation and has been sanctioned since the close of the year. Sanction was also received after the close of the year to the construction of the important line from Mandalay to the Salween, which will be taken in hand at once so far as funds can be made available.

Telegraphs.

25. *During the year 117·89 miles of line and 132·13 miles of wire were added* in Upper Burma to those previously existing. No additions were made in Lower Burma. In all 146 miles of line and 200·37 miles of wire were dismantled. The total number of messages disposed of in departmental offices during the year was 2,344,689, being 97,269 less than last year. The decrease is ascribed to the general slackness of trade.

Post Office.

26. At the end of 1894-95 the number of post offices open was 270 or 7 more than in 1893-94 and the mileage served was 9,769 miles against 9,742 in that year. The number of

letters, newspapers, packets and parcels carried was 15,324,812, there being a decrease of 1·8 per cent. as compared with the previous year. The value of money-orders issued rose from Rs. 1,74,72,764 to Rs. 1,79,32,179, the number of Savings Bank accounts increased from 34,697 to 38,552 and the total sum in deposit at the close of the year was Rs. 52,80,382 or Rs. 5,25,011 more than at its beginning.

Surveys and settlements.

27. Three cadastral parties of the Imperial Survey Department were employed during the year, one in the Tenasserim division and the other two in various parts of Upper Burma. The area surveyed in detail was 3,561 square miles, and 1,902 square miles were traversed in advance. In Thôngwa and Tharrawaddy local parties made surveys of small areas. The topographical survey parties, of which there were two, operated in the Northern and Southern Shan States and on the boundary between the Amherst district and Siam. A detachment accompanied the Mèkong Boundary Commission. The trigonometrical survey party continued its labours in the Katha, Bhamo and Upper Chindwin districts. Forest surveys were carried on in the Amherst, Pyinmana, Toungoo, and Pegu districts. Three settlement parties were at work, one in Amherst, one in Sagaing, and one in Minbu. In Meiktila and Yamèthin the recording of tenures, and in Katha a special enquiry into titles, were continued.

Revenue, Lower Burma.

28. The gross revenue demand of Lower Burma was Rs. 3,43,99,255 and the net demand after deducting remissions was Rs. 3,43,19,337. The increase of Rs. 16,74,669 was wholly due to the new customs duties, for, although stamps brought in about 2¾ lakhs more than in the previous year, the other main heads, land revenue, excise, forests, and fisheries, showed decreases varying from one to three lakhs. The capitation-tax also showed a decrease, which, though small (it was a quarter of a lakh), was significant. The gross demand of land revenue proper was Rs. 1,06,52,590. The area of assessed paddy-lands rose from 5,320,288 to 5,420,256, but cattle disease and depression in paddy prices caused large areas to lie fallow, and the consequence was a diminution in the gross demand, which was most marked in the Hanthawaddy, Pegu, and Thôngwa districts. The collection of the land revenue was less troublesome than in 1893-94, and the balance left outstanding from a net demand of Rs. 1,12,24,196 was Rs. 4,57,989. The decrease in gross and net demand of capitation-tax was due mainly to the return of Upper Burmans to their homes. The net demand of Rs. 38,61,839 was not realized without some exertion, and outstandings rose to Rs. 9,570. Fisheries had a bad year, being affected by the decreased purchasing power of the agricultural classes, and there was a small diminution in the yield of the salt excise. The increase of revenue from judicial, legal and commercial stamps was nearly a lakh, and was mainly due to increased litigation on the part of money-lenders, who called in their loans. The rest of the increase in stamp revenue resulted from the postal and telegraph business. The gross receipts from opium excise fell from Rs. 18,35,476 to Rs. 15,96,117 in consequence of the diminution of issues from the treasuries. The decrease in revenue would have been much greater, but the amount paid by vendors for license fees rose from Rs. 3,97,574 to Rs. 9,11,087, and therefore, while the issues of opium fell from 44,995 to 19,275 seers, the incidence of revenue per seer rose from nearly Rs. 41 to over Rs. 82.

The revenue from liquor fell by over two lakhs of rupees. All subdivisions, except license fees for the sale of country spirits, shared in the decrease, which was caused by the depression of trade and agriculture consequent on the low prices of paddy in 1893-94. The income-tax yielded Rs. 10,000 more than in the previous year, the collections aggregating Rs. 7,65,186. The increase was obtained from companies' profits, interest on Government securities, and salaries paid by local authorities. The tax on miscellaneous sources of income showed a decrease of about Rs. 15,000, which was balanced by an equivalent increase in respect of salaries paid by Government.

Revenue, Upper Burma.

29. The net revenue demand of Upper Burma was Rs. 1,13,96,475, being an increase of Rs. 9,09,625 over that of the previous year. Thathameda, State lands, and irrigation rates furnished more than this amount of increase, but forests yielded considerably less than in 1893-94, and this diminution more than counterbalanced the minor increases under excise and stamps. The thathameda demand increased from Rs. 54,90,719 to Rs. 57,79,838. The average incidence per household was Rs. 9-13-0, the same as in the preceding year, the enhancement of rates in Shwebo district being balanced by their reduction in Kyauksè. The advance in the demand was therefore due wholly to an increase from 559,042 to 583,497 in the number of assessed households, caused by the generally propitious season which recalled to their homes many who had temporarily emigrated to Lower Burma. The collections aggregated Rs. 56,25,951 on account of current demand and Rs. 60,508 of arrears. Failure of dry crops in Minbu and Thayetmyo necessitated the postponement of realizations in those districts. The State land revenue collections rose from 9½ to nearly 13⅓ lakhs, but this increase was due to the realization in the year of report of 2¼ lakhs belonging to the demand of the previous year. The demand really fell by over two lakhs of rupees owing to a variety of circumstances, of which deficiencies in irrigation were the most important. Water-rates on private lands brought in Rs. 1,93,460 against Rs. 87,689 in the previous year. Some part of this increase was, as in the case of State land revenue, no index of an enhanced demand, but in Meiktila there was a real and considerable addition to the irrigated area. Fisheries produced practically the same revenue, about three lakhs, as in 1893-94. Salt excise yielded Rs. 5,000 more; royalties on minerals showed an increase because the Ruby Mines Company, Limited, paid two lakhs as rent for the Mogôk mines. The realization of revenue was attended with more difficulty than usual and 8,573 processes were employed. The stamp revenue, amounting to Rs. 3,36,595, was enhanced mainly by larger sales of court-fee stamps. Opium yielded Rs. 3,23,310, being about Rs. 80,000 more than in the previous year, although the licit consumption was only 5,704 against 7,303 seers. Liquor duties and licenses produced a revenue of Rs. 3,47,728; only *tari* licenses and duty on distillery products showed an increase, and the total was over Rs. 5,000 less than in the previous year.

Finance.

30. The gross receipts under all heads in Lower Burma amounted to Rs. 4,90,08,390 as compared with Rs. 4,56,81,636 in the year 1893-94. The expenditure in the two years was Rs. 2,93,54,494 and Rs. 2,86,63,243 respectively. The increase in the receipts was common to Imperial, Local and Municipal Funds, the increment under the first-mentioned head amounting to Rs. 38,27,071. This increase was largely

due to the special contribution of Rs. 18,00,000 ordered to be made from the Provincial balance. The Imperial share of the Customs receipts also showed a large increase of over 26 lakhs of rupees. Imperial expenditure decreased by Rs. 53,294 as compared with the previous year. The decrease was entirely due to a reduction in the outlay on military works. Provincial receipts decreased by Rs. 19,09,869, mainly in consequence of the transfer of Rs. 18,00,000 to Imperial funds. There were also large decreases in the receipts on account of forests and State railways. The only large increase was under the head of Stamps. Provincial expenditure was less by Rs. 15,468 than in the previous year. The decrease was mainly due to a decrease of Rs. 4,83,858 under civil works. In Upper Burma the receipts rose from Rs. 1,27,76,137 in 1893-94 to Rs. 1,37,41,940 in the year of report, while the expenditure decreased from Rs. 1,89,49,732 to Rs. 1,74,26,536. Apart from Local and Municipal funds, the receipts and expenditure in Upper Burma are wholly Imperial. There was an increase of over 7½ lakhs under the head of Land Revenue and the only serious decline was a decrease of Rs. 1,33,174 in forest receipts. The large decrease in expenditure was due to a reduction of 4 lakhs in Police charges, of over 1⅓ lakhs in outlay on Railways, and of over 10½ lakhs in Public Works expenditure. The counterbalancing increases were insignificant and amounted only to 1⅓ lakhs in all.

Sanitary and Medical administration.

31. In Lower Burma the total number of births registered was 124,753 and the total number of deaths 106,407, the birth rate per mille of population being 27·62 as compared with 26·03 in the previous year and the death rate 23·56. The mortality from cholera during the year was very heavy and the number of deaths from fevers was above the average. Dysentery and diarrhœa carried off an exceptionally large number of victims, and though small-pox was far less prevalent than in 1893, the year was no doubt an unhealthy one. In Lower Burma the total number of vaccinations was 206,092, as compared with 175,808 in 1893-94. In Upper Burma the figures for the year of report and the previous year were 114,863 and 98,726 respectively. The Vaccination Act was extended during the year to five municipalities in Lower Burma and to four municipalities and four cantonments in Upper Burma. Three new dispensaries were opened during the year in Lower Burma and one was closed. A scheme for facilitating the sale of quinine in the rural tracts of the province was started and will, it is hoped, have good results in reducing the mortality from fever in the future. In Upper Burma three dispensaries were closed and two new ones opened. The new buildings in the Rangoon Lunatic Asylum premises were completed during the year. The high-level reservoir constructed with a view to improving the system of water-supply in Rangoon was completed and water is now being supplied from it. The Shone sewage system was extended to fresh areas in the town of Rangoon during the year. The Mandalay Municipal Committee have two sanitary schemes under consideration, one the provision of an adequate water-supply, the other a conservancy scheme.

Education.

32. The total number of schools in the province was 15,084, as compared with 14,823 in 1893-94, and the total number of pupils under instruction rose from 237,550 to 244,734. The number of colleges has been increased by one by the opening of the Baptist College at Rangoon, though the number of students undergoing University education was lower than in the previous year. High schools rose in number by two, and

in the matter of attendance showed an increase of 370 pupils as compared with the figures of 1893-94. Middle English schools decreased in number, and the attendance at Middle Vernacular schools was lower than in the preceding year, though the total of schools was four higher. In the case of Primary schools there was a large diminution, the total for the province being 4,162 as compared with 4,493 in 1893-94. The decrease was due to stricter classification. There were five Normal schools open during the year, with an attendance of 188 pupils. The results of the work of the year, as evidenced by the number of passes, was on the whole satisfactory. The number of F. A and B. A. passes was higher than in the previous year, and the Eighth Standard and Entrance examinations showed an improvement. In Standards V and VI the results were not all that could be desired, and in the Primary standards there was a diminution, but the figures for the Provincial Seventh Standard examination were, all things considered, reassuring. A Government Engineering school was opened in Rangoon shortly after the close of the year. On the 1st April 1894 a technical class connected with the Railway Workshops at Insein was opened. The number of girls and boys attending schools confined to Europeans was 1,563 or 199 more than in 1893-94. The Educational Syndicate held only one general meeting during the year, but the Executive Committee met 13 times.

BURMA SECRETARIAT:
The 12th December 1895.

PART II.

DEPARTMENTAL CHAPTERS.

REPORT

ON

THE ADMINISTRATION OF BURMA

For the year 1894-95.

[*Note.*—In the Burma Administration Report for 1892-93 the following subjects have been treated in a permanent form for reference :—

	Pages.
Physical features of the country, area, climate and chief staples ...	3—6
Historical summary	7—10
Form of administration	10—12
Character of land tenures, system of survey and settlement ...	13—20
Civil divisions of British territory	20—22
Details of last census, tribes and languages	22—25
Legislative authority	43
General system of public instruction	120—125
Literary societies	129
Ecclesiastical jurisdiction	132

In accordance with the orders of the Government of India these chapters are not reproduced in this report.]

I.—PHYSICAL AND POLITICAL GEOGRAPHY.

Changes in the Administration.

MR. (now Sir) F. W. R. FRYER, C.S.I., officiated as Chief Commissioner from 1st April to 2nd May 1894; he was then relieved by Sir A. Mackenzie, K.C.S.I., who continued in charge till the end of the year.

No changes were effected in the number or limits of divisions or districts. The Rangoon Town District was divided into two subdivisions for the sake of administrative convenience. The number of townships in the Bassein district was increased by one, and one township was abolished in Henzada, and one in the Lower Chindwin district. Proposals for the re-arrangement of districts in the Northern and Central divisions were under consideration, but were not carried into effect till after the close of the year of report.

The boundary between the Shwegu and Bhamo subdivisions of the Bhamo district on the south and the Mogaung and Myitkyina subdivisions of the same district on the north was fixed; and the revision of the boundary between the Bhamo, Katha, and a part of the Upper Chindwin districts was under consideration during the year. Changes of township boundaries (besides those involved in the formation and abolition of townships) were made in the Mergui and Ruby Mines districts. In four subdivisions and four townships the headquarters were moved to more convenient centres.

Relations with Tributary States and Frontier Affairs.

General results in the Southern Shan States.

2. The past year was one of unprecedented prosperity throughout the Southern Shan States. No disturbances of any kind occurred; there was hardly any crime; there was no serious epidemic and no severe outbreak of cattle-disease; and the harvest was abundant. The Superintendent was able to make an extended tour and to visit several States which had not been inspected by him; and as he had a full staff of assistants throughout the cold weather, the work of administration and control was facilitated. Several Chiefs have begun to take an intelligent interest in the development of the resources of their States, and the assurance of permanent peace has given an active stimulus to trade and cultivation. Among the most important events of the year were the measures taken towards its

close to make clear the position of the important trans-Salween State of Kēngtūng and to strengthen the control exercised over that State by the Superintendent. The *status* of Kēngtūng has now been declared to be the same as that of other Shan States; a small garrison has been established at the capital, where an Assistant Political Officer has been located for some time past; the telegraph line has been extended from Möng Nai and a mule-track capable, it is hoped, of being used throughout the year now connects Kēngtūng with Fort Stedman. The Chief of Kēngtūng was pressed to take steps to keep order in the part of his State which borders on Siam, and complaints of disturbances in that neighbourhood have ceased. Mr. Giles, Assistant Political Officer, Loikaw, made a successful and extended tour through the country of the Brès and Palaungs, defining boundaries, allotting jurisdictions, and settling disputes. The country has been allotted to Shan and Karenni Chiefs who have traditional claims to authority in the tracts assigned to them; they have been informed that they will be responsible for the good order of their possessions.

Details of improvements.

3. Good work was done in the year, notably by the Chiefs of Möngpawn and Yawnghwe, in the improvement of communications in their States. To this, no doubt, as well as to the maintenance of peace and order and the abrogation of tolls, is partly due the great expansion of the trade of the Southern Shan States in recent years. The figures are as follows:—

	Exports from Southern Shan States.	Imports into Southern Shan States.	Total.
	Rs.	Rs.	Rs.
1892-93	11,02,335	11,22,951	22,25,286
1893-94	11,40,959	10,88,808	22,29,767
1894-95	28,47,651	26,63,102	55,10,753

Among other reforms which are being introduced is that of placing the financial arrangements of the States on a sound footing. The forms of budget estimates and of revenue registers to be maintained by the Chiefs have been definitely settled: and it has been specially provided that unauthorized demands are not to be made, and that the people of each village or circle are to know exactly how much they are required to pay. Proposals for assimilating the administration of the States to that of British districts by the introduction of fixed payments to officials and the establishment of regular police were discussed during the year, and it was decided that these measures could not be usefully adopted. Measures for the provision of medical relief and of veterinary assistance have been considered and have been cordially accepted by the Chiefs. The plan of educating the sons of Shan Chiefs and notables in Rangoon has been definitely abandoned, and it has been decided to open a school at the Superintendent's headquarters.

Durbar at Taunggyi.

4. The Chief Commissioner visited Taunggyi in May 1895 and held a durbar, which was largely attended by Chiefs from all parts of the Southern Shan States and by all the Karenni Chiefs. The durbar was the first at which the trans-Salween and cis-Salween Chiefs had met.

Hsipaw and its dependencies.

5. In the Northern Shan States the principal points of interest in the year's record are the introduction of many useful reforms in Hsipaw and the continuance of the efforts to improve the administration of Tawngpeng and North Hsenwi. In Hsipaw the Sawbwa was assisted by Captain Marrett, who occupied throughout the year the newly created post of Adviser. By a vigorous effort the Sawbwa succeeded in placing his finances, which were much disordered, on a satisfactory footing and made arrangements which, in a short time, should entirely free the State from debt. Many beneficial reforms were carried out, among which may be mentioned the reduction in the number of officials, the disarmament of Hsipaw and the sub-States of Mönglong and Hsumsai, the abolition of monopolies and the partial prohibition of gambling. The influence of the Superintendent and the Adviser was

exerted to effect these reforms, which are reported to have greatly ameliorated the condition of the people of Hsipaw. In Hsumsai similar measures were taken, the most important being the removal of the Myoza, Kun Meik, who had forfeited the Sawbwa's confidence. Hsumsai has since been administered directly from Hsipaw. In Mönglong the appointment of Saw Hkè as Myoza was not attended with such immediately good results as had been hoped. Both in Hsipaw and Hsumsai also there were dacoities and other serious crimes, among them the murder of Mr. Lambert of the American Mission, which have not in all cases been satisfactorily dealt with.

Tawngpeng and North and South Hsenwi.

6. The improvement reported in the administration of Tawngpeng is due in a great measure to the Superintendent's visit and to his personal exhortations to the Sawbwa, and also to the establishment for two successive years of a temporary post at Möngngaw. In North Hsenwi the Kachin circles were efficiently administered by Mr. Graham, who has now been stationed at Kutkai where he can exercise control throughout his charge. Owing to the obstructiveness of the Sawbwa, it was found necessary to assume the direct revenue administration of nine other important circles. The result has been satisfactory from a revenue point of view, but the circles have been restored to the Sawbwa since the close of the year of report. South Hsenwi was efficiently administered during the year and was free from crime. The Sawbwa evinced praiseworthy interest in works of public utility.

Shan States under the control of Commissioners.

7. Möngmit was administered as before as a subdivision of the Ruby Mines district. The finances have at last been put on a comparatively sound footing. No incidents of importance occurred in Hsawnghsup, Singaling Hkamti, or Khamtilong, except the death of the infant Chief of Singaling Hkamti and the appointment of his sister as his successor. Maw, which has since been placed under the Superintendent and Political Officer, Southern Shan States, was peaceably administered during the year.

Tribute.

8. The amount of tribute collected throughout the Shan States amounted to Rs. 2,85,695. Of this sum Rs. 2,12,550 was paid in the Southern Shan States and Rs. 73,145 in the Northern Shan States. There were no outstandings in the Southern States, and in the Northern States the outstandings at the close of the year amounted to Rs. 7,510, of which Rs. 5,510 have since been paid in.

The Chin Hills.

9. There were no disturbances among the tribes in the Chin Hills, no raids on the plains, and scarcely any serious crimes. The Political Officer and his Assistants were therefore free to devote their energies to the task of consolidating the administration of the tract under their control, of cultivating friendly relations with the tribes, and of carrying out measures to render peace and order permanent. The most important work done during the year was the complete subjugation and disarmament of the once turbulent village of Thetta, which lies to the south of Haka, and the subsequent disarmament of the Southern tribes. The expedition against Thetta, which was organized on a scale such as to render opposition hopeless, was carried out with complete success by troops under the command of Major Keary, D.S.O. The result was the entire submission of the Southern tribes and the voluntary offer of the Yokwas to surrender their arms. Advantage was taken of the opportunity to press on the work of disarmament in the south and west, and, by a judicious combination of boldness and tact, the Political Officer succeeded, without recourse to any punitive measures, in obtaining during the season the surrender of no less than 1,938 guns. Besides this main work of the season, tours in various parts of the hills were undertaken by the Political Officer and his Assistants. The Yahow tract was visited and satisfactory relations established with the Chief of that tribe. The Siyins, Nwengals and Kanhows were also visited. They gave no trouble throughout the period of report. The most serious crime committed in the hills during the year was the murder of an interpreter at the village of Rawa, near Lungno. This act does not appear to have had any political significance. The amount of tribute collected without difficulty

was Rs. 17,572, almost the total demand of the year, and nearly Rs. 1,000 more than in the previous year. Intercourse between the Chins and the Shans and Burmans of the plains is increasing, traders from below can now move safely in the hills, and colonies of Chins are settling in the Kale valley. Among the administrative measures undertaken during the past year was the substitution of military police for the military garrison of the Northern Chin Hills. The new battalion was organized and located towards the close of the year 1894.

The Upper Chindwin frontier.

10. On the Upper Chindwin frontier the only incident of special note was a sanguinary raid committed by the Leya Chins on the village of Shawpu. The raided village is not within our administrative border. The Kaswa-Aswa tribes, which were punished in the preceding year, remained quiet and no further disturbances occurred. The Kale and Kabaw valleys were at peace throughout the year.

The Arakan Hill Tracts.

11. No raids were committed in the Hill tracts of Northern Arakan during the year. The policy of leaving an uncontrolled tract between the administrative border of Northern Arakan and the boundary of the South Lushai Hills has been questioned, and proposals for undertaking the control of this tract have been put forward. Under present arrangements, while the tract nominally forms part of the Arakan Hill Tracts, it is left uncontrolled, the sole condition being that raids shall not be committed within our administrative frontier. During the past year this condition was fulfilled and there were no raids from this tract either on Northern Arakan, or, so far as the Chief Commissioner is aware, on the South Lushai Hills.

The Yawdwin frontier.

12. The Subdivisional Officer of Yawdwin made a short tour in the hills on the borders of the Pakôkku district. Many villages were visited and some tribute was collected. The frontier was undisturbed during the year.

Administration in the Kachin Hills.

13. No serious disturbances occurred in the Kachin Hills and there were few cases of grave misconduct. Up to the 31st March 1895 the hill tracts on the north-east frontier continued under the control of the Deputy Commissioner of Bhamo. It had long been recognized that the task of administering the whole of the Bhamo district and of controlling the hill tribes therein was a task beyond the powers of one officer. From the 1st April 1895 the district was divided into two, the new district having its headquarters at Myitkyina. The line of division between the two districts is approximately the latitude of the head of the first defile of the Irrawaddy river. During the year of report the Regulation which had been framed for the control of the hill tribes was enacted. It has since been brought into operation in Bhamo and Myitkyina and in the hill tracts in Katha and the Ruby Mines districts.

Tours of Civil Officers.

14. Civil Officers with escorts of military police proceeded on tour in the hills in the cold season for the purpose of settling disputes, collecting tribute, and generally supervising the tribes. In the Kaukkwe valley west of the Irrawaddy river Mr. Godber's tour was perfectly peaceful and he was well received by the people. Mr. Hertz's tour in the south-east of the district was disturbed at the village of Khaittik by an unfortunate incident which led to the temporary deportation of the Duwa Palaungtu. Apart from this the tour was uneventful. The Matin tract, which has been assigned to Burma by the Convention concluded last year between Great Britain and China, was visited by Mr. Rae, and declared to be subject to the same control as other parts of the Kachin Hills. It is hoped that the assertion of dominion over this tract will tend to increase the security of the Nampaung trade route, on which caravans were sometimes robbed by hill-men from the villages east of Matin. Further north Mr. Minns visited a large number of villages. In the tracts east of the Irrawaddy, which are now included in the Myitkyina district, Mr. Duff made his annual tour. In Mogaung Mr. Chapman and Mr. Jennings visited the southern part of the subdivision and the Jade Mines tract respectively. The continued misconduct of the Sana Kachins from beyond the administrative border has rendered it necessary to undertake punitive mea-

sures, which are now in progress. The relations of the officers of the Bhamo district with the Chinese border officials were of a cordial nature.

Katha Hill Tracts.

15. Mr. Soppitt undertook a short tour in the Kachin tracts of the Katha district. He withdrew a reasonable proportion of guns and established relations with the headmen, which will doubtless have the effect of rendering permanent the peaceful condition of these hills.

II.—ADMINISTRATION OF THE LAND.

Surveys, Settlements, and Waste Lands (Lower Burma).

Surveys and settlements.

16. Party No. 7 of the Survey of India was engaged on cadastral survey in the Amherst and Shwegyin districts. It surveyed 599 square miles in the former and 423 square miles in the latter district and executed also 1,000 square miles of advance traverses, 52 square miles of revision survey, 137 square miles of topographical survey, and some work in Rangoon Town. In Thôngwa and Tharrawaddy 127 fisheries were mapped by local parties under the respective Superintendents of Land Records. A further area, amounting to 246 square miles, of newly cultivated land in the Thôngwa district was surveyed by holdings (not fields) for the immediate purpose of assessing revenue. Settlement operations were carried on in 597 square miles of the Amherst district.

Supplementary survey.

17. The total area under supplementary survey in 1893-94 was 19,251 square miles against 18,487 in the previous year. In four districts the added area had been surveyed by local parties and in two districts by the Survey of India. The cost of supplementary survey was Rs. 1,73,777 and the average cost per square mile was Rs. 9-0-5, being Rs. 1-6-5 more than in the previous year. The increase in average cost was due to the heavy initial expenses incurred in dealing with areas recently brought under the system, especially in the Amherst district. The average number of kwins checked by Land Records Inspectors rose from 93 to 95. There were special circumstances which reduced the average number of kwins checked by each Superintendent from 1,144 to 988. The following statement gives details of the operations of the year:—

Area under Supplementary Survey and Cost of Operations.

* Revised figures.

Statistics of transfers and tenants.

18. The total area of land sold in 1893-94 amounted to 303,488 acres against 281,209 acres in the previous year. The Thôngwa district accounted for nearly the whole increase. The area of land mortgaged decreased from 133,538 to 101,243 acres, owing to smaller transactions in the Hanthawaddy, Pegu and Tharrawaddy districts. There was an increase in Henzada, Amherst, and Shwegyin districts. In the two last-mentioned districts the apparent increase is attributed to better registration. The decrease in the Pegu division is attributable in part to a practice of recording mortgages as sales for the better security of the lender. The value of land fell in most districts and has continued to fall since the close of the year of report. The area occupied by tenants was 994,325 acres against 970,138 in the preceding year. The average rent per acre, which was 5·49 in 1893-94, rose to 6·67 in the year of report, being thus slightly higher than in 1892-93. The rise was due to the higher prices of paddy. The apparent increase of area is ascribed to more accurate registration in Akyab and Thôngwa. In Pegu there was a considerable decrease owing to the return to their homes of Upper Burmans. The increase in Prome, which is a district of small holdings, merits attention, and, though the landlords are reported to be mostly agriculturists themselves, seems to point to the transfer of ownership from the actual cultivators to money-lenders. The question of special legislation for agriculturists is still under consideration. The highest reported rent was Rs. 15·47 per acre in the Mindon township of Thayetmyo (probably for land cropped with tobacco) and the lowest was Rs. 1·20 per acre in the Salween-Hlaingbwè township of the Amherst (now Thatôn) district. The enforcement of a stricter practice in regard to fallow rates had a beneficial effect in inducing some persons to relinquish land which they were unable to cultivate themselves and in thus throwing open land for occupation by new cultivators holding direct from Government.

Grants under the old waste land rules.

19. One grant of 1,359 acres under the old waste land grant rules was converted into a grant under the existing rules. There remained 102 grants, of which 91 paid revenue amounting to Rs. 75,608 on 107,680 acres.

Area under exemption from revenue.

20. The area of land granted with temporary exemption from revenue in 1894-95 was 46,476 acres against 94,318 acres in 1893-94. There were increases in Pegu and Shwegyin. In other districts the area granted was less than, or only slightly more than, in 1893-94. The following statement shows the areas granted in each division during the last five years :—

Division.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
	Acres.	Acres.	Acres.	Acres.	Acres.
Arakan	4,701	6,989	6,518	16,377	7,636
Pegu	25,384	39,620	34,191	18,737	5,863
Irrawaddy	22,845	39,630	29,638	45,297	22,088
Tenasserim	14,556	27,650	38,123	13,786	10,756
Southern	...	...	22	121	133
	67,486	113,889	108,492	94,318	46,476

Grants for religious and public purposes.

21. The number of grants made in 1894-95 for religious and public purposes was 146. The area granted was 60 acres and the estimated yearly value of the area was Rs. 384.

Surveys, Settlements, and Waste Lands (Upper Burma).

Cadastral survey.

22. Survey Party No. 3 completed 1,649 square miles of cadastral survey in Meiktila, Yamèthin, Shwebo (including the old Ye-u district), Katha, and Upper Chindwin districts, and also surveyed on an 8-inch scale the Katha gold-field, which covers 5 square miles. In Katha and Upper Chindwin districts a new departure was made;

complete *kwins** were not demarcated, but only the exterior boundaries of the cultivated area were laid down. This system will not be continued. Another Party (No. 12) traversed 902 square miles in Myingyan and completed 890 square miles in Magwe district. As the survey has got too far ahead of the settlement, No. 12 Party has left Burma. The cost per square mile was Rs. 68 for No. 3 Party, Rs. 60 for No. 12 Party's traverse survey, and Rs. 142 for No. 12 Party's detail survey.

Topographical survey.

23. Survey of India Party No. 11 surveyed 1,120 square miles in the Southern Shan States on the 1-inch scale and 2,130 square miles on the $\frac{1}{4}$-inch scale. It also triangulated 1,800 square miles for the 1-inch scale and supplied a detachment to accompany the Mèkong Commission. Party No. 21 surveyed 8,521 square miles on the $\frac{1}{4}$-inch scale in the Northern Shan States, 905 square miles in the Southern Shan States, and 1,726 square miles on the Amherst-Siam boundary.

Settlements.

24. The settlement parties in Minbu and Sagaing continued at work throughout the year; the enquiries into land tenures in Katha went on till February, when the officer in charge fell ill; in Meiktila and Yamèthin districts the demarcation of holdings and record of tenures progressed satisfactorily, but the question of utilizing these labours is still unsettled. The principles of settlement are also still unfixed in many important points, particularly the methods of assessment on dry crops and of adjusting the thathameda when revenue comes to be levied from non-State lands. The experiment of trusting to the surveyors to mark the holdings and make the record of landholders was not altogether successful.

Supplementary survey.

25. In the Mandalay district 675 square miles came under supplementary survey. The expenditure, which was Rs. 16,630, and averaged Rs. 25 per square mile, has not directly benefited the revenue, since no rates have yet been fixed upon the Settlement Officer's report. The establishment collected, however, valuable materials for checking and supplementing the Settlement Report. In the Kyauksè district the area operated on was, as in the previous year, 549 square miles. The cost per square mile was Rs. 58. This cost was exceedingly high, and since most of it cannot be recovered from the thugyis, as in Lower Burma, it has to be borne by Government. Supplementary survey establishments were started in Sagaing, Minbu, and Shwebo during the year, as auxiliary to the settlement operations.

Grants of waste land.

26. The area of waste land leased was 7,560 acres against 12,229 in the preceding year. Magwe, Sagaing, Lower Chindwin, Pakôkku, Mandalay, and Katha districts contributed the greater portion of the total. A special lease of 2,125 acres was granted in the Sagaing district to Messrs. Calogreedy and Fowle, with nine years' exemption from revenue in consideration of their engagement to undertake irrigation works. An experiment was tried of leasing land to communities of Chins in the Magwe district.

* A *kwin* is a piece of land selected as a survey unit on account of its natural boundaries (streams hills, &c.) or because it coincides with some administrative area, *e.g.*, a village headman's jurisdiction.

III.—PROTECTION.

Legislation.

27. The following Acts affecting Burma were passed during the year:—

1894.

XI.—An Act to amend the Lower Burma Burma Village Act, 1889.
XII.—An Act to amend the Articles of War for the Government of Her Majesty's Indian Forces.
XIII.—An Act to amend certain enactments relative to the Army.
XIV.—An Act to amend the Burma Municipal Act, 1884.
XVI.—An Act to amend the Indian Tariff Act, 1894.

1895.

II.—An Act to amend the Burma Boundaries Act, 1880.
III.—An Act to amend the Indian Penal Code, Act VI of 1864, and the Indian Post Office Act, 1886.
IV.—An Act to amend sections 366 and 371 of the Code of Criminal Procedure, 1882.
V.—An Act to amend the Cantonments Act, 1889.
VII.—An Act to amend certain sections of the Code of Civil Procedure and the Punjab Laws Act, 1872.
VIII.—An Act to amend Act V of 1861 (an Act for the regulation of Police).
IX.—An Act to confer on Presidency Magistrates and District Magistrates certain powers and authorities in relation to the surrender of fugitive criminals.
X.—An Act to provide for the payment by Railway Companies registered under the Indian Companies Act, 1882, of interest out of capital during construction.
XI.—An Act to remove certain doubts to the validity of certain proceedings and acts of certain officers of the Pegu and Tenasserim divisions in Lower Burma and to prevent their being raised in future.
XII.—An Act to give power to companies to make certain alterations in the instruments under which they are constituted and to amend the Indian Companies Act, 1882.

Of these Acts XI and XIV of 1894 and Act XI of 1895 apply exclusively to Burma.

The following were the only Acts extended to Upper Burma (exclusive of the Shan States) during the year in exercise of the powers conferred by section 5 of the Scheduled Districts Act:—

Act XII of 1850 (for avoiding loss by the default of Public Accountants).
Act XII of 1886, Petroleum Act.

A Bill to amend the Lower Burma Village Act and other enactments and a Regulation to amend the Upper Burma Village Regulation and other Regulations, were under consideration during the year. A Regulation to provide for the administration of the Kachin Hill tracts was enacted but not brought into force till after the close of the year of report.

Police.

General results.

28. The principal points of interest in the record of the past year are the practical completion of the re-organization of the Civil Police in Upper and Lower Burma, the reduction and redistribution of the Upper Burma Military Police partly consequent on

the formation of the North Chin Hills Battalion, the progress in the arrangements for training the Civil Police and for putting the beat-patrol system in working order, the comparative immunity of Upper Burma from serious crime, notwithstanding the occurrence of isolated cases of special gravity, and the marked increase of crime in certain districts in Lower Burma.

Strength and constitution of the Civil Police force.

29. The conditions of almost every district were brought under review during the year, and the re-organization of the Civil Police, which had been begun in previous years, was practically completed. The introduction of the beat-patrol system and the need of providing for the training of the men and for men absent on leave rendered an increase necessary in most districts of Lower Burma, while the peaceful state of Upper Burma made it possible to effect a large reduction in that part of the province. The result was a net decrease of 285 officers and men in the total Civil Police force. The sanctioned strength in Lower Burma at the beginning of the year was 6,555 and at the end of the year 6,824, while in Upper Burma the corresponding figures were 7,940 and 7,386. In Akyab a reduction has been ordered in view of a substantial increase in the military police force of the district, and in Thayetmyo the force has been reduced from its former strength, which was necessary only so long as the conditions consequent on its position as a frontier district remained in operation. No material change in the constitution of the Civil Police was made, except the reduction in the number of Natives of India in the Akyab district and the extension of the promising experiment of enlisting Chins in the Pakôkku district. The number and organization of superior officers remained unaltered. The cost of the Civil Police in Lower Burma amounted to Rs. 18,06,724 as compared with Rs. 17,09,312 in the previous year. In Upper Burma the cost amounted to Rs. 15,91,962 as compared with Rs. 17,05,826 in 1893. There was thus a net decrease of Rs. 16,452 in the gross cost of the Civil Police of the province.

Conduct of the Civil Police force.

30. On the whole there was a slight improvement in the conduct of the men during the past year. There was a considerable decrease in the number of departmental punishments and a small increase in the number of punishments inflicted judicially. In Bassein, Henzada, and Mandalay the number of desertions was large. In Rangoon, Pegu, Thôngwa, Myaungmya, Pakôkku, Mandalay and the Upper Chindwin the number was abnormally high. There was an increase in the number of rewards granted to members of the force.

Recruitment.

31. In most districts there was no difficulty in obtaining recruits, though in some places they were not of a very good class. In some of the more sparsely populated districts of Upper Burma, such as Katha and the Upper Chindwin, where rates of wages are high, it has been found impossible to enlist men on the pay (Rs. 9—11) of 4th grade constables, and that grade has consequently been abolished. The issue of a notice by the Inspector-General explaining the advantages of Police service is said to have aided enlistment in certain districts. The enlistment of Chins in the Pakôkku district was attended with a satisfactory measure of success.

Training schools.

32. Considerable advance was made during the past year in the organization of the training schools, on which the improvement of the police force mainly depends. Owing to the fact that in Lower Burma the police force in most districts was undergoing reorganization and redistribution the prescribed number of men was not called in for training. In Henzada, Prome, Pegu, and Amherst fair results were obtained. In Upper Burma, where conditions of police work were less difficult, a reasonable number of men was called in for training in all districts except Magwe, Bhamo, and the Upper Chindwin. In Shwebo no men were called in for training till September. In the Upper Chindwin district, as a special case, training schools at subdivisional headquarters instead of one central school have been sanctioned. A subdivisional school has also been opened at Pyinmana. A fair proportion of recruits was passed through the schools except in Myaungmya, Bhamo, and the Upper Chindwin districts. Instruction in musketry was neglected in most districts in Lower Burma, in seven districts no training having been given, and

in all others the number put through the course being inadequate. In Upper Burma the results were more satisfactory.

Buildings.

33. The expenditure on Civil Police buildings during the past two years was as follows:—

Lower Burma.

	1893. Rs.	1894. Rs.
Original works	1,82,333	2,01,137
Repairs	17,230	29,270
Upper Burma.		
Original works	1,06,685	1,53,868
Repairs	10,820	14,802
Total ...	3,17,068	3,99,077

The Inspector-General devoted much personal attention to the proper expenditure of funds available for public works. Substantial progress was made in the provision of police-stations and house accommodation for the men; but many needs have still to be supplied. In view of the limitations imposed by financial pressure, orders have been issued for the construction of cottages or huts of the ordinary Burmese style in lieu of the expensive and unpopular barracks formerly provided for the Civil Police. It is believed that the new plan will not only be economical, but will be appreciated by the men. Among other works may be mentioned the provision of defences for armed posts. In accordance with orders issued last year, all Civil Police stations above a fixed strength are to be armed, unless specially exempted, and all armed posts are required to be protected against a sudden attack. Eighty posts which should ordinarily be armed were still unprotected at the close of the year.

Cognizable crime.

34. There was an increase of 3,957 true cognizable cases reported in the year as compared with the number in 1893, the figures for the two years being 51,270 and 47,313 respectively. The following table shows the distribution of cognizable crime according to classes in the two years in Lower Burma and Upper Burma respectively:—

Lower Burma.

	1893.	1894.
Class I	352	283
Class II	3,054	3,365
Class III	2,369	3,318
Class IV	134	177
Class V	13,369	14,804
Class VI	15,731	17,886
Total ...	35,009	39,833

Upper Burma.

	1893.	1894.
Class I	106	122
Class II	738	737
Class III	741	764
Class IV	87	76
Class V	5,407	5,342
Class VI	5,225	4,396
Total ...	12,304	11,437

The increase was entirely in Lower Burma, Upper Burma showing a small decrease. In Lower Burma the only districts which show a decrease are Kyaukpyu, Sandoway, Prome, Tavoy, and Thayetmyo. In Rangoon and Toungoo the increase was small. In Akyab, Pegu, Thôngwa, Henzada, and Amherst the proportionate increase was very large. The nominal decrease in Bassein was due to the reduction in the size of the district as compared with its size during the greater part of the preceding year. The districts in which the population showed in proportion to their numbers the most pronounced criminal tendency are all the districts of the Pegu and Irrawaddy divisions and Toungoo, Thayet-

myo, Shwegyin, and the Ruby Mines. The cause assigned to the general increase of crime in Lower Burma is the general poverty of the people, which was due to the low price of rice. In Upper Burma the increases in the number of cognizable cases were for the most part small and to some extent are probably due to improvement in the reporting of cases. There was a marked increase in the number and proportion of false cases, the increase being common to both parts of the province. The increase was more noticeable in Upper Burma. In Rangoon, Hanthawaddy, Tharrawaddy, Bassein, Henzada, and Myingyan the increase was especially large. The general result of police action in cases investigated by the police was worse than the indifferent result of the previous year, only 53 per cent. of the cases investigated ending in conviction. If public nuisances are excluded, the percentage of convictions to cases investigated is reduced to 47 as compared with 48 in the year 1893. Prome, Salween and Ye-u occupy the highest place in the list, showing the relative success of police working in the several districts. On the whole the police of Rangoon was efficiently administered during the year. The conditions of police work in Rangoon are, however, different from those which prevail in rural districts. A strong committee was therefore appointed towards the close of the year for the purpose of considering whether any change of system or organization was desirable. The report of the committee has lately been received and is under consideration.

Violent crime.

35. There was a large increase of violent crime in Lower Burma. This increase amounted to 273 cases or 41 per cent., the total number of cases during the year being 934. In Upper Burma there were 296 cases of 8 fewer than in the preceding year. In the delta districts of Hanthawaddy (34), Pegu (61), Tharrawaddy (43), Henzada (60), and Shwegyin (25) the increase in the number of cases was conspicuous and crime was of a serious type. In Sandoway, Rangoon, Thôngwa, and Thayetmyo the number of violent crimes was less than in the preceding year. The following table shows the violent crime in Lower Burma and Upper Burma respectively in the last two years:—

Lower Burma.

Crimes.	1893.	1894.
Murder by dacoits	7	18
Murder by robbers	11	16
Murder by poison	2	2
Other murders	148	206
Attempts at murder	12	24
Culpable homicide	46	60
Dacoity	153	223
Preparation and assembly for dacoity	1	7
Robbery with hurt	103	110
Other robberies	165	234
Housebreaking	13	34
Total ...	661	934

Upper Burma.

Crimes.	1893.	1894.
Murder by dacoits	8	7
Murder by robbers	5	7
Murder by poison	1	3
Other murders	54	55
Attempts at murder	3	3
Culpable homicide	5	6
Dacoity	73	57
Preparation and assembly for dacoity	1	3
Robbery with hurt	41	31
Other robberies	100	113
Housebreaking	13	11
Total ...	304	296

Exclusive of ordinary murders, attempts at murder, and culpable homicide, the number of violent crimes in Lower Burma increased from 455 in 1893 to 644 in the past year. There were 99 crimes of this description in Pegu, 85 in Henzada, 64 in Tharrawaddy, 57 in Bassein, 55 each in Thôngwa and Myaungmya, 50 in Hanthawaddy, and 36 in Shwegyin. In Thôngwa alone of the districts above mentioned there was a decrease. In Pegu, Henzada, and Shwegyin the increase was specially marked. In dealing with all classes of violent crime taken together, the districts which show the best percentages of convictions to cases reported are Kyaukpyu (77 per cent.), Rangoon (73 per cent.), Moulmein (66 per cent.), and Prome (65 per cent.). Special efforts were made for the suppression of violent crime in the affected districts. The police force was increased in each of them and instructions were issued to ensure the prompt investigation of cases by qualified officers, the active co-operation of Magistrates with Police officers, and the utilization of all the means of dealing with crime afforded by the Village Act. The attention of District Officers was specially called to the need of enforcing as far as possible the provisions of the Village Act for the defence of villages, and to the expediency of preventing as far as possible the existence of isolated huts and small collections of houses which afford shelter to criminals and are incapable of self-defence. In some cases changes were made in the *personnel* of the District and Police staff. Instructions were also issued for the purpose of effecting improvement in the manner in which police investigations were carried out and prosecutions before Sessions Courts conducted. In the Pegu district, which was out of hand during the early part of the year, the Superintendent of Police, Mr. A. H. Tucker, lost his life while attacking a band of dacoits. This district has since been reduced to order by the energetic action of the Deputy Commissioner, Mr. W. N. Porter, whose efforts have been ably seconded by the Superintendent, Mr. M. J. Chisholm. Most of the persons concerned in Mr. Tucker's murder have been brought to justice. In Thôngwa violent crime was efficiently dealt with by Mr. Snadden and Mr. Durrant and their assistants. The death of the dacoit leader La Ba in the Akyab district while resisting arrest is worthy of record.

In a fair number of cases, especially in Pegu, Hanthawaddy, Bassein, Thôngwa, and Thayetmyo villagers offered strenuous resistance to dacoits and robbers. There can be no doubt that the punishment of villages for failure to resist no less than the prompt reward of villages who offer resistance contributes to render cases of resistance more frequent. The use of firearms in dacoities and robberies was frequent in Hanthawaddy and Pegu and in the Irrawaddy division. Special orders were issued directing a systematic search for concealed arms, but, except in Pegu, the results were not of any importance.

In Upper Burma cases of violent crimes of the more serious kind numbered 232, as compared with 242 in the preceding year. The most noticeable increase was in the four adjacent districts of Magwe, Myingyan, Meiktila, and Yamèthin. The Myingyan district was reported to be in a restless state and the notorious dacoit Nga Cho re-appeared there during the year. Special measures were taken to capture him and the small but troublesome gang which he had collected, and since the close of the year of report Nga Cho and the principal members of his gang have been captured and brought to justice. Although there was a decrease in the number of violent crimes in Mandalay and the Ruby Mines, the number was still abnormally large in each of these districts. For the first five months of the year the Katha district was disturbed by small gangs of dacoits under the leaders Nga Hmat, Kya Yit, and Kya Zi. Thanks to the energy and perseverance of the Deputy Commissioner, Mr. C. A. Soppitt, the district was restored to order in the course of the year and all members of the several gangs were accounted for. The percentage of convictions to cases reported was higher in Katha (85 per cent.) than in any other district in the province. The record of the Pakôkku district is satisfactory, violent crimes having decreased by 50 per cent. and two small gangs having been accounted for. Three cases of attacks on police-stations occurred in the early part of the year in Katha, Sagaing, and Pakôkku respectively. In each case the offenders were promptly dealt with and the arms which were taken in the two former cases were recovered.

Other cognizable crime.

36. There was a large increase of ordinary murders. The numbers were largest in Tharrawaddy (28), Hanthawaddy (25), Prome (22), and Pegu (21). In none of these districts were the percentages of convictions to cases reported even moderately good. In Tharrawaddy the percentage (14) was especially poor. There was an increase in cattle-thefts from 3,340 in 1893 to 3,714 in the year of report. There was a moderate increase in the number and value of stolen cattle recovered. The results of police action were bad or indifferent in all districts except Kyauksè (60 per cent.), Lower Chindwin (56 per cent.), and Prome (54 per cent.). Ordinary thefts increased by 7 per cent. from 12,426 cases in 1893 to 13,321 in 1894. The average value of property stolen was a little over Rs. 49. Less than 50 per cent. of the cases reported were prosecuted to conviction. The percentage of convictions to cases decided was high. The value of stolen property recovered fell from Rs. 2,49,442 (34 per cent.) in 1893 to Rs. 1,74,792 (25 per cent.) in the year under review. In Rangoon 66 per cent. of property stolen was recovered. In excise cases there was an increase and in cases under the Opium Act a decrease. There was a decrease in the number of cases reported under the Gaming Acts.

Preventive measures.

37. There was a very large increase in the number of prosecutions for bad livelihood, the number being 3,909 in 1894 as compared with 2,048 in the previous year. The increase was specially marked in the number of cases taken up by Magistrates without the intervention of the police. The districts in which the number of persons placed on security was largest are Henzada, Tharrawaddy, and Prome. In Rangoon and Mandalay the number of prosecutions was insufficient.

Lower Burma Military Police.

38. The sanctioned strength of military police in Lower Burma remained unaltered during the year. No change was made in its organization and distribution by battalions; but in consequence of the re-organization of the Civil Police certain alterations in the distribution by posts and districts were effected. The only important change was the addition of 100 men to the strength of the Akyab district. The Lower Burma Military Police was almost up to full strength at the end of the year. The number of men who left the police for all causes was much less than in the previous year, desertions having fallen in number from 151 to 46. The decrease in the number of resignations, desertions, and dismissals was entirely in the Karen Battalion. The health of the military police was somewhat better than in 1893. There was an increase in the number of Karens in the Karen Battalion, and proposals have been made for a modification of the system of enlistment and organization in order to secure the enrolment of a larger number of men of that race. The conduct of the military police was on the whole satisfactory. The cost of the Lower Burma Military Police amounted to Rs. 8,70,023 as compared with Rs. 8,02,815 in the previous year.

Upper Burma Military Police.

39. The sanctioned strength of the Upper Burma Military Police at the end of the year of report was 12,091 men as compared with 12,317 at the beginning of the year. The Mandalay Battalion of seven companies was abolished and a reduction of one company in the Southern Division Battalion and of two companies in the Katha Battalion was effected; the Yamèthin Battalion was increased by two companies, and the Northern Chin Hills Battalion of six companies was constituted, the net result being a reduction of two companies. The cost of the force fell from Rs. 41,27,294 in 1893 to Rs. 36,42,084 in 1894. The enlistment of a company of Panthays in the Ruby Mines Battalion was sanctioned and 24 men of this race were enlisted. The Northern Chin Hills Battalion was constituted on 1st November 1894 and took over charge of the posts in the hills before the end of the year. The conduct and discipline of the military police force have been as usual excellent and their behaviour in the field has been admirable. The fact that out of a total strength of over 11,000 men only 41 were punished judicially is a striking testimony to the general good order of the force. The number of departmental punishments decreased from 796 in 1893 to 782 in 1894. The battalions which showed the highest number of departmental punishments were Myitkyina, Bhamo,

and the Ruby Mines. In the last-named battalion Karens were the worst offenders. The health of the military police on the whole was somewhat less satisfactory than in the previous year. But, except in certain districts of the Northern division and in the Northern Shan States, the general health of the men was good. The Military Police were employed on escort duty in the Bhamo district and the Northern Shan States and on a punitive expedition against the Kaswa-Aswa tribe of Chins on the borders of the Upper Chindwin district. Only one active engagement of any note occurred. This was the attack on Mr. Minns' escort near Pansè in the Bhamo district. The police behaved well and the movement which led to the attack was quickly suppressed. In the Ruby Mines district much useful work was done by the Military Police on the borders of the State of Mainglön.

Supply and clothing.

40. The supply of rations to the Upper Burma Military Police was arranged as in previous years by the Department of Police Supply and Clothing. The expenditure incurred by the department was Rs. 10,99,846 and the recoveries on account of rations supplied to the men amounted to Rs. 6,26,285. The net expenditure (deducting the cost of rations supplied for consumption during the present year and adding the cost of rations supplied in 1893-94 for consumption during the year of report) was Rs. 4,10,561 as compared with Rs. 3,98,543 in the preceding year. The increase is due to the unusually high rates paid for labour, for wheat-grinding, and for carriage of rations to inaccessible posts. The amount spent on the carriage of rations, including that of military escorts in the Northern Shan States, was Rs. 38,036 more than in the preceding year. Of this sum Rs. 13,270 was spent on rationing the newly formed Chin Hills Battalion. The value of rations lost or damaged fell to Rs. 16,660 from Rs. 20,800 in 1893. The cost of the establishment was increased by Rs. 215.

Criminal Justice (Lower Burma).

Cases reported.

41. The total number of offences reported in Lower Burma increased during the year from 49,155 to 54,632. The rise was common to all the divisions of Lower Burma except Arakan. In Rangoon there were fewer thefts, but elsewhere there was an increase in the number of offences against property. Cattle-thefts, robberies, and dacoities increased to a substantial extent in every division except Arakan, and the number of cattle-thefts was greater than in 1893 in every district in Lower Burma except Toungoo, Akyab, and Hanthawaddy, where there were slight decreases, and in Sandoway, Northern Arakan, and Tavoy, which showed the same number of offences as in the previous year. In this increase of crime the Pegu district takes the first place, with 722 more offences under Chapter XVII of the Penal Code than in 1893. Offences under special and local laws account for about half the total increase of reported offences. Outside Rangoon 941 cases were declared false or not entered as true as compared with 1,101 in 1893. The number of cases rejected under section 203 of the Code of Criminal Procedure was similarly lower than in 1893, and, as a result, the percentage of true to reported cases rose from 95·95 to 96·78. In Rangoon the number of cases declared to have been false fell from 385 in 1893 to 136 in 1894 and in Akyab from 530 to 117. In Tharrawaddy and Bassein there were increases which were equally remarkable.

Disposal of cases.

42. Corresponding with the increase in the number of cases reported there was a rise of 5,592 in the number of cases brought to trial, the figures being 40,860 and 46,452, and an increase of 3,141 in the number of persons tried. The extra work fell to a large extent on the stipendiary Magistrates, who tried 3,899 more cases than in the preceding year. In the Arakan and Irrawaddy divisions the percentage of convictions was higher than in the preceding year. On the other hand the figures for the Pegu and Tenasserim divisions showed a falling off most noticeably in Tharrawaddy and Shwegyin. The highest percentages were shown by Salween and Mergui and the lowest by Bassein and Hanthawaddy. The percentage for all districts under the Judicial Commissioner increased from 59·94 to 60·64.

The average duration of cases was one day longer than in 1893. For this result the districts of Myaungmya, Prome, Bassein, Amherst, and Shwegyin are chiefly responsible. Toungoo showed a distinct improvement in the matter of despatch, as did Pegu and Hanthawaddy, which had the highest average in the previous year. More than twice as many persons were dealt with under Chapter VIII of the Criminal Procedure Code as in the previous year and the percentage of successful prosecutions increased by nearly 2 per cent.

Sentences.

43. The statistics of sentences show an increase from 28,391 to 29,940 in the total of persons punished outside Rangoon, which corresponds with the increased number of persons brought to trial. In this area there was an increase in sentences of rigorous imprisonment and of whipping. In Rangoon Town the number of whippings fell from 474 to 341. The number of sentences of imprisonment for less than 15 days rose from 609 to 620, and of simple imprisonment from 179 to 193. The total amount of fines imposed outside Rangoon decreased by Rs. 40,346. The number of persons fined also showed a diminution, but not a proportionate one, so that the average fine was less than in the previous year.

Sessions Courts.

44. Cases committed to the Sessions in the interior amounted in all to 517, or 78 more than in 1893. The results of Sessions trials gave 51·23 as the percentage of convictions as against 53·59 of the previous year. The Pegu and Arakan divisions showed some improvement in regard to convictions. Tenasserim continued at the head of the list with 71 per cent., and the Irrawaddy division, Moulmein, and the district of Thayetmyo fell off. Efforts were made during the year to discover the causes of the low percentage of convictions in Sessions Courts and to secure more satisfactory results in the future. There was an increase of 13 days in the duration of Sessions cases. Arakan and the Southern division show a substantial improvement as regards duration, while Moulmein is stationary, and Pegu, Irrawaddy, and Tenasserim have retrograded. The longer duration of cases corresponded with an increase of work in the Courts.

Appeals.

45. The total number of appeals outside Rangoon rose from 3,729 to 5,316 and the increase was common to all the three classes of appellate Courts. A larger proportion, however, were unsuccessful, and the percentage of non-interference rose from 72·32 to 75·78. In the Pegu division 1,522 appeals were made to the Sessions Court against a total of 992 in 1893. The Judicial Commissioner interfered less with the sentences of Sessions Courts than in 1893 and confirmed 32 death sentences out of 59. Two hundred and twenty-three cases were referred under section 438 of the Criminal Procedure Code to the Judicial Commissioner as a High Court. This is 44 more than in the previous year. The Judicial Commissioner enhanced 23 sentences as against 13 in 1893. In revision on his own motion he called for 901 cases, or 62 less than in the preceding year, and in disposing of these cases he interfered with 139 sentences as compared with 243, and reversed only half as many as in 1893. The total number of cases called for by District Magistrates in revision was 3,051.

Criminal Justice (Upper Burma).

Cases reported.

46. In all 16,365 cases were reported in 1894, or 272 more than during the previous year, but the number returned as true (15,383) was less by 69 cases than the total of 1893. The variation of percentages of true cases with regard to districts appears to be due to some extent to differences in the standards adopted by different officers. This inference is borne out by the fact that there is no apparent connection between the number of false cases and the number of prosecutions under Chapter XI of the Penal Code. The district of Myingyan showed the most notable variation. From 15 false cases in 1893 the figure rose to 115. Murders decreased by two and dacoities and cattle-thefts by 23 and 61 respectively. The least satisfactory feature in the record of the year is the increase in the different forms of hurt. There were 26 more cases of grievous and 113 more cases of ordinary hurt than in the previous year.

47. There were seven fewer stipendiary and six more special Magistrates than in the previous year. Twenty-three thousand four hundred and forty-four persons were tried as compared with 22,240 in 1893. There was a rise in the average duration of cases from eight to ten days. This advance was common to nearly all the districts of Upper Burma. The percentage of convictions rose from 60·99 to 64·11. Were compounded cases not reckoned, a rise of over 4 per cent. would have been shown instead of one of over 3 per cent. The question of excluding these cases from the returns came before the Chief Commissioner in 1893, and it was then decided that there were no adequate grounds for excluding them. At Mandalay the Bench of Honorary Magistrates did good and useful work during the year, but the other two Benches, those at Pakôkku and Myingyan, appear to have been insufficiently employed.

Disposal of cases.

48. The number of cases committed to Sessions fell by two, namely, from 87 to 85; but 190 persons were brought to trial against 156 in 1893. Except in the Eastern division, the proportion of convictions to committals sensibly improved and compared favourably with the percentage for Lower Burma. In the Eastern division the percentage fell from 84·21 to 55·56. The result of references to the Court of Session under sections 34 and 123, Criminal Procedure Code, was satisfactory. Including the persons pending from the previous year, 130 persons were referred to Sessions. The number of persons dealt with by District Magistrates under their special powers rose from 193 to 353. The sentences on 111 persons referred under section 34 of the Criminal Procedure Code were confirmed and a reduced sentence was passed on two accused. One hundred and twenty-eight persons were convicted by District Magistrates without reference.

Sessions cases.

49. The number of persons sentenced to whipping decreased and sentences of ten stripes and under showed a further relative fall compared with the total number of sentences of whipping. Rigorous imprisonment was more frequently resorted to both relatively and absolutely, while sentences of simple imprisonment and of imprisonment for short terms decreased relatively. The proportion of cases in which simple imprisonment was inflicted was nearly twice as great as in Lower Burma and is probably too high. Previously convicted persons appear to have been more adequately dealt with than in the past. There was a noticeable fall in the number of imprisonments of 15 days and less and of sentences of fine only passed on this class of offenders.

Sentences.

50. More general advantage has been taken than in previous years of the right of appeal. One thousand and forty-nine appeals were disposed of by Sessions Judges and District Magistrates against 783, the total for 1893, and there were 186 cases in which the accused sought the interference of the Judicial Commissioner, compared with 128 in the previous year. The percentage of confirmation in both classes of appeal has fallen slightly. The statistics regarding revision do not present any remarkable features.

Appeals.

Jails.

51. The closing of the Ye-u jail in May reduced the provincial total of prisons from 30 to 29, but before the end of the year the aggregate of the previous year was restored by the opening of the new prison at Prome. The Prome jail is a fourth-class district jail with accommodation for 167 prisoners.

Number of jails.

52. The actual total of prisoners in confinement at the commencement of the year was 11,826. The number of admissions amounted in all to 30,220 or nearly 5,000 more than in 1893; the discharges reached a total of 28,421, or almost 3,000 more than during the previous twelvemonth, and the year closed with a population of 13,625 as compared with 11,826 in the preceding year. This is the highest figure yet reached in Burma. The daily average number of all classes throughout the year was 12,647. The very marked increase in admissions was common to all classes

General statistics.

of prisoners. The number of convicts proper in confinement at the close of 1894 was 13,206, or 1,723 more than at the commencement of the year, the aggregate of admissions during the period having been 17,988. In the case of convicts the number of releases on expiry of sentence was 1,531, and that of releases on appeal 221 higher than in 1893. Only 13 prisoners were released on account of sickness. Transfers to other jails to undergo sentence fell from 2,751 to 2,083 and transportations beyond sea from 260 to 190. In all 2,680 prisoners were released under the remission rules. Releases on grounds other than those specified above rose from 75 to 119. The decrease in releases of this latter kind which was anticipated last year is not yet apparent.

Judicial.

53. Of the total of 17,988 convicts imprisoned during the year, 16,459 received sentences of rigorous imprisonment or transportation only, 651 were sentenced to simple imprisonment, and 878 were admitted to undergo rigorous imprisonment combined with sentences of solitary confinement or whipping. The figures show an increase under all three classes of convicts. In the case of the first two classes the percentage of increase was practically identical and was clearly marked; under the third class the rise is barely appreciable. Sentences of simple imprisonment rose from 506 to 651. A comparison of the sentences passed during 1894 and the preceding year, classified according to their severity, shows that the increase indicated above occurred for the most part under sentences of five years and less. Sentences of rigorous imprisonment exceeding 10 years were two less than in 1893; and death sentences were less by three. In all other cases of sentences in excess of five years there was a slight rise as compared with the figures of the previous year. The largest increase was under sentences of over three and under six months, which reached in 1894 a total of 4,524 as compared with 3,237 in 1893. Very nearly 20 per cent. of the adult prisoners admitted during the year had been once, if not oftener, previously convicted. In 1893 the total of reconvicted prisoners was slightly in excess of 20 per cent. of the adult admissions. In all 2,265 prisoners are shown in the return as habituals. This is 325 more than the total for 1893, which in its turn was higher than that of the preceding year. In the Moulmein jail 15, in the Bassein jail 18, and in the Thayetmyo jail 12, convicts escaped recognition as habitual offenders before conviction, but the failure to identify habituals in these jails seems in part to have been due to the fact that the prisoners concerned were in police custody till after their trials had been completed.

Discipline.

54. Eight prisoners escaped from the jails of the province during the year. This number excludes six of eight convicts who broke out of the Bhamo jail in December of the year of report, and who were recaptured before they had got any distance from the jail buildings. Five of the eight who effected their escape during 1894 were recaptured during the year. The Bhamo escapes have emphasized the necessity that exists for laying down definite instructions for the guidance of escorts when making over extra-mural gangs to the officials within the precincts of the jail. Effect is being given to the Chief Commissioner's orders in the matter in the new Jail Manual, which is in course of compilation. The total of offences committed by the jail population of the province which were dealt with by Criminal Courts was 37. Of offences other than those dealt with by Criminal Courts, there were in all 39,586 or 8,207 more than in 1893. The increase occurred for the most part under minor punishments and is attributed by the Inspector-General to a large extent to the more general introduction of wheat-grinding, with its concomitant temptation of petty thefts, as a form of labour in the jails of the province. Penal diet was ordered in 7,499 cases as compared with 6,535 in 1893, the number of cases in which hand-cuffs and link-fetters were imposed rose from 77 to 1,772 and there was an increase of 4,609 under the head of "Other punishments." The number of warnings was lower than in 1893.

Financial.

55. The total expenditure incurred during the year in guarding and maintaining the provincial jail population was Rs. 8,27,891, or Rs. 32,301 lower than in 1893. This general reduction, coupled with an appreciable increase in the number of prisoners

in confinement, had the result of bringing the average cost per prisoner down from Rs. 73 to Rs. 65, a figure lower than any reached during the preceding seven years. In round numbers, rations were Rs. 21,000 cheaper than in 1893, hospital charges declined to the extent of Rs. 10,000, and clothing and contingencies were less by Rs. 6,000 and Rs. 2,000 than in the previous year. The only head under which there was an increase of cost was "Establishment." This enhanced expenditure resulted from the revision of the subordinate jail staff, which had effect from the commencement of the financial year 1894-95. The rates for rations varied from Rs. 65 per annum per head in the Kindat jail to Rs. 20 per annum per head in the Pakôkku jail. The decrease in hospital charges is accounted for mainly by a diminution in the expenditure on medicines. The net earnings of the prisoners employed on jail manufactures reached a total of Rs. 4,83,126, which is rather over a lakh and a quarter of rupees more than in 1893. A large proportion of this increase is to be attributed to the Rangoon jail, where, owing mainly to enhanced receipts from the Jail Press, the profits from manufactures rose from Rs. 2,24,842 to Rs. 3,50,705. The jails at Insein and Moulmein show large and satisfactory increases under this head. There were large decreases at Mandalay, Henzada, Tavoy, and Shwebo, but in many cases the diminution was more apparent than real. Profits in the Thayetmyo jail fell from Rs. 8,868 to Rs. 5,102. The total value of vegetables grown in jail gardens during the year was Rs. 47,917. This is lower than in 1893, the decrease being due mainly to a reduction in the outturn from the Rangoon jail garden. The net cost to Government of the prisoners confined during 1894 was Rs. 3,43,765, and the average net cost per head was Rs. 27, or Rs. 16 less than in the previous year.

Accommodation.

56. There was on the 31st December 1894 accommodation for 15,279 prisoners in the jails of the province. The increase on the previous year's total, which amounted to 203, was mainly due to the opening of the Prome jail. The above total is inclusive of the "reserve" accommodation provided.

Health statistics.

57. Three hundred and sixty-four prisoners, including 18 under trial, died during the year as compared with 290 in 1893. This gave an average of 29 per mille on the average population of the jails of the province. Deaths from fever declined from 26 to 21, but the mortality from bowel-complaints and cholera was higher than in 1893, deaths from cholera having risen from 18 to 46 and those from bowel-complaints from 68 to 94. The mortality from cholera was heaviest in the Mandalay jail, which was visited by an epidemic during the latter portion of the rainy season and lost a total of 19 prisoners. In Akyab 11 and in Kyaukpyu 9 prisoners succumbed to this disease. There were no cases of, or deaths from, small-pox during the year. In spite of the fact that the death-rate was higher than in 1893, the ratios of admission into hospital and of daily average sick were lower, and, on the whole, the year may be said to have been a fairly healthy one for the prisoners. The rate of admission to hospital was highest in Rangoon. The report on the water-supply of the jails of the province is on the whole satisfactory. The water of the lake at Meiktila is more wholesome than it has been in the past, and steps are now being taken which it is hoped will have the result of improving the quality of the water of the Mandalay moat, from which the jail supply is drawn.

Juvenile prisoners.

58. There were 18 admissions into the Paungdè Reformatory School during 1894. Nineteen boys were released during the year and three were sent from the Reformatory to jail. No escape occurred, and the one juvenile who effected his escape during 1893 was captured during the year and again confined in the Reformatory. Discipline and health have, on the whole, both been satisfactory. The net cost of maintenance per head was slightly over a rupee lower than in the previous year. Good progress was made during the year in the construction of the Reformatory at Insein. The number of juvenile prisoners admitted into jail was 143.

Miscellāneous.

59. Of the prisoners admitted into the jails of the province 2,725 confessed to having been opium-smokers before conviction. The percentage is rather lower than in the previous year.

Civil Justice (Lower Burma).

Amount and classification of litigation.

60. The total number of civil suits instituted was 42,408 or 2,426 more than in 1893 and 479 more than in 1892. The increase was fairly evenly distributed through the province. In the Court of the Recorder the total fell from 280 to 240, but in the Court of Small Causes, Rangoon, it rose from 6,438 to 7,013, and outside Rangoon the number of suits instituted was 35,155 as compared with 33,264 in the preceding year. The increase in institutions in the Arakan division amounted to 298, in the Pegu division to 462. In the Irrawaddy and Tenasserim divisions the aggregate of suits was 697 and 261 respectively higher than in 1893. In the Thayetmyo district 173 more suits were instituted than in the previous year. In Kyaukpyu, Tharrawaddy, Prome, Shwegyin, Toungoo, and Mergui, on the other hand, there was a decrease in litigation. The value of original suits instituted in Lower Burma rose from Rs. 56,18,969 to Rs. 74,42,488 during the year. The Courts outside Rangoon showed an increase in value on the figures of the previous year, which amounted to Rs. 14,50,204. In Moulmein there was a slight revival of litigation. The number of suits instituted and their total value were somewhat higher than in the previous year.

Disposal of business.

61. Of the total of 44,563 cases before the Courts of Lower Burma during the year, 13,021 were contested and 28,611 uncontested or disposed of without trial. Outside Rangoon 11,456 cases or 33 per cent. only of the cases brought before civil tribunals were decided after contest. The proportion of contested to uncontested cases was higher, but only slightly higher than in the previous year. Of the contested cases 8,129 were decreed for the plaintiff and 3,327 for the defendants in the Courts in the interior, and 1,146 for the plaintiff and 419 for the defendants in the Courts in Rangoon. In the mofussil the percentage of cases in which judgment has been given in favour of the plaintiff has been increasing steadily during the past five years, and that of cases in which the defendant has won has been in consequence as steadily decreasing. In 1890 the proportion was 54 to 40, in 1893 58 to 35, in 1894 it was 60 to 32. The duration of suits, both contested and uncontested, was higher than in 1893. In the latter year the average of contested cases was 28 days and of uncontested 19; in the year of report the figures were 34 and 21 days respectively. In the Recorder's Court the average duration of contested cases rose from 144 days to 255 and in the Small Cause Court from 30 to 51. The large increase was due to a few cases of an exceptional nature, one of which was delayed, pending the publication of the result of an appeal to the Madras High Court, for over two years.

Execution of decrees.

62. Applications for execution of decrees numbered 18,233 as compared with 15,155 in 1893, and the total amount realized in execution was Rs. 10,41,656 or Rs. 1,13,095 more than in 1893. At the close of the year there were 1,558 applications pending, 75 of which had been undisposed of more than three months before the close of the year. This is nearly 400 more than were pending on the 1st January. Cases in which the judgment-creditor was imprisoned were 72 more in number than in the previous year, and the total of cases in which arrest was resorted to, but the judgment-debtor was released without imprisonment, was 11 higher than in 1893. Recourse was had to imprisonment in a particularly large number of cases in the Thôngwa and Henzada districts. The proportion of applications that were wholly infructuous, and of those in which satisfaction was obtained in full, was practically the same as in the previous year.

Appeals.

63. The total number of regular appeals fell from 2,084 to 1,862, the diminution being common both to Rangoon and the Courts under the control of the Judicial Commissioner. In all 1,421 appeals came up for disposal by District Judges as compared with 1,495 in the previous year, and Commissioners had only 22 cases to deal with in appeal against 34 in 1893. Second appeals fell from 287 to 200 and revisions in the Courts at the headquarters of Government from 106 to 103. In Akyab, Sandoway, Tharrawaddy, Thayetmyo, Amherst, and Tavoy more appeals were presented to Deputy Commissioners than in 1893, but in no case was the increase

more than 20, whereas in Kyaukpyu and Henzada the decrease was in excess of that amount. There were still larger decreases in Bassein and Thôngwa, but they were to a great extent due to the formation of the Myaungmya district. In all, the decisions in 984 appeals were confirmed by District Courts, the percentage of confirmations (64) being the same as in the previous year. One hundred and fifty-five appeals were presented in the Judicial Commissioner's Court, and in 91 cases the orders were confirmed.

Cost of litigation.

64. The aggregate cost of original cases in Lower Burma was Rs. 8,28,977, or Rs. 1,38,307 more than in the preceding year, and constituted 12·52 per cent. of the total value of the cases. The percentage of cost in appeals was 12·69 and in applications for execution 1·50. Outside Rangoon there was an increase of 29,308 in the number of civil processes issued, and the receipts from processes were enhanced to the extent of Rs. 11,543. The net financial result of the rules regulating the fees chargeable for serving processes and the remuneration of process-servers is a profit of Rs. 51,789, as compared with Rs. 43,424 in the previous year.

Civil Justice (Upper Burma).

Amount and classification of litigation.

65. The total number of suits instituted, which had fallen in the previous year, rose during the year from 10,329 to 11,493. The increase in civil work was highest in the Southern and Eastern divisions, but the growth in the number of institutions was noticeable, though to a less extent, in the Northern and Central divisions also. The number of suits relating to landed property fell from 1,241 to 993, the total of 1893 having been in its turn lower than that of the preceding year. The fact that many claims have already been disposed of, the restrictions placed upon would-be litigants by the provisions regarding limitation, the enhanced difficulty of proving title to immoveable property, and the extension of settlement operations, are all believed to have operated to bring about this result. The aggregate value of suits instituted during the year was Rs. 14,46,773 as compared with Rs. 15,93,599 in 1893, but excluding a speculative suit instituted during the latter year for a sum very little short of five lakhs of rupees, there was an actual increase in value. The average value of suits was Rs. 126.

Disposal of business.

66. In all 4,274 of the 12,047 cases which came before the Courts during the year were contested, and in 3,087 of the contested cases judgment was given for the plaintiff. The number of contested cases decided in favour of the defendant was 1,187, or one less than in 1893, and the percentage of cases in which the plaintiff was successful to the total number of contested cases was 72 as compared with 71 in the preceding year. The number of cases disposed of was 11,591, and the total remaining pending at the close of the year was 456. The average duration of contested and uncontested suits was 29 and 20 days respectively as compared with 25 and 19 days in 1893.

Execution of decrees.

67. Applications for execution of decrees numbered 2,953 as compared with 2,375 in 1893 and the total of decrees wholly satisfied rose from 1,185 to 1,431. In all 2,676 applications were disposed of and the number of pending cases rose from 227 to 277. On only one occasion was imprisonment resorted to to enforce payment of debt.

Appeals.

68. Deputy Commissioners disposed during the year of 641 appeals as compared with 545 in the previous year. The average duration of appeals in Deputy Commissioners Courts (43 days) was the same as in the preceding year. Revisions disposed of numbered 397 or 12 less than in 1893, and the average duration of applications for revision rose from 29 days to 32. In all, 669 of the 1,100 decrees in respect of which appeals and applications for revision were presented were confirmed, 105 were modified and 263 were reversed. Appeals and applications for revision preferred to Commissioners' Courts numbered 55, of which 51 cases, with an average duration of 39 days, were disposed of during the year. The increase in the total of appeals to Commissioners is very marked. The bulk of the appellate work of Commissioners was performed by the Commissioner of the Southern Division, who passed orders in 46 of the 51 cases disposed of.

The number of regular appeals heard by the Judicial Commissioner fell from 43 to 26. Miscellaneous applications numbered 57 against 49 in the previous year, and applications for revision disposed of were 229 as compared with 255 in 1893. In both classes of cases the percentage of confirmations was higher than in the previous year.

Cost of litigation.

69. The percentage of total cost to the total value of original suits rose from 9·39 to 12·40. Though the total for the whole of Upper Burma was higher than in 1893; the highest figure reached in any particular district (17·35) was below that of the Mandalay district in the previous year. The total charges in connection with the service of processes, including the salaries of process-servers, contingencies, and other expenses, were Rs. 12,345 as compared with Rs. 14,368 in 1893. The decrease was more apparent than real. Measures were taken during the year to substitute permanent process-serving establishments for the establishments sanctioned tentatively in the past for the districts of Upper Burma.

Registration.

Lower Burma.

70. A sub-registry office was opened at Kyaunggôn in the Bassein district, and, as no offices were closed during the year, the creation of the new office raised the total of registration offices in Lower Burma to 121. The total number of registrations was 16,493, or 16 less than in 1893-94 according to the revised figures for that year. Of this total 13,546 were compulsory and 2,947 optional. The number of compulsory registrations was lower than in the previous year, but there was an increase in the number of optional registrations. In the Arakan division both optional and compulsory registrations were more numerous than in 1893-94. There has been a general tendency during the past few years in this division towards increase in the number of documents presented for registration, and there can be no doubt that registration has gained a firmer hold in this than in any other portion of the province. In the Pegu division the districts of Tharrawaddy and Rangoon Town showed marked increases in registration. In Tharrawaddy the rise was higher than in any other district of Lower Burma. The growth in registration business in this district is attributed to the execution of an unusually large number of fishery security bonds and leases of house-sites; in Rangoon it is ascribed to the sale of town lots. There was a small increase in the Prome district and a substantial diminution in Hanthawaddy and Pegu, which was due to the fall in the value of land in those two districts. The Thôngwa district showed the largest decrease of any in registration transactions; land-jobbing is assigned as a cause for the fluctuations in this district, in which the decrease of registration more than balanced the increase apparent in the other districts of the Irrawaddy division. Trade depression in Thayetmyo in the Southern division is said to have operated in reducing the total of registration transactions in that district. In the Tenasserim division there were increases in Amherst and Tavoy and decreases in Salween, Shwegyin, Mergui, and Toungoo. In Amherst, where more use was made of the outlying registration offices, and less of the offices at the district headquarters, the growth in registration work was normal. In Tavoy the increase in the number of compulsory registrations is said to have been due partly to trade depression and the consequent growth in indebtedness, partly to a fuller realization by the people of the consequence of the failure to register documents the registration of which is required by law. In Mergui exceptional causes operated to reduce the total of registrations. The total number of documents affecting immoveable property registered was 14,199, as compared with 14,426 in 1893-94, but although the number of registrations was less, the total value of the property affected (Rs. 2,26,96,927) was Rs. 66,09,619 higher than in that year. Registrations affecting moveable property amounted in all to 2,246 against 2,048 in the preceding year, and the value of the property to which the documents registered related rose from Rs. 20,56,210 to Rs. 28,00,254. It is believed that the rise in the value of immoveable property which the above figures appear to indicate is more apparent than real, and is attributable, as in the previous year, to the unwillingness of the Chetty mortgagees to enter into possession of land which they know they can neither cultivate themselves nor get cultivated for them.

71. There was no alteration during the year in the number of offices (20) open in Upper Burma. The total number of registrations affecting immoveable property rose from 2,513 to 2,874 and the total value of the property affected from Rs. 9,32,720 to Rs. 11,13,336. Sales and mortgages of immoveable property registered increased from 1,716 to 2,073. The majority of these dealt with property of a value of Rs. 300 or less, the large proportion of these petty transfers being due to the ever-growing Native Indian element in the larger and busier towns of Upper Burma. As in the previous year, there was an exceptionally large number of registration transactions at Yenangyaung, the headquarters of the earth-oil industry. The total of sales and mortgages registered at Yenangyaung was 285 in all, and gifts of immoveable property there numbered 44, or the same as the total for the whole of Upper Burma during the previous year. Agreements registered fell from 753 in the previous year to 704. The cost of the registration establishment was Rs. 2,958, and Rs. 5,230 were realized from fees during the year.

Upper Burma.

Municipal Administration.

Rangoon.

72. The gross receipts of the Rangoon Municipal Fund during the year were Rs. 21,22,570, as compared with Rs. 30,18,534 in 1893-94. The decrease occurred under the head of extraordinary revenue and receipts. There was nothing corresponding to the abnormal items of Rs. 7,10,000 and Rs. 2,00,000, which represented the amount borrowed during 1893-94 for the high-level water-works and the reclamation of Block J. Leaving these two loans out of consideration, there was no very marked difference between the figures for the two years. Ordinary receipts rose from Rs. 13,97,566 to Rs. 14,51,392. Excluding the debt accounts of the water and scavenging tax funds and the receipts from the sale-proceeds of town lands, the figures show an increase of Rs. 54,274. There was a diminution of Rs. 649 under the head of Police, which was due to smaller receipts from fines under Act V of 1861 than in the previous year, and a fall of Rs. 13,387 under the head "Miscellaneous," which was occasioned mainly by the large reduction effected in the contribution from the Land Sale and Rent Fund, but under all other heads there were visible, and in some cases substantial, increases. The enhancement of the rate of the general tax was the main factor which operated to swell the receipts from "Assessed taxes," though, as this tax is now collected quarterly instead of half-yearly, there would, despite this enhancement, have been a fall had not the rental value of the property assessed also increased. The forfeiture by the street-watering contractor of his deposit money and the credit to the Municipal Fund of an exceptional quantity of unclaimed wages of Public Works coolies and others were two abnormal items of receipt which raised the income under the head of "Civil works" above the figures of 1893-94. The actual receipts from the scavenging tax were Rs. 1,86,916, as compared with Rs. 1,49,035 in the previous year, the rise being due to the enhancement of the rate in the greater part of the town from 4 and 3 per cent. to 7 and 4 per cent. The ordinary expenditure of the year amounted to Rs. 14,68,178 or Rs. 82,427 more than in 1893-94, but the total charges, including the items of both ordinary and extraordinary expenditure, aggregated Rs. 24,16,690, or Rs. 1,34,915 less than in the preceding year. Increased expenditure on account of the salaries of the clerical establishment and enhanced audit charges were mainly responsible for the rise in the cost of general administration. Medical expenditure showed an increase of Rs. 12,726, which was largely caused by the greater popularity of the General Hospital, as evidenced by an increase in the number of patients, and by the fall in exchange, which raised the cost of English medicines. The rise of Rs. 28,544 in the expenditure in respect of Scientific and other Minor Departments was due to enhanced expenditure on the public gardens of the town and on day conservancy. The actuals of 1893-94 under the head "Scavenging-tax Fund" were exceeded by Rs. 29,600 in consequence of the total cost of working the compressor station being debited to the fund for a considerable portion of the year and of the general extension of night conservancy. The only two heads under which the decrease on the figures of the previous year

Rangoon.

was at all large were "Education" and "Civil works." The diminution under the first head was apparent only; the saving on civil works was effected by a decrease in the expenditure on roads. The total amount spent on repairs to roads, drains, and bridges during the year was Rs. 1,38,886. The sums spent during 1893-94 and 1894-95 on the high-level water-supply scheme were Rs. 5,13,792 and Rs. 2,06,737, that is to say, a total of Rs. 7,20,529 in all. In all a sum of Rs. 3,86,070 was spent in connection with the work of reclamation, of which Rs. 1,48,846 were actually devoted to reclamation itself, the balance being spent on the purchase of rolling-stock, &c., for the earth railway and incidental charges. A revised system for payment of commission to the tax-collecting thugyis was introduced with effect from the 1st January 1895. No fresh loans were contracted during the year. The total amount repaid on loans of previous years was Rs. 81,488, and at the close of the year the outstanding municipal debt was Rs. 41,44,856 or Rs. 81,488 less than at the end of 1893-94.

Water-supply.

73. The Special Committee appointed to enquire into the question of improving the water-supply of Rangoon have on the whole pronounced favourably on the merits of the high-pressure water-supply. Final orders have not yet been passed in regard to the Hlawga water-supply scheme, nor indeed can such orders be passed till ways and means have been fully considered and the capacity of the Committee to repay any loan that they may have to take up for the carrying out of the project conclusively proved. Meanwhile orders have been issued for the completion of the tube-well experiments in the town.

Sewage system.

74. The Shone sewage system is said to have worked satisfactorily during the year. The number of houses connected during 1894-95 was 559, as compared with 425 in the previous year. The report of the Committee appointed to enquire into the question of the disposal of the town rubbish was submitted towards the close of 1894.

Medical.

75. The attendance at the General Hospital during 1894 was satisfactory. In all 58,306 patients were treated, as compared with 51,021 in 1893. Of these 7,241 were in-door patients and 51,065 out-door. As in the previous year, there has been a marked increase in the attendance of Burmans, especially among the out-door patients. Mussulmans, too, have availed themselves more freely of out-door relief than in the past, but there was a notable falling off in the attendance of Hindus.

Vital statistics.

76. More careful registration was the main factor in the enhancement of the birth-rate, which rose from 15·91 in 1893 to 17·20 in 1894. The rate still varies considerably from quarter to quarter, and it would seem that the presence of a large Native Indian community, who in many cases occupy rooms in the upper stories of large tenements and often resent what they consider an uncalled for intrusion into their domestic affairs, renders the work of birth registration in Rangoon a specially arduous and disagreeable one. The death-rate rose during the year from 32·41 per mille to 35·79. The increase can only be assigned to the exceptional unhealthiness of the season, for deaths are always far more regularly recorded than births, and no appreciable increase on account of improved registration is to be looked for.

Miscellaneous.

77. The local audit rules, which have been specially modified to suit the special circumstances of Rangoon, have resulted in an economy of time and have worked smoothly. The provisions of the new Rangoon Municipal Bill were subjected during the year to a further detailed criticism, and the Bill is now being finally considered by the Chief Commissioner. By an amendment of section 41 of Act XVII of 1884, which was enacted during the year, power was taken to levy the general municipal tax up to a limit of 10 per cent. on property within municipal limits instead of, as hitherto, 5 per cent.

Other Municipalities.

Number of municipalities.

78. Exclusive of Rangoon the number of municipalities in Burma was 41, as compared with 39 in 1893-94. The new municipalities were those of Letpadan and Gyobingauk, two

of the largest towns in the Tharrawaddy district of the Pegu division, both of which had been till their constitution as municipalities administered by town committees. Twenty-six of the municipalities were constituted under the Lower Burma Municipal Act (XVII of 1884) and 15 under the Upper Burma Municipal Regulation (V of 1887).

Population and rate-payers.

79. There was no such variation in the proportion of rate-payers to population as was apparent in the figures for 1893-94. The greater uniformity in this particular appears to be due to a large extent to more correct figures. In the year of report the number of rate-payers in the municipality of Shwebo is shown as 1,029 as compared with 93 in 1893-94, and, as a consequence, the percentage of rate-payers to population is now given as 10·98. For 1894-95 the highest percentage is returned by Henzada Municipality (42·40) and the lowest by Thatôn (7·91). The largest municipality, reckoned by its population, was Mandalay, and the smallest, as judged of by the same criterion, the new municipality of Letpadan, which numbers only 2,151 inhabitants.

Elections.

80. The elective system is in force in 11 of the municipalities of Lower Burma. There were eight general elections in 1894, namely, those at Akyab, Kyaukpyu, Sandoway, Pegu, Paungdè, Bassein, Moulmein, and Toungoo. No particular interest was evinced in the issue of the elections. As in previous years, the principal civil executive officer at the headquarters of the municipality was elected president of the committee, except in the case of some of the smaller Upper Burma municipalities not at district headquarters, where the Deputy Commissioner is president and the Subdivisional or Township Officer, as the case may be, is vice-president. Proposals were made during the year for introducing the elective system into the town of Mandalay.

Constitution of committees.

81. In the following table is shown the constitution of municipal committees in each division in Upper and Lower Burma:—

Division.	Number of members.				Race.		Occupation or profession.							
	Ex officio.	Nominated.	Elected.	Total.	Europeans.	Natives.	Government servants.	Merchants and traders.	Lawyers.	Medical practitioners.	Schoolmasters.	Government pensioners.	Priests.	Unspecified.
Arakan ...	9	21	19	49	13	36	11	18	8	1	...	7	...	4
Pegu ...	12	20	29	61	11	50	16	32	7	1	...	1	1	3
Irrawaddy ...	21	56	29	106	19	87	27	62	12	...	1	...	1	3
Tenasserim ...	25	41	24	90	28	62	30	46	2	1	1	7	1	2
Northern ...	18	21	...	39	16	23	22	15	2	...	...	...	...	...
Central ...	13	22	...	35	12	23	15	18	...	...	...	...	...	2
Southern ...	20	44	...	64	18	46	31	29	2	1	...	1	...	...
Eastern ...	22	35	...	57	19	38	28	23	5	...	...	1	...	...
Total ...	140	260	101	501	136	365	180	243	38	4	2	17	3	14
Percentage on total	27·9	51·9	20·2	...	27·1	72·9	35·9	48·5	7·6	0·8	0·4	3·4	0·6	2·8

The percentage of *ex-officio* members is rather lower than in 1893-94, when it was 29·1. Similarly, the proportion of Europeans has fallen slightly.

Attendance at meetings.

82. The number of meetings held was generally higher than in the previous year. The smallest number (11) was held by the municipal committees at Thatôn and Kyauksè. The Salin, Yamèthin, Pyinmana, and Pagan committees held one more meeting each during the year than the two first-named committees. On the other hand, at Moulmein and Myingyan the committee met 44 and at Pakôkku 37 times. The percentage of attendance of members at each meeting was highest at Zalun (88·09) and Letpadan (86·4). At four other municipalities, namely, those at Gyobingauk, Myaungmya, Henzada, and Ye-u the attendance was in excess of 75 per cent. of the total number of members.

Assessments.

83. No revision of assessments appears to have been undertaken during the year in any of the municipalities of Lower and Upper Burma. The post tax continues to be levied in 16 municipalities, in all but one of which the rate is the maximum fixed by section 41 of the Municipal Act. The exception is Myaungmya, where the tax is levied at half the maximum rate.

Incidence of taxation.

84. In Lower Burma the incidence of municipal taxation upon the municipal population was Rs. 1-1-4 and in Upper Burma As. 13-5, as compared with Rs. 1-0-3 in Lower and As. 12-5 in Upper Burma in the previous year. It was highest in the following municipalities :—

	Rs.	A.	P.
Moulmein	1	15	3
Bassein	1	11	5
Prome	1	6	6
Akyab	1	6	3
Toungoo	1	2	9

and lowest in the municipalities of—

	Rs.	A.	P.
Shwebo	0	2	6
Ye-u	0	3	8
Taungdwingyi	0	4	1
Myaungmya	0	4	3

In none of the municipalities of Upper Burma did the incidence exceed Re. 1 per head of population.

Fresh imposts levied.

85. In July 1894 the Moulmein Municipality imposed a tax payable at rates varying from Rs. 8 to Rs. 12 per annum on carriages and carts kept within municipal limits and at the same time directed the levy of a toll of 2 annas on every cart entering the municipality. Both the tax and the toll took effect from the 1st January 1895. A scavenging tax, leviable half-yearly at the rate of 2 pies per square foot per annum, was imposed with effect from the 1st October 1894 on lands covered by buildings situated in certain parts of the town of Akyab in supersession of a tax imposed in 1892, and from the 1st January 1895 a similar tax, payable at the rate of 2 annas per mensem on each house situated within municipal limits and served by the municipal conservancy establishment, was levied in Tavoy. The imposition of a tax on all households resident within the limits of the Shwebo Municipality at the rate of 10 per cent. of the thathameda assessment was sanctioned in November 1894, and in May of the same year the Minbu Municipal Committee imposed a conservancy tax at the rate of 4 annas per cent. per annum on the value of certain dwellings within municipal limits.

Extension of special sections.

86. Section 75 (*a*) of Act XVII of 1884, by which committees are empowered to make general rules in connection with the building of houses, was extended to Akyab in May 1894.

Income and expenditure.

87. In the following table the opening balances, income, expenditure, and closing balances of the municipalities in each division for the year 1894-95 are compared with those of the preceding year :—

1	2		3		4		5		6	
Division.	Opening balance.		Income during the year.		Total fund available for expenditure.		Total expenditure.		Closing balance.	
	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Arakan	27,506	14,216	1,08,561	1,34,300	1,36,067	1,48,516	1,21,851	1,26,384	14,216	22,132
Pegu	67,243	56,860	2,16,398	2,24,712	2,83,641	2,81,572	2,38,937	2,18,261	44,704	63,311
Irrawaddy	1,32,799	1,10,052	3,62,004	2,76,916	4,94,803	3,86,968	3,84,751	3,03,491	1,10,052	83,477
Tenasserim ...	97,825	80,106	2,77,833	2,96,279	3,75,658	3,76,385	2,95,552	3,01,811	80,106	74,574
Northern	1,08,527	1,50,069	4,90,446	5,16,472	5,98,973	6,66,541	4,48,904	5,29,003	1,50,069	1,37,538
Central	7,816	10,588	41,431	46,078	49,247	56,666	38,659	39,285	10,588	17,381
Southern	55,402	57,106	1,17,581	1,19,331	1,72,983	1,76,437	1,15,877	1,11,055	57,106	65,382
Eastern	45,804	39,837	1,10,380	1,19,582	1,56,184	1,59,419	1,16,347	1,18,561	39,837	40,858
Total ...	5,42,922	5,18,834	17,24,634	17,33,670	22,67,556	22,52,504	17,60,878	17,47,851	5,06,678	5,04,653

88. The total income of the municipalites of Burma, exclusive of Rangoon, was Rs. 17,33,671, as compared with Rs. 17,24,634 in 1893-94. This is, however, inclusive of extraordinary and debt accounts. Exclusive of these, the figures for the two years were in 1893-94 Rs. 16,18,190 and in 1894-95 Rs. 16,86,049, or more than Rs. 67,000 higher. There were decreases under the following heads of income :—

Income.

Water rate.	Grants and contributions.
Lighting rate.	Miscellaneous.

Under the other heads of revenue there were increases, which in the case of "Revenue derived from municipal property and powers apart from taxation," "Tolls on roads and ferries," and "Scavenging rate," were appreciable. The receipts from municipal rates and taxes of all kinds amounted in the aggregate to Rs. 6,12,924, as compared with Rs. 5,75,587 in 1893-94.

89. The tax on houses and lands realized in all Rs. 4,31,093, or Rs. 6,095 more than in the preceding year. The figures of the year of report in Lower Burma present, when compared with those of the preceding year under this head of income, no features of special importance. It is in Upper Burma that the realizations for the two years differ to the largest extent. The following are a few instances :—

Tax on houses and lands.

	1893-94. Rs.	1894-95. Rs.
Salin	5,886	377
Pyinmana	4,395	10,925
Myingyan	1,406	12,551
Pagan	275	2,600

The variations are not due to any alteration in assessment, but solely to the fact that in one or other of the years referred to the demand for the year was not collected until after the close of the twelve months in respect of which it was due.

90. A total of Rs. 34,067 was realized from the taxation of animals and vehicles, as compared with Rs. 32,560 in 1893-94. The vehicle tax at Myingyan, which in 1893-94 brought in a total of Rs. 661, realized nothing during the year. The receipts from tolls on roads and ferries aggregated Rs. 63,879, the income from this source in 1893-94 having been Rs. 55,199. The increase must in part be attributed to the credit under the head of tolls of sums which in the previous year had been erroneously entered as proceeds of vehicle taxes.

Tax on animals and vehicles and tolls on roads and ferries.

91. Prome continues to be the only municipality in Burma outside Rangoon in which a water-rate is levied. The rate at Prome realized during the year a sum of Rs. 13,154, or Rs. 425 less than in 1893-94. The decrease is attributed to the destruction by fire of a number of houses in respect of which the rate had in previous years been paid.

Water-rate.

92. As in the previous year, a lighting rate was levied in the towns of Pegu, Paungdè, Bassein, Moulmein, Toungoo, and Kyaikto. The total amount realized in these municipalities was Rs. 28,130, as compared with Rs. 28,311 in the previous year. In

Lighting rate.

Paungdè the income under this head rose from Rs. 218 to Rs. 1,176. The rise was due to the fact that the rate had in 1893-94 been collected for a portion of the year only. In Pegu also this was the first year in which the tax was payable in respect of a whole year, but only half of the demand for the year was collected before its close and the realizations were therefore less than was to be expected. The figures for the other municipalities call for no special remark.

Scavenging rate.

93. A scavenging rate was levied in the municipalities of Akyab, Pegu, Ma-ubin, Yandoon, Bassein, Moulmein, and Tavoy. The rise in the receipts from this source of income was even greater than in the previous year. The total for the year was Rs. 41,002 as compared with Rs. 20,940 in 1893-94. For this increase the municipality of Moulmein, where the conservancy tax brought in Rs. 19,436, or Rs. 13,017 more than in 1893-94, was mainly responsible. A determined effort was made during the year by the Moulmein Municipal Committee to realize the outstandings of past years. The outstandings of the tax at the close of the year 1894-95 amounted to Rs. 12,579, but this was the amount payable on account of the calendar year 1895. The receipts from scavenging in Akyab also showed an increase of over Rs. 5,000, which was due to the enhancement of the rate in certain quarters of the town. The scavenging tax was levied for the first time during the year in Pegu and Tavoy.

Revenue drived from municipal property and powers apart from taxation.

94. The total amount realized during the year from municipal property and powers apart from taxation was Rs. 5,29,031 in Lower Burma and in Upper Burma Rs. 4,69,798, or for the whole province Rs. 9,98,829, as compared with Rs. 9,49,016 in 1893-94. As in previous years, the most important sources of income under this head were bazaars and slaughter-houses, which in Lower Burma brought in in the aggregate Rs. 4,60,303 and in Upper Burma Rs. 4,06,313. In Mandalay alone the bazaars and slaughter-houses in the town and the slaughter-house secured to the Municipal fund a revenue of no less than Rs. 2,45,763, of which Rs. 1,81,200 represented the rent of the "Zegyo" bazaar. Next to Mandalay the municipalities which showed the most substantial receipts from the above source were Prome, with a bazaar and slaughter-house revenue aggregating Rs. 63,668, and Bassein, where the income under this head amounted to Rs. 40,718. The figures showing the receipts under the other minor heads of the main head "Revenue derived from municipal property and powers apart from taxation" present no features of importance.

Grants from Provincial and Local funds.

95. In the following table are shown the grants received by municipalities from Provincial and Local funds during 1893-94 and 1894-95 :—

Grants from Provincial and Local Funds.

Municipalities.	1893-94.	1894-95.	For what purposes.
I.—Grants from Provincial Funds.			
(a) *For general purposes.*			
	Rs.	Rs.	
Bassein	1,600(*a*)	1,500	(*a*) For town survey office.
Kyangin	583(*b*)	...	(*b*) Arrears of contribution for 1892-93.
Mandalay	10,373(*c*)	7,000	(*c*) Grants for roads (Rs. 7,000) and quarter share of town survey charges (Rs. 3,773).
(b) *For Medical purposes.*			
Kyaukpyu	600(*d*)	...	(*d*) For the upkeep of Kyaukpyu dispensary.
Mergui	...	1,000	Transferred from District Cess Fund to the Municipal Fund for repairs to hospital.
Toungoo	2,000(*e*)	...	(*e*) For the upkeep of the hospital.
Bhamo	1,000(*f*)	...	(*f*) An Imperial contribution in aid of medical expenditure.
Shwebo	1,000(*f*)	...	
Ye-u	1,000(*f*)	...	
Pakôkku	800(*f*)	...	
Mônywa	800	800(*g*)	(*g*) Ditto ditto ditto.
Minbu	800	800(*g*)	
Kyauksè	500	500	For the maintenance of the civil dispensary and hospital.

Municipalities.	1893-94.	1894-95.	For what purposes.
	I.—GRANTS FROM PROVINCIAL FUNDS—*concluded.*		
	(c) *For Educational purposes.*		
	Rs.	Rs.	
Sandoway	2,074	1,800	For the maintenance of the school.
Sagaing	900(*h*)	126	(*h*) Rs. 750 for building grant, Rs. 150 for equipment grant.
Toungoo	3,000	...	For results grants to Karen schools.
Bassein	5,550	...	Rupees 450 towards the erection of a gymnasium, Rs. 600 towards the pay of the drawing-master, and Rs. 4,500 results grants to Karen schools.
Akyab	3,600	...	Rupees 3,000 for the maintenance of the schools and Rs. 600 towards the pay of the drawing-master.
Henzada	300	...	Towards the pay of the drawing-master.
Prome	5,600	...	Rupees 5,000 for the maintenance of the school and Rs. 600 towards the pay of the drawing-master.
Yandoon	600	...	Towards the pay of the drawing-master.
Pegu	400	...	Ditto ditto.
Kyaukpyu	4,662	...	Rupees 4,250 towards the maintenance of the school and Rs. 412 towards the pay of the drawing-master.
Mergui	1,600	...	Rupees 1,000 for secondary education and Rs. 600 towards the pay of the drawing-master.
Tavoy	3,900	...	Rupees 3,300 for secondary education and Rs. 600 towards the pay of the drawing-master.
Shwegyin	2,400	...	Rupees 1,800 for Anglo-Vernacular education and Rs. 600 towards the pay of the drawing-master.
	II.—GRANTS FROM LOCAL FUNDS.		
	(a) *For general purposes.*		
Akyab	9,440	9,440	Rupees 7,200 from Port Fund, Rs. 2,240 from Land Sale and Rent Fund.
Kyaukpyu	250	250	From Port Fund.
Ma-ubin	5,000	8,000	From District Cess Fund.
Moulmein	1,000	500	From Land Sale and Rent Fund.
	(b) *For Medical purposes.*		
Akyab	3,000(*k*)	...	(*k*) From District Cess Fund for the Akyab General Hospital.
Kyaukpyu	900	...	From District Cess Fund for the Kyaukpyu dispensary.
Pegu	3,000	...	From District Cess Fund for the Pegu dispensary.
Moulmein	1,200(*l*)	...	(*l*) From District Cess Fund for patients from Amherst district.
	(c) *For Educational purposes.*		
Letpadan	...	500	
Akyab	2,500	...	From District Cess Fund towards the maintenance of the High School.
Pegu	2,000	...	Ditto ditto.
Bassein	3,665	...	Ditto ditto.
Shwegyin	700	...	From District Cess Fund for Anglo-Vernacular education.

The greater number of the grants from Provincial funds for medical and educational purposes which had been sanctioned in 1893-94 were discontinued during the year.

Expenditure.

96. Exclusive of Rangoon the total expenditure of the municipalities of Lower Burma was Rs. 9,84,506, as compared with Rs. 10,80,939, and of Upper Burma Rs. 7,63,345, as compared with Rs. 6,79,939 in 1893-94. For Lower Burma the closing balance was Rs. 2,62,000 and for Upper Burma Rs. 2,42,653, the figures for the previous year having been Rs. 2,63,909 and Rs. 2,42,769 respectively. The total outlay on conservancy in Ramree (4·69 per cent. of the total municipal expenditure), in Sandoway (4·21 per cent.), and in Ye-u (6·15 per cent.) was low. One of the features of the returns of the year is the notable diminution in the expenditure of municipalities on markets and slaughter-houses. The total spent on this account during the year was Rs. 1,85,034, as compared with Rs. 3,25,569 in 1893-94.

Office and collection establishment.

97. The total charges for office establishment during the year amounted to Rs. 1,36,203 as compared with Rs. 1,25,360 in 1893-94. In the Pegu division the expenditure under this head was higher and in the Irrawaddy division lower by nearly Rs. 5,000 than in the previous year. In the Northern division the increase amounted to almost Rs. 8,000. The purchase in Mandalay

of a building for the Municipal office was mainly responsible for this rise. In the Eastern division also there was an appreciable increase, but elsewhere the figures call for no special remark. The increase in the Pegu division was due in part to the constitution of the municipalities of Gyobingauk and Letpadan. The municipal committees at Moulmein and Bassein were able to effect reductions under the head of General Administration, but at Mandalay, Minbu, and Myingyan the expenditure increased to a considerable extent.

Expenditure on public safety.

98. In Upper Burma the expenditure on public safety aggregated Rs. 1,63,841 and in Lower Burma Rs. 50,757. This large difference is due to the fact that in Upper Burma the majority of the municipalities bear the cost of the maintenance of the Municipal Police establishment, whereas in Lower Burma this charge is thrown on Provincial revenues. As in previous years, Mandalay was the only municipality which incurred any substantial outlay on measures for the prevention of fire. In Tavoy a sum of Rs. 1,210 was expended in the purchase of two patent metallic fire-engines, which are said to have proved of use in extinguishing fires during the year. A small fire-engine was also purchased at Toungoo. Lighting charges amounted in all to Rs. 46,783 in Lower and Rs. 42,295 in Upper Burma, or in all Rs. 89,078, which is Rs. 16,454 more than in the previous year. In Moulmein the expenditure under this head fell from Rs. 15,821 to Rs. 8,239. The high expenditure of 1893-94 was caused by the clearing off of the debts of the previous year. Street lighting was introduced into Ngathainggyaung-Daunggyi in August 1894 and outlay was for the first time incurred on lamps. The provision of additional lamps at Paungdè and Prome raised the lighting charges in both these municipalities appreciably. The expenditure on street lighting in Mandalay was Rs. 33,401, as compared with Rs. 15,356 in 1893-94. Of this total Rs. 12,765 went in the purchase of new lamps and posts.

Water-supply.

99. As in the previous year, the only two municipalities in which anything was spent on the water-supply were Prome and Mandalay. The expenditure at Prome was Rs. 13,588, or Rs. 4,796 less than in the preceding year; a smaller outlay under the head "Distributing and laying pipes, &c., maintenance and repairs" accounts for this diminution. Nothing was spent during the year in Mandalay on the construction of water-works, but a sum of Rs. 1,202 was devoted to the maintenance of the existing water-supply. All the larger municipalities of the province have turned their attention seriously to the water-supply question. The matter is of considerable importance to the municipal committees of Moulmein, Akyab, and Bassein, all of which are at present dealing with the question.

Drainage.

100. Matters in regard to drainage within municipal limits are practically in the same condition as last year. The Sanitary Engineer, who, it is hoped, will be able to formulate drainage schemes for the more important municipalities, has not yet been appointed. For the present practically all that has been done in the matter is to proceed with the preparation of maps giving full particulars about the levels in the municipal area. A sum of Rs. 232 is shown as having been spent in Sandoway on drainage works.

Conservancy.

101. The gross outlay on municipal conservancy in the province was Rs. 3,21,029, of which Rs. 1,96,531 was spent in Lower and Rs. 1,24,498 in Upper Burma, as compared with Rs. 1,66,017 and Rs. 1,04,211 in 1893-94. In Moulmein Rs. 33,523 were spent, as compared with Rs. 37,348 in 1893-94. The decrease is not a real one, as a large portion of the previous year's expenditure was devoted to the payment of old debts. The conservancy scheme drawn up by the 1892 Committee continued to be carried out throughout the year.

Hospitals and Dispensaries.

102. To medical charges a total of Rs. 1,84,720 was devoted. This is Rs. 7,317 below the amount spent on this object in 1893-94. In Upper Burma there was a steady increase in the Central, Southern, and Eastern divisions, which was, however, almost exactly counterbalanced by a decrease in the Northern division, due

mainly to a fall of Rs. 6,215 in the medical expenditure in Mandalay. The decrease in Mandalay was chiefly attributable to a reduction in the expenditure on works and a diminution in the outlay on medicines from Europe.

In Lower Burma the expenditure on hospitals and dispensaries in the following municipalities for the two years 1893-94 and 1894-95 exhibits striking differences:—

	1893-94. Rs.	1894-95. Rs.
Akyab	15,818	11,333
Moulmein	20,321	12,825
Bassein	10,315	8,312
Myaungmya	48	2,981
Thatôn	3,285	...
Toungoo	13,106	8,796

These variations are, however, in the case of the first three municipalities, due to the fact that various items which were included under this head in the accounts for 1893-94 were excluded from those for 1894-95. As a matter of fact the expenditure on hospitals and dispensaries during the year at Akyab, Moulmein, and Bassein was higher than in 1893-94. In Toungoo the expenditure of 1893-94 included Rs. 2,800 spent on the sanitary survey of the town. The revised figures for Thatôn show nothing for 1894-95 under this head. The contribution of Rs. 2,492 made from the General to the Hospital Fund was shown in the revised returns under the head "Contributions for general purposes."

Vaccination.

103. Vaccination absorbed a total of Rs. 15,465, as compared with Rs. 21,012 in 1893-94. The expenditure under this head is insignificant. As in the previous year, the only municipalities in which any large outlay was incurred were those of Bassein, Moulmein, and Mandalay. In the last-named municipality the cost of vaccination declined from Rs. 8,515 to Rs. 2,846. The expenditure of 1893-94 was, however, abnormal, as a heavy outlay had to be incurred during that year in the construction of vaccination sheds. The Vaccination Act is now in force in all the municipalities of Lower and Upper Burma except Letpadan, Gyobingauk, Kyaikto, and Minbu.

Markets and slaughter-houses.

104. The total amount spent on markets and slaughter-houses was Rs. 1,85,034, or Rs. 1,40,536 less than in the preceding year. The purchase of a bazaar at Yandoon, the cost of constructing markets at Ma-ubin and Myanaung, and the expenditure incurred in Prome in renewing the bazaar, which had been burnt, were all important items in the exceptional expenditure of 1893-94 and contributed towards the marked difference between the figures for the two years. The municipal committee of Paungdè continued to incur somewhat heavy expenditure in the renewal of their market, which had also been destroyed by fire, and the Toungoo committee devoted a sum in excess of Rs. 22,000 to the construction of bazaar buildings; but, with these exceptions, the outlay on markets and slaughter-houses in Lower Burma calls for no special comment. In Upper Burma the Pakôkku Municipality spent a total of Rs. 12,174 on markets and slaughter-houses, and out of this amount were able to spare enough for the construction of one bazaar building and two slaughter-houses. The expenditure under this head in Mandalay amounted to Rs. 17,454, as compared with Rs. 12,196 in 1893-94. The increase occurred partly under the head of "Establishment" and partly under that of "Works." A total of Rs. 9,443 was spent on the construction of a slaughter-house and on repairs to bazaars.

Public works.

105. The aggregate expenditure of the year on public works was in Lower Burma Rs. 2,15,726 and in Upper Burma Rs. 1,80,901, or, in all, Rs. 3,96,626, as compared with Rs. 3,28,070 in 1893-94. The municipalities which were chiefly responsible for the increase were those of Moulmein, Ma-ubin, Zalun, Toungoo, Mandalay, Shwebo, Sagaing, and Yamèthin. The following are the figures for the two years:—

	1893-94. Rs.	1894-95. Rs.
Moulmein	23,008	38,656
Ma-ubin	3,623	8,725
Zalun	8,003	16,881
Toungoo	7,564	15,098
Mandalay	1,06,567	1,32,419

	1893-94. Rs.	1894-95. Rs.
Shwebo	725	2,779
Sagaing	1,480	4,295
Yamèthin	1,146	4,647

In Moulmein the municipal committee, having cleared off their outstanding debts, were able to devote their attention and funds to the important duty of putting the town roads in a state of good repair. They spent during the year Rs. 31,424 on this object and Rs. 2,197 on repairs to bridges and culverts, but in other respects their expenditure on public works was unimportant. The Ma-ubin Municipal Committee made a new road and 19 new culverts at a cost of Rs. 8,285. In Zalun the increase over the figures of the previous year was due to the expenditure on the construction of a bazaar. In Toungoo Rs. 11,325 was spent on repairs to roads, as against Rs. 5,331 in the preceding year, and in Mandalay, Shwebo, Sagaing, and Yamèthin also it was chiefly road construction that caused the rise in the figures for 1894-95. In Bassein Rs. 16,172 were devoted to the maintenance of roads as against Rs. 11,873 in 1893-94. This tendency on the part of municipalities to increase their outlay on the improvement of communications is a satisfactory feature of the reports received. In Upper Burma the lowest expenditure on public works was that incurred by the Mônywa Municipality (Rs. 293). It is explained that, until the marginal protecting bund, for which the municipal committee have been saving their funds for some time past, has been constructed, the periodical flooding of the town will render expenditure on roads and drains a sheer waste of money. The construction of the bund has been taken in hand since the close of the year of report. There is no doubt that it will be a work of quite exceptional utility.

Public Instruction.

106. Under the head of educational charges the expenditure of the year aggregated Rs. 70,052 in Lower and Rs. 9,618 in Upper Burma, as compared with Rs. 81,424 and Rs. 7,690 in 1893-94. In Zalun, Yandoon, Henzada, and Toungoo the municipal assignment on behalf of education was either reduced or entirely withdrawn. The Ramree Municipal Committee made an educational assignment for the first time in 1894-95.

Loans.

107. Two new loans were taken up by municipalities during the year, one of Rs. 20,000 for starting the house-to-house scavenging system in Akyab, the other the first instalment of a loan of Rs. 10,000 sanctioned in order to provide funds for re-shingling the Shwegyin municipal bazaar. The total repaid during the year amounted to Rs. 38,302-9-6.

New Municipal Act.

108. A draft of a new Municipal Bill for Lower Burma and for the town of Mandalay in Upper Burma was submitted to the Government of India shortly after the close of the year. The Bill is not intended to apply to Rangoon, for which a special Bill is in course of preparation.

Town Committees.

109. The number of towns administered by Town funds fell from ten to eight in consequence of the conversion of Gyobingauk and Letpadan into municipalities. Their united revenue amounted Rs. 1,01,859 and their expenditure to Rs. 97,261. The richest Town fund is that of Shwedaung, which had an income of Rs. 32,849, as compared with Rs. 29,446 in 1893-94, and spent Rs. 26,719 or Rs. 5,392 less than in the previous year. The question of constituting Shwedaung a municipality was considered during the year, and it was found that it had not yet arrived at a stage at which it could suitably be administered under Act XVII of 1884. The revenue of the Allanmyo Town fund amounted to Rs. 14,724 and that of the Pantanaw fund to Rs. 11,435. The expenditure of the Allanmyo and Pantanaw funds aggregated Rs. 13,549 and Rs. 10,343, and the Zigôn Town Committee spent Rs. 12,960 during the year. In Thônzè, Shwedaung, Lemyethna and Kawkareik the bazaar receipts were less than in the preceding year. The expenditure of the funds during the year calls for no special remark. The Lemyethna fund spent a more reasonable amount on public works than in 1893-94, and there was an almost universal increase in the cost of administration, but otherwise the figures for the two years present no striking differences.

Military.

Strength and distribution of the troops.

110. At the beginning of the year the total military force of the province was 14,306, of whom 3,832 were Europeans and 10,474 natives. At the end of the year the force consisted of 14,030 men, 4,417 Europeans and 9,613 natives. Their distribution at the beginning and end of the year was as follows:—

	1st April 1894.		1st April 1895.	
	Europeans.	Natives.	Europeans.	Natives.
Rangoon district	1,814	4,036	2,231	3,967
Mandalay district	1,983	3,202	2,160	3,597
Chin Hills Command	35	3,236	26	2,049

Military expenditure.

111. The following statement shows the actual net charges incurred in the several departments during the year 1894-95 on account of troops stationed in Burma and the corresponding charges in 1893-94:—

	1893-94.	1894-95.
	Rs.	Rs.
Pay	62,79,295	67,04,927
Commissariat	34,98,535	27,19,241
Clothing	2,17,078	1,27,877
Medical	2,06,781	1,39,486
Ordnance	27,272	31,329
Total ...	1,02,28,961	97,22,860

Volunteers.

112. The Volunteer force of the province consisted as in the previous year of the Rangoon Port Defence Volunteers, comprising the Rangoon Volunteer Artillery, the Naval Volunteers, and the Engineer Corps, the Moulmein Artillery, the Moulmein Rifles, the Rangoon Rifles, Burma State Railway Rifles, and the Upper Burma Rifles.

The nominal strength of the entire Volunteer force on the 31st March 1894 and 1895 respectively was as follows:—

	1894.	1895.
Adults	2,029	2,092
Cadets	356	428
Total ...	2,385	2,520
Efficient	1,765	2,243
Number of reservists	217	195

The aggregate amount of capitation grant earned during the year was Rs. 60,447 as compared with Rs. 48,834-8-0 in 1893-94.

Commanding Officers.

113. Major-General J. N. Crealock, C.B., held charge of the Burma District Command and Brigadier-General A. F. Hamilton of the Rangoon District Command throughout the year. The Mandalay district was commanded in succession by Brigadier-General G. C. Bird, C.B., and Colonel W. B. Warner. Lieutenant-Colonel S. E. Rolland held charge of the Chin Hills Command throughout the year.

Marine.

Navy and Royal Indian Marine.

114. During the year the port of Rangoon was not visited by any British ships of war. It was visited by the Italian man-of-war *Christofero Colombo* and by the Austro-Hungarian man-of-war the *Fasana*. The Royal Indian Marine vessels *Irrawaddy*, *Sladen*, *Bhamo*, and *Pagan* were employed on transport duty in Upper Burma, and carried 6,911 tons of stores, earning as freight Rs. 4,24,446. The Royal Indian Marine steamer *Minto* did general duty as station vessel at Rangoon throughout the year.

Provincial Marine.

115. The number of launches employed in Lower Burma during the year was 23, or one more than in the previous year. The *Mildred*, the new Akyab launch, arrived in November 1894, and was employed for the rest of the year under the orders of the Deputy Commissioner of Akyab; otherwise the launches plying at the close of the year were the same as those employed at its commencement. The total

amount spent on repairs amounted to Rs. 24,700, or Rs. 3,194 less than in 1893-94. The heaviest expenditure on this account was incurred in respect of the *Sittang*, which was fitted with a new boiler in October 1894, the *Margarita*, which had during the preceding financial year been subjected to a thorough overhaul, the accounts for which were not adjusted till after the commencement of 1894-95, and the *Mudlark*, which was repaired at a cost of Rs. 2,680. Exclusive of flats, the total number of vessels employed in Upper Burma was 28, or one more than in the previous year. The new vessel was the *Tammu*, a horizontal compound surface-condensing stern-wheeler, which arrived in Mandalay in April 1884 and was placed in charge of a European Commander. Her record is not altogether satisfactory. She broke down several times during the year and had to be altered at the Mandalay Workshop at a considerable cost, and even with these alterations and the most favourable conditions she has failed to attain the speed expected. All the transport work was done by Government vessels, and no expenditure was incurred on hired transport as in previous years. The sum of Rs. 40,149 was spent on repairs, as compared with Rs. 27,667 in the previous year. Of this total Rs. 5,306 went to defray the cost of the *Tammu's* alterations. The total earnings of the local vessels aggregated Rs. 5,02,813 against Rs. 4,21,334 in the previous year. The total outlay was Rs. 3,95,617, leaving a net profit of Rs. 1,07,196 to Government. Thirteen wood depôts were maintained during the year, and 17,455 tons of wood valued at Rs. 1,03,914 were issued.

IV.—PRODUCTION AND DISTRIBUTION.

Agriculture (Lower Burma).

The season.

116. The later rains were in most districts lighter than usual and the harvest was not so good as the abundant and timely showers of the earlier portion of the year had led the cultivators to hope. Nevertheless the average outturn was estimated at a 14-anna crop. Henzada, Thayetmyo, and Northern Tharrawaddy had the worst crops, but even in them the average was 12 annas. In Hanthawaddy and Thôngwa there was as usual some considerable damage from floods. In Akyab, Kyaukpyu, and Thayetmyo cholera, and in Pegu, Hanthawaddy, Tharrawaddy, Bassein, Thôngwa, Henzada, Myaungmya, and Amherst cattle-disease, interfered with agricultural operations.

Area of cultivation.

117. The total area cropped in Lower Burma in 1894-95 was 5,545,091 acres. The decrease of 155,516 acres below the cropped area of the previous year was mainly due to cattle-disease, but low prices had also an influence in Hanthawaddy and Pegu. In Akyab there was an increase of 6,916 acres, in Tharrawaddy of 4,531 acres, in Prome of 10,258 acres, in Myaungmya of 10,935 acres, in Toungoo of 2,868 acres. In the Pegu district the decrease was 123,300 acres, in Thôngwa 26,115, in Shwegyin, owing chiefly to erosion by the sea, 9,998 acres. In Tavoy and Mergui the recorded area increased in consequence of the extension of supplementary surveys. Of the total area cropped 5,006,680 acres were occupied by rice and 538,739 acres by other crops against 5,183,456 and 517,475 acres respectively in the preceding year. Changes of classification have caused variations in the areas assigned to particular crops. Thus gram, which in 1893-94 was said to have covered 5,743 acres, is reported to have covered only 488 acres in the year of report, while "Other food-grains" were grown on 28,990 acres against 15,848 in 1893-94; in Akyab "Condiments and spices" are credited with 2,642 acres, while in the previous year no area was assigned to them; an increase from 10,094 to 29,259 acres of the area under cotton is probably due to the transfer in the Thayetmyo district to this head of certain lands formerly shown under miscellaneous non-food crops. The total area under tobacco varied little from that shown in the preceding year, but in Prome there was a considerable decrease owing to the exhaustion of the soil on the islands. A considerable area was shifted from "Orchards and gardens" to "Miscellaneous food crops." Current fallows increased from 433,284 to 725,197 acres.

Cattle.

118. In Amherst, Henzada, Pegu, and Bassein districts the cattle suffered severely from foot-and-mouth disease; rinderpest was prevalent in Bassein, Pegu, Myaungmya, and Hanthawaddy; Akyab, Henzada, Amherst, and Bassein suffered the heaviest losses from anthrax. The total number of registered deaths of cattle was 69,424 against 57,548 in the preceding year, and the value of the deceased animals was estimated at 22½ lakhs of rupees. The year was thus one of exceptional mortality.

Prices.

119. The price of rice rose during the year of report as high as Rs. 112 per hundred baskets. The rice-miller's combination broke up after the end of the previous year and at the close of May Rs. 80 were paid. In July, September, and October Rs. 100 was the ruling rate. Quotations for the new crop began at Rs. 80 and after the first week in January never fell below Rs. 85. On the whole the prices were favourable to those cultivators who had not sold their crops in advance. The price of fish did not rise. Apparently the competition of preserved fish from the Straits Settlements acted unfavourably upon the native industry.

Grazing-grounds.

120. The report of the officer who was appointed to inspect grazing-grounds in Thôngwa showed that considerable encroachments had taken place. The attempt to keep up the supply of fuel as a bye-product of grazing-grounds has been shown to be a failure. Where fuel reserves are necessary they will now be constituted as reserved forests. Such reserves will no doubt be also useful for grazing purposes.

Agriculture (Upper Burma.)

The season.

121. The season was on the whole propitious, but floods in Mandalay, Sagaing, and Kyauksè districts, a hailstorm in the Upper Chindwin, and a drought during August and October in the Southern division, caused local and partial failures of crops. Cattle suffered severely from foot-and-mouth disease in eight districts.

Prices.

122. The statistics of prices still leave much to be desired. Such as they are, they showed a fairly general fall in the prices of paddy and rice owing to the good harvest.

Agricultural experiments.

123. The experiments with wheat and potatoes in the Southern Shan States were brought to a successful conclusion. Arrangements have been made with the Military Commissariat for the purchase of wheat locally grown by Shan cultivators. The market for potatoes is unfortunately very restricted. Mr. Hildebrand continued his experiments with apples, pears, peaches, plums, gooseberries, currants, strawberries, raspberries, and various kinds of nuts and vegetables. A European gardener was engaged to help him. American maize was tried in 20 districts. The results were varying, but the native cultivators have not been led to grow the American variety. The tobacco experiments were all a failure, except one at Pakôkku. In the Chin Hills English vegetables appear to thrive. Seven agricultural shows were held and four were successful in attracting exhibits and spectators.

Veterinary Work.

124. Forty-five Veterinary Assistants were employed, two each in ten important districts, three each in Amherst and Mandalay, and one each in most of the remaining districts. They treated 42,455 animals. The work of registering deaths of cattle was satisfactorily performed by village headmen in Lower Burma. It was decided not to introduce the system into Upper Burma at present. The Veterinary School continued to receive pupils and provide Veterinary Assistants. Four imported stallions and one Shan stallion were used for stud purposes and covered 106 mares. One of the imported stallions died. The donkey stallions were a failure as neither the Burmans nor the Shans liked putting their mares to them. Only seven mares were covered by them.

Rice Trade Statistics.

Rice trade statistics.

125. The following table shows the quantities of rice exported from Lower Burma in each of the past 10 years and during the present year:—

Year.	Exports of rice from Lower Burma to			Total.
	Europe and America.	India, China, and Straits.	Upper Burma.	
	Tons.	Tons.	Tons.	Tons.
1885	694,018	234,820	96,363	1,025,201
1886	66,0711	293,223	77,044	1,030,978
1887	70,9957	243,707	125,177	1,078,841
1888	613,534	162,864	150,668	927,066
1889	708,930	245,129	58,504	1,012,563
1890	749,564	430,079	53,838	1,233,481
1891	852,799	303,423	77,840	1,234,062
1892	824,151	242,367	152,804	1,219,322
1893	778,223	523,453	116,678	1,418,354
1894	729,965	594,504	36,531	1,361,000
1895 (for 10 months)	792,001	414,011	19,202	1,225,214

Weather and Crops.

126. The following statement shows the rainfall in inches in representative districts in Upper and Lower Burma :—

Lower Burma.

District.	January to May.		June to September.		October to December.		Total.

Horticulture.

127. There are two Horticultural Societies in the province, one at Rangoon with 162 members, and the other at Moulmein with 68 members. The majority of the members are Europeans. The Asiatic races do not take much interest in the affairs of these societies, the objects of which they do not fully appreciate, and very few of them have become members. Including grants-in-aid of Rs. 3,600 from Government and the Rangoon Municipality, the income of the Rangoon Society in 1894 was Rs. 15,972, and its expenditure Rs. 15,002. The Society devoted its attention, as in former years, to the introduction and cultivation of exotics from various parts of the world, and it is in a prosperous state. The Tenasserim Society had a credit balance of Rs. 922-14-6 at the close of the year. Its operations are on the same lines as those of the Rangoon Society, but one of its distinguishing features is an annual agricultural show. Towards the expenses of the show of 1894 Government gave a grant of Rs. 460.

Forests (Lower Burma).

General summary of the year's work.

128. At the beginning of the year the area of reserved forests in Lower Burma was 6,374 square miles, to which were added during the year 637 square miles in the Tenasserim and a new area of 44 square miles in the Pegu circle. Fire-protection was attempted over 615·28 square miles, and it was effective in the

case of 549·5 square miles. The area of taungya teak plantations increased from 31,653 acres to 35,558 acres The number of teak trees girdled was 19,073. The quantity of teak extracted from the forests by both departmental agency and private purchasers was 52,781 tons against 67,605 tons in 1893-94. The gross revenue of the two circles was Rs. 33,77,899, or Rs. 1,14,860 less than in 1893-94. The gross expenditure was Rs. 13,16,835 and the net revenue was Rs. 20,61,064, or Rs. 1,58,089 less than that of 1893-94. In September 1894 the Western division of the Pegu circle was divided into the Bassein-Myaungmya division and the Henzada-Thôngwa division, and on the 15th November 1894 the Toungoo and Shwegyin divisions were transferred from the Pegu to the Tenasserim circle.

Reservation of forests.

129. In the Tenasserim circle an addition of 637 square miles (of which 65 square miles are burdened with Karen taungya rights) was made to the area of the reserved forests, which, at the close of the year, amounted to 4,133 square miles. Of the new reserves 343 square miles are situated in the Toungoo and 294 square miles in the Shwegyin division. In the Pegu circle at the beginning of the year the reserved area was 4,496 square miles, from which have to be deducted the reserves transferred to the Tenasserim circle with the Shwegyin and Toungoo divisions, namely, 1,618 square miles. Further reserves, amounting to 44 square miles, were formed during the year, and by accurate survey areas previously reserved were found to contain 16 square miles more than was estimated, thus raising the area of reserved forests in the Pegu circle to 2,938 square miles. At the close of the year the reserved forests in Lower Burma represented 7,071 square miles, of which 569 square miles are burdened with *taungya* privileges. Projects for the reservation of further areas aggregating about 282 square miles were in hand at the end of the year. The demarcation of 418 miles of reserve boundaries was carried out at a total cost of Rs. 3,477, and an outlay of Rs. 1,830 was incurred on repairs to boundary marks.

Forest survey.

130. A party of the Imperial Survey Department was at work on forest survey from the end of November 1894 to the end of May 1895. The triangulation of 440 square miles and the traverse survey of 500 square miles were carried out in the Toungoo and Shwegyin divisions, in the forest reserves on the eastern slopes of the Pegu Yoma, and in the Paunglin and Pyinma reserves in the Pegu district. The outturn of traverse work was greater than in former years and the triangulation was kept in advance of it with some difficulty. Of detail survey in the Hanthawaddy and Pegu districts the approximate area completed was 347·21 square miles of reserved forests on the 4-inch scale and 33·50 square miles of unreserved forests on the 2-inch scale. There was also done the revision of 12·50 square miles of detail work on the 4-inch scale. The survey on the 4-inch scale of the forest reserves near the Thaungyin river in the Salween-Attaran division was completed by a party of the Imperial Forest Survey Branch during the season.

Working plans.

131. No working plans were actually sanctioned within the year. Those of the Bôndaung and Kabaung reserves in the Toungoo division were submitted, and sanction to both was given in July 1895.

Offences against forest rules.

132. At the beginning of the year 23 cases were pending in the Tenasserim circle, and during the year 678 cases had to be dealt with. They had to do for the most part with the unlicensed extraction and removal of timber and with false or incorrect reports of timber at Kado. Sixty-nine of the cases were taken before Magistrates. Convictions were got in 55. Seven broke down and seven were pending at the end of the year. The 609 compounded cases were settled for Rs. 6,190-14-0. Informers got rewards amounting to Rs. 1,049. Only 6 out of the entire number of 678 cases referred to offences inside reserves. In the Pegu circle 2,312 cases came to notice and 210 were pending from the previous year. Of these 330 were taken before Magistrates and 286 convictions obtained. In 1,992 compounded cases Rs. 13,831-3-9 were received as compensation. Informers received Rs. 412. The majority of the cases arose out of the illicit felling of cutch and young teak trees, chiefly in the Thayetmyo district.

Fire-protection.

133. No less than 13 forest fires occurred in the Tenasserim circle. Taungya-cultivators are blamed for five and wayfarers for three, but these fires only covered comparatively small areas. The remaining five were more serious, as they swept over 5,265 acres, and were attributed to wilful mischief or to "unknown causes," which may reasonably be considered as mischief. In the Pegu circle the measures taken against the outbreak of fires in reserves were not so successful as in 1893-94. Four fires broke out in reserves, and in one case the offender was sent to jail for six months. A persistent effort was made by bad characters to burn down the Kangyi reserve (8 square miles) in the Tharrawaddy division, fire having been kindled in it day after day for over a week, but the culprits were not caught. An area of 352 square miles was dealt with, but 57 square miles of forest (of which 5 miles were plantations) were burnt over against 30 square miles in the previous year. Servants of the department were to blame for 14 of the fires of that year, which injured 8,809 acres, and for 13 out of the 67 fires in 1894-95 which overran 13,064 acres. The Thayetmyo, Prome, and Tharrawaddy divisions suffered most. Three fires were caused by taungya-cultivators, 24 were due to wilful incendiarism, nine to incendiarism "not wilful," or in other words to the careless handling of fire by wayfarers when cooking their food or lighting their cheroots, and the causes of 18 fires which overran 12,037 acres were not found out.

Reproduction and improvement of forest growth.

134. No additions were made during the year to the area (791 acres) of regular teak plantations in the Tenasserim circle. The area of taungya teak plantations was increased by 1,522 acres at a cost of Rs. 9-10-3 an acre, of which Rs. 1-11-11 was for weeding. In the Pegu circle the Magayi teak plantation was increased by 15 acres at an average cost of Rs. 12-3-5 per acre, while 1,563 acres were planted with pure teak and 335 acres with pure cutch in taungyas, besides 458 acres with a mixture of teak and cutch.

Girdling.

135. No girdling of teak was carried out in reserves in the Tenasserim circle. The working plans of the Bôndaung and Kabaung forests in the Toungoo division were not sanctioned in time to allow any girdling to be done before the close of the year in accordance with their provisions. Outside reserves 3,449 trees were girdled. In the Pegu circle 14,474 trees were girdled in reserves and 1,150 trees in unreserved forests, against 12,297 trees inside and 12,976 trees outside reserves in the previous year.

Miscellaneous and minor forest produce.

136. The number of bamboos extracted was 18,444,885 against 19,164,773 in 1893-94. In the Tenasserim circle 11,582,200 canes and in Pegu 783,500 canes were extracted against 11,990,100 and 909,532 canes in 1893-94. Only 3,112 viss of cutch were extracted during the year against 206,239 viss in 1893-94, the issue of licenses having practically ceased. An experiment was tried in Tharrawaddy towards the close of the year of extracting cutch trees departmentally and selling them to the holders of licenses for making cutch, but no report of the results has yet been received.

Timber worked out of the forests.

137. The quantities of teak and other timber extracted from the forests during the year were as follows:—

	Teak.	Other kinds.	Total.
	C. ft.	C. ft.	C. ft.
By Government agency	1,912,206	76,847	1,989,053
By purchasers and under trade permits	726,843	13,259,078	13,985,921
Under free permits	9,800	29,525	39,325
By lease-holders of forests	40,151	23,243	63,394
Total for 1894-95 ...	2,689,000	13,388,693	16,077,693
Total for 1893-94 ...	3,300,400	11,838,600*	15,139,000
Increase or decrease in 1894-95 ...	−611,400	+1,550,093	+938,693

* Includes 1,231,150 cubic feet of fuel not included last year.

Extraction of timber.

138. In the Tenasserim circle, including Shwegyin and Toungoo divisions, 828,394 cubic feet of teak were worked out by Government agency against 790,392 cubic feet in 1893-94. Of woods other than teak Government extracted 49,280 cubic feet against 40,662 in 1893-94. By consumers and purchasers, including Messrs. Macgregor and Company, who extracted 668,456 cubic feet of teak, 696,889 cubic feet of teak and 345,030 cubic feet of other reserved woods were removed against 391,940 cubic feet of reserved timber of all kinds in 1893-94. A considerable quantity of pyinkado was also removed, amounting to 184,093 cubic feet. In the Pegu circle 1,083,812 cubic feet of teak and 24,370 cubic feet of other reserved woods were extracted by Government agency chiefly from the Tharrawaddy and Bassein divisions against 1,594,995 cubic feet and 14,976 cubic feet in 1893-94. The quantities of timber of all sorts removed by purchasers were 9,697,857 cubic feet.

Revenue and expenditure.

139. The statement below shows the gross revenue of the two circles for the year. It amounted to Rs. 33,77,899 against Rs. 34,92,759 in 1893-94, and was derived from the following sources:—

	1893-94.	1894-95.	Increase or decrease.
	Rs.	Rs.	Rs.
From timber and other produce removed from the forest by Government agency.	20,91,799	19,97,427	— 94,372
From timber and other produce removed from the forest by consumers and purchasers. Timber ...	7,28,133	7,13,750	— 14,383
Firewood and charcoal ...	55,702	44,763	— 10,939
Bamboos ...	51,189	66,263	+ 15,074
Grazing and fodder grass ...	571	841	+ 270
Other minor produce ...	37,850	21,108	— 16,742
Confiscated drift and waif wood	1,85,500	1,77,586	— 7,914
Duty on foreign timber and other produce	2,89,664	3,07,828	+ 18,164
Miscellaneous	52,351	48,333	— 4,018
Total ...	34,92,759	33,77,899	— 1,14,860

The result was mainly due to less timber having reached Rangoon than was expected, owing to a block in the Pegu canal, and to a falling off in revenue from thingan timber for boat-hulls and from bamboos and cutch. On the other hand, there was a larger business in pyinkado in the Pegu circle, an active trade in teak at Kado, and as the season in Tenasserim was favourable for floating operations, large quantities of both Government and foreign timber and of drift timber arrived. Prices were good. The expenditure of the year was Rs. 43,229 in excess of the expenditure of 1893-94.

The net revenue of both circles in the respective years compares as follows:—

	1893-94.	1894-95.
	Rs.	Rs.
Tenasserim	5,25,004	6,03,871
Pegu	16,94,149	14,57,193
Total ...	22,19,153	20,61,064

The provincial share of the cost of the Forest Survey parties employed in Lower Burma during the year has still to be brought to account. It amounts to Rs. 60,667.

Imports of teak timber.

140. The quantity of teak timber imported by the Salween into Moulmein was 75,831 tons against 80,792 tons in 1893-94, the proportion of full-sized and under-sized logs respectively being the same as in that year. No fewer than 37,651 drift logs were

received at Kado against 12,208 in 1893-94 and 6,989 in 1892-93. The quantities of teak imported by the Irrawaddy and Sittang were 30,159 tons and 87,627 tons respectively against 78,567 and 82,399 tons in the previous year. The increase was due in the case of the Sittang to the exceptional activity of the Bombay-Burma Trading Corporation in the extraction of timber from the Pyinmana forests.

Exports of teak timber.

141. The following table gives a comparative statement of the quantities of teak exported from Moulmein and Rangoon in each of the past five years:—

Year.	From Moulmein.		From Rangoon.		Total.		
	Tons.	Value.	Tons.	Value.	Tons.	Value.	Average value per ton.
		Rs.		Rs.		Rs.	Rs.
1890-91 ...	64,227	47,01,434	110,888	78,75,794	175,115	1,25,77,228	71·8
1891-92 ...	62,320	41,88,267	99,647	75,13,397	161,967	1,17,01,664	72·2
1892-93 ...	106,850	72,57,412	109,336	91,85,043	216,186	1,64,42,455	76·06
1893-94 ...	85,722	60,39,428	85,623	65,78,973	171,345	1,26,18,401	73·64
1894-95 ...	84,456	58,68,527	106,810	83,34,657	191,266	1,42,03,184	74·26

The greater portion of the exports from Moulmein went to Calcutta and Bombay, only 14,556 tons (but high quality selected timber) having been shipped to Europe against 17,776 tons in the previous year. From Rangoon 31,176 tons were exported to Europe and 56,843 tons to Madras, Calcutta, and Bombay against 25,225 and 54,224 tons respectively in 1893-94.

Forests (Upper Burma).

142. The Katha forest division being found to be inconveniently large, was divided in August 1894 into two separate charges, styled the Katha division and the Ruby Mines division respectively.

Reservation of forests.

143. Areas aggregating 252 square miles in the Katha and Mu divisions of the Eastern circle and 207 square miles in the Lower Chindwin division of the Western circle were added to the extent of the reserved forests, which, after allowing for trifling revised computations of areas, amounted at the close of the year to 4,408 square miles, of which 2,397 square miles are in the Eastern and 2,011 square miles in the Western circle. Taungya cultivating rights have been conceded over 219 square miles within reserves in the Eastern and over 36 square miles within reserves in the Western circle. Two Civil Officers were again employed as Forest Settlement Officers, and they held enquiries over areas representing approximately 456 and 483 square miles. At the close of the year proposals for the settlement of 436 square miles and 687 square miles in the Eastern and Western circles respectively were awaiting disposal.

Examination of forests.

144. The attention of most of the local Forest officers was again occupied with settlement and demarcation, but they were able to devote some time to the examination of new country, with a view to the selection of areas suitable for reserves. In the Bhamo, Katha, Ruby Mines, Mandalay, Pyinmana, and Southern Shan States divisions of the Eastern circle, and in the Upper and Lower Chindwin, Yaw, and Minbu divisions of the Western circle, teak of good or promising quality was met with in fair abundance, and also, in parts, excellent cutch, padauk, and pyinkado.

Demarcation.

145. Up to the end of the year (30th June 1895) satisfactory progress had been made in the demarcation of the boundaries of reserves. In the Eastern circle over two-thirds, and in the Western circle about four-fifths of the work had been finished. A good deal has still to be accomplished in the case of the Katha reserves, which were, however, only notified as such in December 1894.

Surveys and working-plans.

146. A party of the Imperial Forest Survey Branch worked in the Pyinmana reserves, Eastern circle, from the end of December 1894 to the beginning of June 1895. It finished the

detail survey of 195 square miles of reserves and the linear survey of 72 miles of boundaries, both on the 4-inch scale, besides doing some traverse work, at a cost of Rs. 25,200. In all the divisions of the circle traverse surveys were carried out by the local Forest officers. They covered an aggregate of 853 square miles and cost a little more than one rupee a mile. In the Western circle the local officers also did, with native surveyors to help, a substantial amount of surveying—746 square miles—and prepared practically useful maps of the greater portion of the area dealt with. Linear valuation surveys were made over 4,236 acres in the Eastern and over 1,466 acres in the Western circle, against 4,788 acres and 3,969 acres in 1893-94.

Forest offences.

147. In the Eastern circle nine cases were pending at the beginning of the year, and 368 new cases came to notice against 429 in the previous year. Magistrates disposed of 105 cases; in 80 per cent. of which convictions were obtained. Two-thirds of the cases of the year were compounded for Rs. 3,155. Only eight cases were undetected. Many of the offences related to the illicit boiling of cutch. In the Western circle, besides six cases pending from the previous year, 244 new cases came to light, or 95 more than in that year; they were mostly cutch cases. Convictions were got in only 68 per cent. of 111 cases taken before Magistrates, owing to the pleas of the accused that the cutch was the produce of their ancestral lands.

Fire-protection.

148. The results of the measures taken in the Eastern circle to protect forests from fire were highly successful. Out of 44,964 acres 43,888 acres were saved at a cost of Rs. 3,044. Last year the area successfully protected was 32,685 acres out of 35,435 acres. The Mandalay and Mu forests were the least fortunate. In the Western circle the fire-protection results were also excellent, no less than 205,440 acres of the forests having been saved from fire out of 216,320 acres over which watch was kept. The Tichaungwa reserve in the Minbu division alone suffered. Fire got into the forest while the boundaries were being fire-traced, and later on a second fire occurred and the people of a village who have grazing rights in the reserve refused to help in putting it out.

Plantations.

149. In the Eastern circle the area of teak taungya plantations was 86·69 acres, to which 66 acres were added during the year. The area of regular plantations decreased from 104·50 to 98 acres owing to the destruction of the small cutch plantation of 6·50 acres in the Pyinmana division by a flood. In the Western circle the only experimental plantations are the cutch taungya plantations in the Minbu division, the area of which, after the addition of 56 acres, and the exclusion of 117 acres found to be worthless, was 290 acres at the close of the year.

Experimental cultivation.

150. Beyond the planting of a few pine trees, no further experimental cultivation was tried in the Eastern circle. European fruits can be reared, but they require close attention, and at present no establishment is available for the purpose. The cultivation of *eucalypti* was not very successful. The mahogany trees at Minbu, of which 15 survive, give promise of doing well.

Girdling.

151. No girdling of teak was carried out in the Eastern circle, except in a part of the Mèza forest, Katha division, where 702 trees were girdled over a small area which has been leased for gold-mining. In the Lower Chindwin and Yaw divisions of the Western circle, 1,425 and 682 trees were girdled. No girdling was done in either circle for lessees, or for the Chiefs in the Southern Shan States, where the forests need rest.

Extraction of timber.

152. On Government account 1,929 logs of teak containing 1,830 tons were brought out of the forests of the Bhamo and Katha divisions against 1,743 logs and 1,860 tons in the previous year. This timber was from the more remote parts of the forests, where it had been left by former lessees. Its extraction was costly, but it yielded on sale a handsome profit. Besides this timber 2,750 logs or 1,524 tons of "rejected" teak, nearly all from the Bhamo forests, were either made over to the contractors

on payment of the local duty or were sold on the half-profit principle, yielding a substantial net return to Government. A railway contractor in the Katha division bought for Rs. 15,104 1,448 tons of teak, the yield of trees cut down along the railway line. In the Western circle 332 logs of teak were extracted departmentally from the Taungdwingyi forests, and 431 tons of drift teak and 42 tons of other kinds lapsed to Government. The quantity of teak extracted by the Bombay-Burma Trading Corporation from the Mandalay, Mu, and Pyinmana forests was 103,257 tons, revenue Rs. 9,43,146, against 103,786 tons, revenue Rs. 9,66,636, in the previous year. Messrs. Darwood and Company extracted 10,453 tons and Hadji Mahomed Hady 4,543 tons, from which Government derived a revenue of Rs. 1,93,316 against Rs. 1,51,914 on 12,391 tons in 1893-94.

The estimated outturn of teak from the forests of the Southern Shan States was 12,560 tons. The Bombay-Burma Trading Corporation extracted 17,388 tons less teak from the Chindwin forests and 932 tons less from the Yaw forests than in the previous year. Trade licenses for 14,674 tons of teak, 151 tons of padauk, and 38,775 tons of other varieties were granted in the Eastern circle. The outturn of pyinkado sleepers in Pyinmana was slightly greater than in 1893-94. Free licenses were granted for an estimated quantity of 3,019 tons of teak against 2,977 tons in 1893-94. In the Western circle trade licenses were issued for 11,985 teak and 70 padauk trees and free licenses for 6,750 teak trees.

Minor forest produce.

153. The quantity of cutch removed from the forests of the Eastern circle was very much less than in 1893-94, the revenue for the two years being Rs. 7,455 and Rs. 3,227. Only 22 licenses were issued against 112 in the previous year. The outturn of India-rubber was also considerably smaller, in consequence, it is believed, of the over-tapping of the trees. Larger quantities of thitsi (varnish), indwe (resin), and lac were removed and a very much larger quantity of limestone. The outturn of cutch in the Western circle was much below that of the previous year, fewer licenses having been issued, while the period of the licenses was for four months only instead of six. Less thitsi, shaw-fibre, honey, and wax, and more wood-oil and bark were removed. The aggregate revenue of the two circles from minor forest produce was Rs. 2,32,776 against Rs. 2,79,540 in 1893-94.

Revenue and expenditure.

154. The gross revenue of the two circles for the year was—

	Rs.
Eastern circle	17,32,475
Western circle	4,85,512
Total ...	22,17,987

and was contributed as follows by the various sources of income:—

	1893-94.	1894-95.	Increase or decrease.
	Rs.	Rs.	Rs.
Timber and other produce removed from the forests by Government agency.	41,589	1,29,790	+ 88,201
From timber and other produce removed from the forests by consumers and purchasers. — Timber	18,40,707	16,93,464	— 1,47,243
— Firewood and charcoal ...	42,957	38,189	— 4,768
— Bamboos	49,638	66,772	+ 17,134
— Grazing and fodder grass	...	81	+ 81
— Other minor produce ...	2,86,764	2,32,506	— 54,258
Confiscated drift and waif wood	40,304	30,290	— 10,014
Duty on foreign timber and other produce	...	...	...
Miscellaneous	30,375	26,895	— 3,480
Total ...	23,32,334	22,17,987	— 1,14,347

The net revenue was Rs. 16,70,321 or Rs. 1,17,964 less than in 1893-94.

The season was a good one in the Eastern circle for rafting operations and large quantities of lessees' timber were got out, the extra revenue from which and savings under various heads of expenditure account for the favourable financial result in that circle.

Mines and Quarries.

Jade.

155. The year of report was the second year of the farm of the royalty on jade extracted in the Myitkyina district. The royalty was collected without friction.

Rubies.

156. The Ruby Mines Company, Limited, continued to work the ruby mines at and near Mogôk, and to receive fees for licensing persons to work after the native method. The Nanyaseik ruby tract was examined and will be opened to miners.

Petroleum.

157. The outturn of petroleum in Burma was 10,920,951 gallons, valued at Rs. 10,57,545. To this total the Akyab district contributed 38,120 gallons, the Kyaukpyu district 127,843 gallons, the Pakôkku district 324,086 gallons, and the Magwe district 10,430,902 gallons. The syndicate represented by Messrs. Gillanders, Arbuthnot and Company did not decide during the year whether to take up the concessions offered. The Burma Oil Company took out a prospecting license over 3 square miles in Pakôkku district and received a lease of 3 square miles in Magwe district. In the Akyab district 8 acres were leased to Mr. Savage.

Coal.

158. The Burma Coal Company, Limited, continued to work the Lingadaw or Kabwet coal-mine in Shwebo district, and employed an average of 231 persons daily. The company extracted 12,111 tons during the year. Renewed efforts have been made to work the coal-mine in Thayetmyo district. Lignite coal, containing 36·60 per cent. of carbon, was found in the Shan State of Laikha.

Tin.

159. Captain Menzell's concession in Mergui has been transferred to the Jelebu Mining and Trading Company, Limited. The amount of tin exported from Victoria Point was 1,630 cwt. and the total outturn of the mines was estimated at 1,960 cwt., valued at Rs. 1,08,700.

Gold.

160. In the Katha district five prospecting licenses and three mining leases were granted to persons seeking for gold. Only one person has set to work in earnest and the results of his efforts are not yet certain.

Miscellaneous.

161. Operations for the extraction of mica were started in the Twinngè township of the Ruby Mines district. The right of the Imperial Government to the minerals in the Shan States was again declared, though the patents of appointment of the various Chiefs had already contained a clause to this effect.

Manufactures.

Manufactures.

162. The principal manufactures were specified in the report of 1889-90. The total number of factories which came within the scope of Act XV of 1881 in Lower Burma was 112, in all except one of which steam-power was or could have been used. Of this total 54 were rice-mills and 45 timber saw-mills. The number of timber-mills was the same as in the previous year; the number of rice-mills one higher. In addition to the above there were five iron-foundries, three ice-factories, two printing presses, two oil-works, and one cotton-press. In all 95 factories were situated at or near the ports of Rangoon, Bassein, Akyab, and Moulmein. The remaining 17 factories were worked in the districts of Hanthawaddy and Tharrawaddy of the Pegu, and Tavoy and Toungoo of the Tenasserim divisions. The total number of operatives shown in the returns for the year was 14,361, or 2,927 less than in 1893. The decrease was partly due, as in the previous year, to a stricter interpretation of the expression "operatives," women and children who carry paddy between the mills and the boats having been excluded from the returns.

Commercial Marine.

163. The number of vessels and the aggregate tonnage engaged in the seaborne trade of the province in each of the past three years were as follows :—

	Vessels.	Tonnage.
1892-93	6,742	3,736,874
1893-94	6,320	3,797,096
1894-95	6,335	3,975,148

This tonnage was distributed in the following proportions among the four chief ports and the smaller ports :—

Port.	1892-93.				1893-94.				1894-95.			
	Entered.		Cleared.		Entered.		Cleared.		Entered.		Cleared.	
	Vessels.	Tonnage.	Vessels.	Tonnage	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.	Vessels.	Tonnage.
Rangoon ...	1,275	1,201,735	1,224	1,168,991	1,222	1,201,991	1,187	1,237,332	1,123	1,233,697	1,118	1,228,924
Akyab ...	506	170,940	498	176,836	404	150,591	360	145,741	438	220,093	433	215,810

Total ...	3,381	1,878,946	3,361	1,857,928	3,182	1,878,434	3,138	1,918,662	3,155	1,991,218	3,180	1,983,930

Foreign trade.

164. The cessation at the end of 1894 of the combination entered into by the rice merchants of Rangoon, which has seriously affected the trade of the province during the past two years, has improved foreign trade; 22,780,567 cwt. of rice, valued at Rs. 8,28,70,579, were exported against 18,339,527 and 15,601,202 cwt. respectively during the past two years. The improvement of the outlook of the agriculturists has been so recent that no appreciable change for the better has taken place in the import trade. Owing to the above circumstances, and in spite of the re-imposition of the import duties, there was a considerable improvement in the number and tonnage of the shipping engaged in the foreign trade during the year under review as compared with that immediately preceding. The aggregate increase was 126 vessels with 254,880 tons. Two hundred and seventy-two steamers and 200 sailing vessels entered the several ports from foreign countries and the numbers that cleared were 332 and 187 respectively. In 1893-94, 243 steamers entered and 251 cleared, while the figures for sailing vessels were 167 and 204 respectively.

Coasting trade.

165. In consequence of the falling off in shipments of rice to the Bengal and Madras ports, the number and tonnage of the shipping engaged in the coasting trade of the province during 1894-95 was less than in the preceding year, the decrease being in steamer tonnage chiefly. The number recorded in the year of report was 3,209 steamers of 2,495,694 tons, and 2,135 sailing vessels of 124,879 tons, making a total of 5,344 vessels of 2,620,573 tons, against 3,631 steamers of 2,556,424 tons and 1,824 sailing vessels of 140,977 tons, or a total of 5,455 vessels of 2,697,401 tons recorded in 1893-94.

Wrecks and casualties.

166. The shipping casualties which occurred during the year were for the most part not of much importance. At Rangoon there were five cases of collision while in pilotage charge, of which only one was investigated, and six cases of grounding under pilotage charge, of which one was enquired into. Two *kattus* or native sailing boats and the Siamese S.S. *Setthi* were wrecked off the Tenasserim coast during a cyclone in April 1894. The Chief Officer of the *Setthi* and a portion of the crew and passengers lost their lives. One case of grounding and another of collision, while under pilotage charge, were enquired into at Moulmein. Off the Arakan coast the British Indian brig *Stree Sathia Narayana Moorty* was wrecked. The native mate was drowned. No enquiry was held regarding the wreck as the native master held no certificate.

Marine surveys and tidal observations.

167. No marine surveys were undertaken and no spirit-levelling was executed during the year. The tidal observations taken at Rangoon, Moulmein, Akyab, and Diamond Island continued to give satisfaction. The observatory at the last-named locality is now the only institution in the province; it is reported to be in good working order. A proposal to establish a new tidal observatory at Victoria Point is under consideration.

Light-houses and light-vessels.

168. All the light-houses in the province were inspected by the Superintendent of Light-houses and by the Superintending Engineer, First Circle, and the lights were found on the whole to be in a satisfactory condition. The R.I.M.S. *Minto* was employed on light-house duty throughout the year. While she was engaged during February in conveying the R.I.M.S. *Pagan* and the launch *Eileen* from Chittagong to Diamond Island an expenditure of Rs. 500 was incurred in hiring the B.I.S.N. Co.'s S.S. *Karagola* to take the Public Works Department Inspector and a number of workmen away from Table Island. The condemnation of the light-vessel *Colombo*, which had been stationed at the Spit, necessitated the placing of another light at that station. The vessel selected for this duty was the *Martaban*, the new light-vessel which had originally been constructed for duty at the Baragua flats and which arrived in Rangoon in August. From August to the close of the year the *Martaban* remained at the Spit, except for six weeks, when she relieved the *Krishna* at the latter's station. The *Krishna* was found when brought to Rangoon for repairs in November 1894 to be in almost as bad case as the *Colombo*. Two new light-vessels, which are much needed, are now under construction at Kidderpore. The schooner *Pharos*, which had been temporarily stationed at the Spit, foundered during heavy weather in April and all hands on board were lost. The health of the establishment was not so good as during the preceding year. There were four deaths from *beriberi* among the native light-house staff and the same disease appears to have attacked one at least of the European members of the establishment. There was a bad case of poisoning from eating oysters among the European light-keepers. Steps were recently taken to improve the class of light-keepers by recruiting Naval pensioners for light-house service from England. The idea of lighting the Spit channel with gas buoys has been abandoned, as the navigation in the vicinity of the Spit has been rendered safe by the formation of a new channel. An occulting apparatus for the Eastern Grove light has been indented for. The receipts from light-dues aggregated Rs. 2,75,809 as against Rs. 2,54,039 in the previous year, the greatest increase being at Akyab, where over Rs. 10,000 more was collected than in 1893-94. At Moulmein and Bassein also there were substantial increases, and at Rangoon there was a slight rise on the figures of the previous year. The expenditure fell from Rs. 1,75,317 to Rs. 1,60,854. The public works outlay was Rs. 38,077 against Rs. 21,460 in the previous year, but this was counterbalanced by the large reduction in the expenditure on repairs and fittings.

Pilot Service.

169. The Rangoon Pilot Service consisted of 13 first, two second, and one third grade pilots, and six special pilots. The highest monthly earnings of a first-grade pilot in full work averaged during the year Rs. 916 and the lowest Rs. 739, while the average net monthly earnings of each of the full draft pilots while they were at work was Rs. 775. The receipts of the Rangoon Pilot Fund were Rs. 2,15,087, and the expenditure was Rs. 1,95,554, which left a balance of Rs. 19,533 at its credit. Owing to the death of one first-grade European pilot, the strength of the Bassein Pilot Service was reduced from seven to six, namely, five Europeans holding first-grade licenses, and one native holding a third-grade license. The pilotage receipts during the year amounted to Rs. 24,607 or Rs. 7,081 more than in 1893-94. Of the three pilots at Akyab, one died in the course of the year, and the survivors belonged to the first grade. To fill up the vacancy a probationer has been appointed. The scheme for the re-organization of the Pilot Service at Akyab is still under consideration. The pilotage earnings amounted to Rs. 16,835-15-0 during the year, and this sum was almost evenly divided between the two senior pilots. At the close of the year, the Moulmein Pilot Service comprised

six European and three native members. One European and one native pilot died in the course of the year, but only the vacancy created by the death of the former was filled up. There were also four European special pilots. The average net monthly earnings of a full draft pilot at Moulmein amounted to Rs. 559.

Port Funds.

170. The number of Port Funds remained the same as in former years. The receipts of the Rangoon Port Fund were Rs. 11,75,920 against Rs. 13,19,578 in 1893-94, and its expenditure amounted to Rs. 11,35,129, or nearly two lakhs less than in the previous year. The small decrease in revenue was due, to a large extent, to continued depression in the import trade. The fall in expenditure was most marked under the head of "Original Works." The disbursements on this account were abnormally heavy in 1893-94, but the expenditure in the year of report was not much below the average outlay of 1891-92 and 1892-93. The details of the receipts and expenditure of the remaining six funds call for no special remark. Exclusive of the opening balances, their receipts aggregated Rs. 2,35,797, the greater part of which was earned by the ports of Moulmein and Akyab. Their expenditure amounted to Rs. 2,36,722, and their aggregate closing balance was Rs. 1,90,586. All the funds were in a solvent condition.

Sea-borne Trade.

General statistics.

171. The effect of the depressed trade of 1893-94 continued to be felt for the greater part of the year and only began to pass away when the rice-millers' league was dissolved at the beginning of 1895. Throughout 1894 the imports of foreign goods, both from the United Kingdom and elsewhere, were on a greatly contracted scale in almost every important class of merchandize. The people had no money at command, and although the cultivators got good prices for their grain during the second half of the year, they had been so seriously crippled the year before that all their gains went to cover previous losses. Excluding treasure, the total trade of the year was of the recorded value of Rs. 22,22,42,542, of which Rs. 21,99,76,581 represented private trade and Rs. 22,65,961 Government transactions, against Rs. 21,26,52,276 and Rs. 27,30,199 in 1893-94. The chief decreases in imports were in cotton and cotton goods, raw silk, and silk and woollen piece-goods, which accounted for 56·1 per cent. of the whole decline. The foreign export trade increased in value by 257 lakhs, mainly under rice, rice-bran, hides and teak timber. The import coasting trade increased by about 18 lakhs, and, although considerably less rice was shipped to Indian ports, there was an improved export trade in hides and skins, sticklac, mineral oils, sugar, tobacco, and timber.

The progressive value of the trade of Burma since 1866-67 is shown below.

Year.	Rangoon.			Other ports.			Total for the province.		
	Imports.	Exports.	Total.	Imports.	Exports.	Total.	Imports.	Exports.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1866-67	1,74,95,330	1,18,80,320	2,93,75,650	80,57,520	1,12,60,300	1,93,17,820	2,55,53,850	2,31,40,620	4,86,93,470
1871-72	2,28,11,560	2,29,71,550	4,57,83,110	87,68,300	1,48,30,620	2,35,98,920	3,15,79,860	3,78,02,170	6,93,82,030
1876-77	3,66,21,660	3,39,16,470	7,05,38,130	1,04,72,380	2,12,50,070	3,17,22,450	4,70,94,040	5,51,66,540	10,22,60,580

Trade of the several ports in 1894-95.

172. The greater part of the sea-borne trade of the province enters and leaves by Rangoon. The share of the import trade recorded at each port in 1894-95 was as follows:—Rangoon 80·9 per cent., Akyab 6·5 per cent., Moulmein 9·8 per cent., Tavoy ·8 per cent., Mergui 1·1 per cent., and the other small ports ·9 per cent. There is no import trade in general merchandize at Bassein. Of the

export trade 68·9 per cent. went from Rangoon, 10·1 per cent. from Akyab, 12·3 per cent. from Moulmein, 7·3 per cent. from Bassein, and the balance from the minor ports. The imports at Rangoon were 19·25 per cent. below those of 1893-94; the decrease was solely in the foreign portion of the trade. Exports to foreign countries were 23·29 per cent. higher, the increase being almost wholly in rice, but the coasting exports fell off by 21·26 per cent. on account of smaller shipments of rice and pulse to Indian ports. The *Akyab* import trade was unimportant, but both foreign and coasting exports increased very much in consequence of large shipments of rice both to Europe and to all parts of the Indian coast. At *Bassein* more foreign salt was received, but coasting imports were very small; unusually large quantities of rice were sent to Europe, but much less paddy to Indian ports. The foreign import trade of *Moulmein*—chiefly from the Straits Settlements—fell off somewhat, while the coasting trade improved. Much larger shipments of rice and teak timber were made to Europe and of rice to the Straits. From *Tavoy* also larger quantities of rice were sent to the Straits, but the import trade of the place was dull. The foreign trade of Mergui increased a little, as did also the general trade of Victoria Point.

Import trade.

173. The value of the private merchandise imported during the year was Rs. 8,32,68,876, of which Rs. 3,46,93,513 were recorded under foreign imports and Rs. 4,85,75,363 under coasting trade, against Rs. 5,18,65,888 and Rs. 4,67,28,187 in 1893-94. The most noticeable decline in foreign imports was in the English, Continental, and Straits trade, which continued to suffer from the former depression in the rice trade and from the low rate of exchange. Smaller shipments of goods were made from the United Kingdom, especially of apparel, building materials, candles, cotton, silk and woollen goods, hardware, and metals. Less window glass, copper, and hardware came from *Belgium*; less apparel, candles, cotton and silk goods, and brandy from *France*; less hardware, beer, iron, and piece-goods from *Germany*; less gin and piece-goods from *Holland*; less kerosine-oil from *America*; less fruit from the *Arabian Gulf*; and while the direct trade from *China* and *Japan* increased, that from the *Straits Settlements* fell off in most classes of goods.

Export trade.

174. The value of the private export trade of the year, both foreign and coasting, was Rs. 13,67,07,705, or two lakhs more than in 1893-94. The increase was due for the most part to the large business done in rice.

The exports of goods to Europe during the past five years are shown below.

	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
	Rs.	Rs.	Rs.	Rs.	Rs.
United Kingdom	1,58,58,370	2,08,51,628	2,70,31,242	2,30,00,919	2,11,83,488
France	4,59,110	2,74,112	2,85,182	2,43,443	2,74,958
Germany	99,060	16,90,788	12,36,689	8,79,496	8,60,939

Malta	69,76,700	58,13,606	7,03,645	10,25,323	18,92,577
Other countries in Europe ...	1,80,170	76,347	1,35,556	1,67,045	6,51,625
Total ...	5,33,91,170	6,74,97,159	6,12,44,502	4,57,87,155	6,19,90,251

The value of the exports to foreign countries was 257 lakhs more than that of 1893-94, owing to extensive shipments of rice to many parts of the world. Less rice, cutch, India-rubber, and paraffin-wax went direct to the *United Kingdom*. *Austria* took 4,000 tons of rice and none in the previous year. Less cutch went to *Belgium* and more rice and horns to *France*. *Germany* took rice, cutch, and teak to about the same extent as in 1893-94. A large quantity of rice went to *Holland* and more hides and teak to *Italy*. *Spain* took teak timber only. Much rice was shipped to *Egypt* and *Malta* for orders. To *Canada*

4,125 tons of rice were shipped against none in the year before. The *United States* took more, but *Ceylon* and *China* less rice than in the previous year; while *Japan* bought twice as much rice as in 1893-94. The Straits Settlements and the Siamese ports in the Malay Peninsula took much rice. Some rice went to *St. Helena*, teak to *Lisbon*, and hides to *Turkey*. The coasting export trade was of somewhat lower value than that of 1893-94, owing to less demand for rice in Bengal and Madras. More business was done with Bombay in general country produce and in timber. The aggregate trade between ports in Burma was well maintained.

Inland Trade.

Registration stations and general statistics.

175. There were six stations in Lower Burma at the end of the year for the registration of trade with Siam, Zimmè, Karenni, and the Southern Shan States. In Upper Burma three new stations were opened in the Kyauksè district, bringing the number up to 11 stations for registering the trade with Western China, the Northern and Southern Shan States, and the Kachin Hills. The recorded value of the year's trade was Rs. 2,30,31,362 compared with Rs. 1,85,08,356 in 1893-94. There was an increase of 14·83 per cent. in imports, of 40·03 in exports, and of 24·43 per cent. for both combined. The increase occurred entirely in Upper Burma.

Lower Burma.

176. The registered value of the Lower Burma trade was Rs. 71,59,860 compared with Rs. 88,65,536 in 1893-94. This large decrease occurred both in imports and exports, and was caused by the trade with Northern Siam, which had been diverted from Bangkôk to Moulmein in 1893-94 on account of the troubles between Siam and France, having resumed its former channel. The routes between Lower Burma and Chiengmai and the Shan States are rough and bad, and the cost of transport is much higher than *viâ* Bangkôk. The principal imports from Zimmè and Siam generally consist of elephants, cattle, silk, piece-goods, and timber. The decline in the year's trade, which amounted to no less than Rs. 8,06,358, occurred principally under the first three heads and in treasure. There was a trifling increase in the value of the imports of timber, but much of the timber was inferior. From Karenni the imports of timber, which is the only considerable article of commerce, were more than in 1893-94, and were valued at Rs. 23,33,832 against Rs. 21,40,250 in that year. The export trade to Karenni, Zimmè and Siam generally declined partly from the same reason that affected the imports.

Trade with China.

177. The trade passing to and fro between Burma and Western China is registered at Bhamo and Myothit in the Bhamo district, at Maymyo in the Mandalay district, and at Myittha and Yewun in the Kyauksè district. The import and export trade, including bullion and specie, showed a substantial increase over that of 1893-94, the former being valued at Rs. 22,92,072 compared with Rs. 17,15,647 and the latter at Rs. 27,74,303 compared with Rs. 13,64,801. There was a large increase in imports of sticklac, for which there was an active demand in Rangoon, and of paper for umbrella-making, while the traffic in silver, both specie and bullion, rose from Rs. 3,66,724 to Rs. 19,03,860, for reasons difficult to understand, as a very nearly equal amount of treasure was exported. The value of the merchandise imported decreased about two lakhs owing chiefly to smaller imports of raw silk, silk piece-goods, and apparel. The export trade to China in merchandise increased largely, chiefly under raw cotton, twist and yarn, cotton, silk, woollen goods, and salt. The preference for Indian twist and yarn over the European article was maintained, the value of the exports being about Rs. 78,000 over that of the previous year, and there was a larger demand for European piece-goods, for salt, and for manufactured silk.

Trade with the Shan States.

178. The means of transport employed in the trade with the Shan States and China are ponies, mules, pack-bullocks, and carts. The trade between Upper Burma and the Northern Shan States is registered at Bhamo, Myothit, Sawadi, Möngmit, and

Maymyo. Its value continued to rise, the imports, including specie and bullion, being Rs. 30,05,953 against Rs. 26,85,699 and the exports Rs. 22,88,421 against Rs. 16,46,906 in 1893-94. The country was quiet and the various routes were practically safe. The returns of the import trade in merchandise from the Northern Shan States were almost stationary owing to smaller importations of pigs and poultry, rice, horns, and cigar-leaves, to a fall in the market rates for pickled tea, and to the transfer to the Southern Shan States of a portion of the trade formerly recorded as Northern Shan States' trade. The chief items contributing to the increased exports were cotton and woollen piece-goods and salted fish carried *viâ* Bhamo. But for a large decline in the exports of cotton piece-goods by the Maymyo route, due probably to excessive exports in 1893-94, the year's trade would have shown great expansion. The Southern Shan States' trade is recorded at Kywelebin in the Meiktila district and at Pyawbwè and Pyinmana in the Yamèthin district, to which were added at the beginning of the year Taungdaw, Myittha, and Yewun in the Kyauksè district, where a record of much traffic was got which had hitherto escaped registration. The imports of merchandise rose from Rs. 9,64,241 in 1893-94 to Rs. 16,40,895 and the exports from Rs. 7,65,493 to Rs. 21,65,013. In these figures are included the value of a certain portion of the trade formerly registered at Maymyo as Northern Shan States' trade and the trade recorded at the new Kyauksè stations. There was also a more active trade by the other routes in cattle, in sticklac for the Rangoon market, and in cigar-leaves. The value of the export trade expanded partly through the addition of the trade of the new registering stations and partly owing to brisker trade along the other routes in Bombay twist and yarn, cotton and silk piece-goods, salt and betel-nuts.

Internal trade of Burma.

179. The only station at which the river trade of the province is recorded is Allanmyo on the Irrawaddy, a little way below the old frontier of Lower Burma. The trade on the Sittang *viâ* Toungoo has died out and been diverted to the railway which runs close by. The trade by the road routes from Upper to Lower Burma was recorded as before at Allanmyo, Thayetmyo (two routes), Kyaukpadaung, and Toungoo. The statistics of rail-borne and steamer traffic are obtained from the Railway Accounts office and from the Irrawaddy Flotilla Company, and the Forest officers at Thayetmyo and Toungoo supply those of timber rafts. The recorded total value of the year's trade (excluding specie) was 6·58 per cent. below that of 1893-94. Imports from Upper into Lower Burma were 5·03 per cent. greater and exports to Upper Burma 36·44 per cent. less, smaller quantities of goods having been exported by each line of transport. The aggregate river-borne trade was 13·81 per cent., the road trade 21·47 per cent., and the rail-borne trade 3·95 per cent. below that of the previous year. The proportion of the trade carried by each means of conveyance was 75·79 per cent. by river (of which 33·17 per cent. was carried by steamers, 11·73 per cent. by boats, and 30·89 per cent. in timber rafts), 1·93 per cent. by road, and 22·28 per cent. by rail, compared with 77·42 per cent. by river (32·42 per cent. being by steamer, 13·00 per cent. by boats, and 32·00 per cent. in timber rafts), 2·16 per cent. by road, and 20·42 per cent. by rail in 1893-94. In imports from Upper Burma the chief increases occurred in coal (from the Kabwet mines), raw cotton, grain and pulse, rawhi des, sticklac, beer (from the Mandalay brewery), earth-oil, jadestone, lime, palm-sugar, tobacco, and goats, while trade fell off in cutch, wheat, til-seed, chillies, and horned cattle. In exports to Upper Burma a larger business was done in twist and yarn (both European and Indian), Indian wheat, groundnut-oil, betel-nuts, and woollen goods, but there was less trade in coal, paddy and rice, dried fruits and nuts, raw silk and silk goods, and Indian tobacco.

Public Works (Lower Burma).

General.

180. The administration of public works in Lower Burma is controlled by a Chief Engineer, assisted by three Superintending Engineers, namely, the Superintending Engineers in charge of the First, Second, and Fourth Circles of Superintendence. There were no alterations in the circles or divisions during the year of report.

Expenditure.

181. The total outlay of the year from all sources amounted to Rs. 42,88,398 against a final grant of Rs. 44,67,322. The corresponding figures for last year were Rs. 47,30,754 and Rs. 49,75,347 respectively. The outlay for the year is shown in detail in the following table :—

Departmental heads.	Imperial.		Provincial.		Incorporated Local.		Contributions.	Total.
	Military works.	Civil works.	Civil works.	Minor works and navigation.	Civil works.	Minor works and navigation.

Military works.

182. The quarters for four lady nurses at Rangoon were in progress at the close of the year. The approach roads to the rifle-range at Thamaing were completed and the range made suitable in every way for the Lee-Metford rifle. A building providing an office, armoury, and quarters for the Sergeant-Instructor of the Rangoon Volunteer Rifles detachment at Akyab was under construction during the year. The Ordnance office in the Rangoon Arsenal was completed and handed over for occupation. The quarters for the Chief Civil Master-Armourer, Rangoon, was also finished.

Expenditure on military works.

183. The total expenditure on military works during the year was as follows:—

	Rs.
On original works	43,697
On repairs	1,33,651
Total ...	1,77,348
Establishment	37,785
Tools and plant	2,437
Suspense	— 691
Barrack Department	30,452
Total ...	2,47,331

Civil buildings.

184. Very considerable progress was made during the year in the construction of the new Government House at Rangoon. Sanitary appliances and hot-water services were completed and are in excellent order, the electric light installation was well in hand, and the roads and grounds were laid out. Besides the ball-room and some terra-cotta work in isolated places very little else remained to be done. The total cost to the end of the year was Rs. 7,17,193. The new Cathedral at Rangoon was

* Refunds of revenue Rs. 4.
(a) Military Rs. 5,841, Civil Rs. 1,15,361.
(b) Includes Rs. 312 Irrigation; Military Rs. 10,712 and Civil Rs. 12,142.
(c) Includes Rs. 72 Irrigation; Military Rs. 2,772 and Civil Rs. 7,703.
(d) Includes Rs. 4 Irrigation; Military Rs. 182 and Civil Rs. 502.

completed and brought into use in November last. The old Pro-Cathedral or Town Church on the Strand was demolished, some of the materials being sold by public auction and the rest used for the new Cathedral. During the year the outhouses for the new Public Offices at Rangoon, comprising two blocks of pucca buildings, the exterior design of which is in accord with that of the main building, were finished; a sub-post-office for the convenience of the Public Offices located in the main building was opened in one of the blocks; a travelling crane was erected for the police godown; a few petty works were carried out in the main building; and a number of record racks provided. The old General Secretariat building on the Strand has been converted into a Telegraph office, so as to relieve overcrowding in the General Post Office. The old Field-to-field Survey office in Godwin road, Rangoon, was converted into a building suitable for the accommodation of an Engineering School. The object of this school is to supply locally the lack of properly trained Public Works subordinates, especially lower subordinates, and to open a career to the natives of Burma. The course of studies will be the same as that for upper and lower subordinates at the Thomason Civil Engineering College at Roorkee. The works left incomplete at the beginning of last year in connection with the extension of and alterations to the Lunatic Asylum at Rangoon were, with the exception of the addition of a top storey to one block of criminal cells, completed during the year. The Lunatic Asylum has cost up to the close of the year of report a sum of Rs. 1,53,523. Hospitals were begun and completed during the year at Ma-ubin and Wakèma and alterations carried out to other hospitals where necessary. Additions and alterations to improve the Ma-ubin, Thayetmyo, and Toungoo Jails were carried out. The new Press building in the Rangoon Central Jail was completed, considerable progress was made on the Reformatory for juveniles at Insein, quarters for the Deputy and Assistant Jailors, Insein Jail, were provided, and a well sunk for the irrigation of the jail garden during the dry season. A district jail for 150 prisoners was completed at Prome. During the year of report a rather larger grant than usual was made for police buildings. Numerous petty works and repairs were carried out on behalf of the Public Works Department by police agency all over the country. Police thanas and barracks were completed or in progress at Rangoon and its suburbs, and in the different Lower Burma districts where required. Record-rooms were completed at Pegu and Bassein. A record-room was also begun at Myaungmya, the headquarters of the new district of that name. A Court-house for the Deputy Commissioner and his staff was begun at the latter place and good progress has been made. Rest-houses were built where required for the convenience of District Officers. The Customs buildings at Elephant Point having been threatened by encroachments of the river for some years past, they were accordingly removed to a new site out of danger. The Customs office and godowns at Victoria Point, which were in hand in the previous year, were completed during the year of report.

Expenditure on civil buildings.

185. The total expenditure on civil buildings (excluding establishment, tools and plant, and suspense) during the year was—

	Rs.
On original works	12,18,672
On repairs	1,56,716
Total ...	13,75,388

Communications.

186. The bridge across the Thônzè chaung at the 76th mile of the Rangoon-Prome road was completed in September 1894. This bridge closes one of the gaps which made a break in the through communication along the road. All the timber bridges on the 4th section of this road are being renewed. A road, 16 feet wide, is under construction between Tavoy and Yebyu. The road from the Minbyin oil-fields to the sea-beach, which was begun in 1893, was completed in September 1894. This road will open out much needed communication between the oil-fields and the sea. A road from Shwegun to Hlaingbwè, 14½ miles in length, is still under construction. The 1st section of the Insein road has been extended to

Ôkpo. The object of this extension is to provide a way for travellers who do not move by rail between Insein and Ôkpo, and so prevent their making a thoroughfare of the railway. The Thôngwa and Ôkkanwa villages, which are both large and flourishing villages, were connected by a short direct road. The village of Tôngyi was also connected with the railway station of that name. The Pagan-daung-Dazet road, 4 miles in length, was completed. This road is the connecting link between the large village of Kyauktan and the rôads in the Pegu district on the railway side of the Irrawaddy. The town of Henzada and the public buildings were protected from encroachments of the river by retiring the marginal bund. Besides the above a number of new bridges were built and old bridges renewed, a considerable amount of metalling was done and improvements were effected where necessary. The total length of road communication maintained in Lower Burma during the year was—

	Miles.
Metalled roads	956·75
Unmetalled roads	579·75
Other roads	1,330
Total ...	2,866·5*

There were 88 miles of new road opened during the year.

Expenditure on communications.

187. The total expenditure on communications (excluding establishment, tools and plant, and suspense) during the year was—

	Rs.
On original works	4,21,356
On repairs	6,37,353
Total ...	10,58,709

Miscellaneous public improvements.

188. Among the more important works carried out under the head of Miscellaneous public improvements may be mentioned the erection of quarters for the European light-keepers at Oyster Island and the fitting of ventilators for Double Island and Table Island light-houses, also the completion of wharves and landing-stages at Victoria Point and at Minbya and other places in the Arakan district. Numerous bazaars were completed or are in progress, several wells were sunk, and town roads improved.

Expenditure on miscellaneous public improvements.

189. The total expenditure on miscellaneous public improvements (excluding establishment, tools and plant, and suspense) during the year was—

	Rs.
On original works	2,57,206
On repairs	40,616
Total ...	2,97,822

Total expenditure on civil works.

190. The total expenditure on civil works (including all charges) was—

	Rs.
On original works	18,97,234
On repairs	8,34,685
Total ...	27,31,919
Establishment	6,31,707
Tools and plant	26,430
Suspense	18,244
Total ...	34,08,300

Minor works and navigation.

191. The following are some of the more important works under the head of minor works and navigation which have been in hand during the year.

* The total given in last year's report, namely, 2,888·25, was incorrect.

For dredging the Panhlaing creek, which connects the Irrawaddy with the Rangoon River, an estimate was sanctioned for Rs. 61,943, but owing to the fact that the dredger is unsuited to the work required of it, only about one-tenth of the work was done at a cost of Rs. 16,394. As opinions differ as to the advisability of dredging the creek, the matter is still under enquiry.

Of the Kyaikto-Bilin canal 10,000 feet were completed and another 5,000 feet are in progress out of a total length of 8 miles. The expenditure to the end of the year was Rs. 47,965. The Pagandaung and Kegan navigation drainage channel, 8½ miles in length, was completed at the cost of Rs. 85,577. The Henzada embankment was retired at—

	Rs.
Miles 18 to 20¼ at the cost of	57,227
Miles 22 to 27 at the cost of	36,791

At every mile of the Irrawaddy embankments in the Henzada, Myanaung, and Danubyu subdivisions a bench-mark of masonry to mark the highest recorded flood-level, that of 1890, was constructed at the cost of Rs. 3,513. Three retirements of the Ngawun embankment opposite miles 29—33 were begun in April 1894, but owing to early rains not completed. In July 1894 they were 18 inches above the highest flood-level. The old embankment may stand two or three years longer. The retirements have therefore been left in their present state. The expenditure on this work amounted to Rs. 27,915. Thôngwa island, it is expected, can be protected so as to allow of cultivation on 36,000 acres, of which 30,000 will be of excellent quality. An embankment 36 miles long will ensure this. Twenty-six and a half miles of this embankment have been completed at the cost of Rs. 1,27,723. Ma-ubin island embankment has been retired opposite miles 12½—14 at the cost of Rs. 36,135. The drainage of the Mudôn plain was completed this year at the cost of Rs. 37,869. The Sittang embankment diversion in the 29th and 30th miles was completed at the cost of Rs. 14,356; another diversion was in hand in mile 31; another in mile 26 was completed early in the year. The Ngatawyo and Zwebat creeks in the Pegu district were widened to improve the drainage of the Pegu plain.

Public Works (Upper Burma).

General.

193. In Upper Burma the Chief Engineer is assisted by the Superintending Engineers of the Second, Third, Fourth, and Irrigation Circles. The charges are all Imperial.

During the year of report the following changes have taken place. In the Second Circle of Superintendence the North and South Chin Hills divisions were amalgamated on the 18th July 1894 into one division styled the Chin Hills division. The Gangaw subdivision of the Chindwin division was transferred to the Myingyan division on the 1st July 1894. In the Fourth Circle the Hlaingdet subdivision was transferred from the Southern Shan States to the Meiktila division.

Expenditure.

194. The total outlay of the year from all sources amounted to Rs. 40,11,282 against a final grant of Rs. 40,97,413. The corresponding figures for last year were Rs. 50,32,563 and

Rs. 50,29,660 respectively. The outlay for the year is shown in detail in the following table :—

Departmental heads.	Imperial.			Incorporated local.	Contributions.	Total.

Military works.

195. The following are the more important military works undertaken during the year.

For lines for a Mountain Battery at Mandalay two barracks were finished; a canteen and institute were completed; one of the old barracks was dismantled and re-erected on another site to accommodate part of the Native establishment of the battery; and iron tanks, &c., for fire-extinguishing purposes were supplied. At Bernardmyo the rebuilding of the barracks, &c., destroyed by fire in the previous year was completed and the rest of the buildings had their thatch roofs replaced by corrugated-iron, except the quarterguard, an insufficient building, which it is proposed to renew entirely.

The project for housing Native troops at Falam in the Chin Hills provides accommodation of a semi-permanent type for 400 men of all ranks and quarters for officers. The following buildings were completed during the year: quarters for Field Officers, for Captains, for Subalterns, and for the Medical Officer; also an Officers' mess, one block Native officer's quarters, Hospital Assistant's house, quarter-guard, and Commissariat godown. The lines are practically complete.

At Haka in the South Chin Hills the following works were completed: Officers' quarters and mess-house, eight quarter-company barracks, Hospital Assistant's quarters, Commissariat godown, and stabling for the Mounted Infantry.

At Tiddim in the North Chin Hills barracks, &c., for 400 men were practically completed last year. During the year two Commissariat godowns and quarters for a Sergeant-Instructor in Gunnery were erected.

At Mandalay quarters for the married men and Native officers of two local regiments were built and Rs. 2,500 were expended on additional accommodation required at Maymyo.

At Loikaw in the Southern Shan States temporary accommodation was provided for a detachment of 100 men of all ranks with the usual Commissariat, Transport, and Medical buildings. The total cost was Rs. 7,853.

(a) Civil. | (b) Military 777, Civil 3,500. | (c) Military 4, Civil 608.

At Meiktila, permanent quarters were provided for the married men and Native officers of a local regiment at the cost of Rs. 21,273, the material being obtained from the dismantled British Infantry barracks at Toungoo. Barracks and the usual subsidiary buildings were erected for 100 men at this station with materials obtained from the old British Infantry barracks at Toungoo. The cost was Rs. 5,089.

At Taunggyi in the Southern Shan States two barracks of a semi-permanent type were commenced and will be finished in May 1895. They accommodate half a company.

For the Ordnance Department the following works were undertaken:—

At Mandalay a harness room, including accommodation for camp equipage and miscellaneous stores was completed at a cost of Rs. 28,065. It is of masonry throughout, with an iron roof. The enclosure wall of masonry was in progress.

A receipt, pattern, and issue and office room was completed at a cost of Rs. 21,000. It is of masonry throughout with an iron roof.

A park and magazine store-room, also a guard-room and a laboratory, were finished at a cost of Rs. 5,234, Rs. 7,583, and Rs. 15,019 respectively; the last named building still requires painting and will have to be provided with a lightning-conductor. All are of masonry throughout with iron roofs.

At Fort Stedman an armourer's shop was completed. It is on the standard plan for Native Infantry, is of masonry throughout, with an iron roof, and has cost Rs. 4,410.

For the Commissariat Department the following work was done:—

Extra temporary shelter was provided on the rationing route to Fort White at the cost of Rs. 9,139.

Two temporary rest-camps were built on the Fort White-Falam road at a cost of Rs. 3,419;

Quarters for Commissariat Sergeant and Conductor at Falam at a cost of Rs. 4,260, and similar buildings were started at Haka, but work is suspended at present under orders of the Government of India.

Godowns were completed at Falam and Haka and two were built at Tiddim.

Quarters for three Commissariat clerks were commenced late in the year at Bernardmyo and an expenditure of Rs. 1,477 incurred.

At Bhamo the Commissariat bakery was improved at a cost of Rs. 3,914 and at Meiktila an office was built with old materials from the dismantled Toungoo barracks at a cost of Rs. 3,092.

Besides the above stables for officers' chargers were built at Haka at a cost of Rs. 3,068 and temporary barracks and shelter at temporary posts on the Kalemyo-Fort White and Falam and the Fort White and Tiddim roads were put up at a cost of Rs. 18,489.

On military lines of communication and roads to hill stations the following are some of the more important works carried out:—

A permanent bridge of timber was thrown across the Pyinthazeik chaung (Chin Hills); it cost Rs. 4,424 and has three spans of 20 feet, one of 15 feet, and one of 36 feet.

A sum of Rs. 5,784 was expended on improvements to the Fort White-Dimlo section of the Fort White-Tiddim road.

A permanent suspension bridge was built over the Manipur river at a cost of Rs. 17,936. and Rs. 4,638 (against an estimate for Rs. 8,000) were spent on a new alignment of the mule-track between Falam and Minkin, a section of the Haka-Fort White road.

A new rifle-range, suitable for the Lee-Metford rifle, was built at Meiktila at a cost Rs. 4,519.

Expenditure on military works.

196. The total expenditure on military works during the year was as follows:—

	Rs.
On original works	4,26,398
On repairs	2,29,221
Total ...	6,55,619
Establishment	2,10,616
Tools and plant	7,863
Suspense	— 19,906
Barrack department	51,257
Total ...	9,05,449

Civil buildings.

197. The following are some of the more important civil buildings under construction during the year.

Post offices were erected at Falam (Chin Hills), Haka, and Myitkyina at a cost of Rs. 3,179, Rs. 3,088, and Rs. 4,590 respectively, and offices were put in hand at Mingin and Taunggyi. Telegraph offices were completed at Falam (Rs. 8,107) and Haka (Rs. 8,231), while combined telegraph and post offices were begun at Mingin and Taunggyi.

Quarters for the Political Officer at Tiddim were completed at a cost of Rs. 23,596. The quarters for the Assistant Political Officers at Haka and Falam, begun in the previous year, were completed at the cost of Rs. 6,260 and Rs. 6,831 respectively. An office was built for the Political Officer at Falam. The Residency at Taunggyi in the Southern Shan States was completed at a total cost of Rs. 45,239.

A masonry enclosure wall was built round the cemetery at Mandalay at a cost of Rs. 12,783, of which Rs. 7,000 were paid as compensation for land and kyaungs taken up. A small Protestant church was built at Yamèthin, principally for railway employés, at a cost of Rs. 3,995.

A Myoôk's Court and rest-house combined was commenced at Taungtha. A masonry record-room was built at Minbu at a cost of Rs. 18,643. The Subdivisional Court and circuit-house combined at Pale was finished at a total cost of Rs. 8,800; materials were collected for the Subdivisional court-houses at Budalin and Kalewa. A lock-up for civil prisoners was commenced at Falam. It is a masonry building and is estimated to cost Rs. 4,488. At Singu, in the Mandalay district, a combined Subdivisional and Township court-house was erected at a cost of Rs. 10,964, and in Fort Dufferin an expenditure of Rs. 5,295 was incurred in the collection of materials for the Cantonment Magistrate's court-house. In the Ruby Mines district a Subdivisional Court and rest-house was completed at a total cost of Rs. 10,027. A combined Myoôk's Court and rest-house was erected at Singaing (Kyauksè district) and cost Rs. 6,452. Another of the same design was in progress at Yindaw (Meiktilà district). A combined court-house with police office, &c., was in progress at Taunggyi for the Superintendent and Political Offices, Southern Shan States, and an expenditure of Rs. 8,276 incurred against an estimate of Rs. 11,222. The Pagan Jail was given a water-supply at a cost of Rs. 6,563: the water is pumped up from the Irrawaddy. The conversion of the temporary jail at Pakôkku into a regular jail was commenced; the estimate is for Rs. 31,930. For the central jail at Myingyan quarters were constructed for 26 free married and single warders at a cost of Rs. 5,699. The conversion of the temporary jail at Taungdwingyi into a 5th class district jail was practically completed at a cost of Rs. 36,407. Various minor subsidiary buildings necessary to complete them were commenced and completed in the jails at Mandalay, Mônywa, and Bhamo.

On Police works the expenditure was greater than usual and a number of petty works and repairs were carried out for the Public Works Department by police agency all over Upper Burma. Military and civil police lines were in progress or completed at the following places: Pasôk, Taungtha, Natogyi, Kyaukpadaung, Salè, Myingyan, Pauk, Sidôktaya, Sinbyugyun, Magwe, Ngapè, Kanni, Budalin, Paungbyin, Tamanthe, Pale, Kindat, Kyabin, Kyadet, Magyizauk,

Kin, Kalewa, Mandalay, Chaungwa, Lashio, Myotha, Chaunggu, Letpanda, Ywatha, Kwitu, Myitkyina, Namli, Kazu, Talawgyi, Mogaung, Myothit, Shwegu, Banmauk, Pinlebu, Katha, Mogôk, Thabeikkyin, Tagaung, Taunggyi, Ela, Pyinyaung, and Yindaw.

The civil hospital at Magwe was completed, a civil hospital was commenced at Mingin, and another at Mônywa, and others at Falam and Haka. The hospitals at Myitkyina, Wuntho, Mogôk, and Meiktila were completed and additions to the hospital at Kyauksè in progress.

Quarters for Civil Subdivisional Officers were in progress at Pasôk, Tagaung, Banmauk, and Pinlebu and completed at Gangaw, Maymyo, Kanbalu, Wuntho Thazi (or Meiktila road), and Pyinmana. Houses for Assistant District Superintendents of Police were in progress at Banmauk and Pinlebu and completed at Maymyo, Kanbalu, and Wuntho. A circuit-house was constructed at Myingyan at a cost of Rs. 8,397 and a house was purchased at Pakôkku as a residence for the Deputy Commissioner and another at Minbu for the Executive Engineer of that division. At Haka and Falam complete accommodation was provided for the Executive Engineer of the Chin Hills and his staff. A new office was built for the Executive Engineer at Mogôk, godowns at Haka and Falam, and a Public Works rest-house at Bamboo camp (Chin Hills). Materials were collected for the Cantonment Magistrate's house in Fort Dufferin and for the Civil Surgeon's quarters at Taunggyi, and quarters at the latter place were erected for the clerks and peons of the office of the Superintendent and Political Officer, Southern Shan States. A house was erected at Meiktila for a Superintendent of Post Offices.

Expediture on civil buildings.

198. The total expenditure on civil buildings, (excluding establishment, tools and plant, and suspense) during the year was—

	Rs.
On original works	7,75,559
On repairs	1,59,980
Total ...	9,35,539

Communications.

199. Among the more important works under the head of communications may be mentioned the improvements to the crossings of the Yaw river and permanent teak bridges on the Pakôkku-Pauk road at the cost of Rs. 29,029. Permanent bridges were also erected on the Pauk-Tilin road. The roads from Taungdwingyi to Natmauk and from Taungdwingyi to Satthwa were completed during the year, the total cost being Rs. 1,11,185 and Rs. 24,757 respectively. Some bridging was done on the Alôn-Ye-u road. On the Mandalay-Lashio road various improvements were carried out, the most important being the crossing of the Omathi swamp, where Rs. 20,390 were spent on bridging and banking. A sum of Rs. 69,884 was spent on the Fort Stedman road, on which metal was laid in parts and a number of bridges and stone causeways constructed. This road as originally designed is now practically complete, but the old timber bridges will soon need renewal and a good deal more metalling is required. There is a great and increasing cart traffic on this road. The expenditure on the road from the railway at Nahakaung to Mansi through Mawteik and Banmauk amounted to Rs. 61,719. The road is now practically complete. Twenty-one miles of the road from Myittha to Ingôn were completed at the cost of Rs. 33,868. Besides the above, various works of minor importance for the improvement of communications were carried out.

The total length of road communication maintained in Upper Burma during the year was—

	Miles.
Metalled roads	198·8
Unmetalled roads	1,392·6
Other roads	1,311
Total ...	2,902·4

There were 86·7 miles of new road opened during the year.

Expenditure on communications.

200. The total expenditure on communications (excluding establishment, tools and plant, and suspense) during the year was—

	Rs.
On original works	4,56,260
On repairs	4,71,506
Total ...	9,27,766

Miscellaneous public improvements.

201. The experimental artesian well at Yamèthin was sunk a further depth of 44 feet, or 214 feet in all, when the frictional resistance of the earth could not be overcome and the work was abandoned after an expenditure of Rs. 5,072 had been incurred.

At Meiktila an intercepting drain was excavated at a cost of Rs. 3,783 to prevent surface drainage fouling the lake, the water-supply of the town and station.

At the stations of Kindat, Bhamo, and Katha a considerable amount of jungle was cleared at a cost of Rs. 12,137. The channel of the Chindwin river between Pakôkku and Kindat was improved by clearing away of snags at an expenditure of Rs. 3,236 and the river-bank at Kindat was protected from erosion by spurs at a cost of Rs 7,860.

Expenditure on miscellaneous public improvements.

202. The total expenditure on miscellaneous public improvements (excluding establishment, tools and plant, and suspense) during the year was—

	Rs.
On original works	66,283
On repairs	12,905
Total ...	79,188

Total expenditure on civil works.

203. The total expenditure on civil works (including all charges) was—

	Rs.
On original works	12,98,102
On repairs	6,44,391
Total ...	19,42,493
Establishment	6,24,258
Tools and plant	23,329
Suspense	—28,063
Total ...	25,62,017

Minor works and navigation.

204. At Myingyan a groyne proposed to be 1,400 feet in length was completed for a length of 700 feet at a cost of Rs. 2,222, its object being to scour away the sandbank which has formed in front of the station.

The rocky channel at Ngazun in the Irrawaddy was much improved by the construction of a groyne at a cost for materials and labour of Rs. 12,589; the Irrawaddy Flotilla Company supplied all plant and skilled engineering supervision.

The escape of the large Pyogan tank in the Myingyan district was lengthened 400 feet at a total cost of Rs. 16,771. In the Shwebo district the two old Burmese tanks at Padin and Gwaik were repaired and improved at a total cost of Rs. 12,521; the old Burmese tank at Mayagan in the Ye-u district was also improved and repaired and supplied with sluices at a cost of Rs. 12,633.

The surveys have been taken and the projects for the Mandalay and Shwetachaung canals, for canals from the Môn river in the Minbu district, and the new Mu canal, Shwebo district, are all in hand. Works have been in hand on various reservoirs and channels.

Expenditure on minor works and navigation.

205. The total expenditure on minor works and navigation during the year was—

		Rs.
On original works	...	1,46,228
On repairs	...	1,72,014
Total	...	3,18,242
Establishment	...	2,24,880
Tools and plant	...	3,822
Suspense	...	—2,838

Deduct—		
Expenditure in England	...	158
Loss by exchange	...	132
Total	...	290
Net outlay in India	...	5,43,816

At the cost of Incorporated Local Funds the following works were carried out. A timber bridge 90 feet in length was erected over the Segyigyi stream on the Halingyi-Thitseingyi road at a cost of Rs. 2,700. A timber bridge 140 feet in length was constructed over the stream dividing the village of Kyaukmyaung, Shwebo district, at a cost of Rs. 4,400. In the town of Katha a total length of 3,750 feet of road was metalled at a cost of Rs. 2,136. At Pyawbwè in the Meiktila district the bazaar commenced last year was completed. The total cost was Rs. 21,559. Other bazaars were erected at Thèdaw and at Tawma at a cost of Rs. 9,766 and Rs. 3,925 respectively.

Railways.

BURMA STATE RAILWAY.

Length of line.

206. On the 1st November 1894 the section from Wuntho to Nankan, 15·5 miles in length, was opened, making a total length of 745·39 miles of line open for traffic on the 31st March 1895.

Principal events.

207. Among the principal events which occurred during the year may be noticed the amalgamation of the Burma State and Mu Valley Railways into one system from the 13th March 1895, and the opening of the Wuntho-Nankan section for public traffic.

Works completed and in progress.

208. Thirty-seven miles of line were re-laid with 50 lb. steel rails, 21 miles being on the Irrawaddy section and 16 miles on the Sittang section. Fifteen miles of five-strand iron wire fencing were substituted for the old wooden fencing which had decayed. A new saw-mill, with necessary sidings and turn-table, is in course of construction at Insein. The Rangoon station-yard has been re-arranged to facilitate traffic. Carriage examining pits have been provided at Rangoon, Pazundaung, and Kemmendine. An artesian well has been sunk at Pazundaung. Protective works are in progress at the Pyuntaza, Byu, and Sinthè bridges. An island-platform has been constructed at the Myohaung junction. The overbridge at Stockade road (Judah Ezekiel street), Rangoon, is nearing completion. Besides the above, several smaller works have been carried out where necessary. Some 1·84 miles of sidings have been laid and about 90,000 sleepers have been replaced. Staff quarters for both Europeans and Natives have been built. The Locomotive and Carriage Department at Insein has, as usual, carried out a large number of new capital works during the year.

Lines under survey.

209. The survey of the Mogaung-Myitkyina section, in extension of the Mu Valley Railway to the Irrawaddy, 40 miles, was placed under the Engineer-in-Chief, Burma State Railway, in January 1895. Satisfactory progress has been made and an easy direct route discovered, which is now being staked out.

During the year the respective merits of the three alternative routes to Myingyan that have been surveyed have been under consideration, and the scheme for extending the Meiktila branch to Myingyan is the one now recommended by the Chief Commissioner. The length of this route is 55·6 miles and its estimated cost Rs. 26,40,598, or Rs. 47,493 per mile.

Rolling-stock.

210. The work of fitting engines with duplex couplings is being continued and there are now 12 in course of alteration. It is not intended to fit shunting engines with these couplings.

Capital transactions.

211. The capital outlay on the Burma State Railway during the year ending the 31st December 1894 was Rs. 2,67,882. The total capital expenditure since the commencement has been Rs. 6,56,14,644.*

Revenue transactions.

212. The gross earnings compared with the earnings of 1893 are—

	Rs.
During 1894	62,87,354
During 1893	67,22,507
Or a decrease of ...	4,35,153

The working expenses during the same two years compare as follows:—

	Rs.
For 1894	39,64,026
For 1893	44,80,015
Or a decrease of ...	5,15,989

The net increase in earnings during the year was therefore Rs. 80,836.

Traffic and working.

213. There was a decrease in passenger traffic earnings, due principally to the continued stagnation of trade throughout the province. The tonnage of goods fell a little and so did the earnings therefrom. These results also were the outcome of the continued depression of trade in the province.

Miscellaneous.

214. Competitive trials of Thingadaw coal with other coals having proved that Thingadaw coal at the price delivered was far dearer to use than either wood or Bengal coal, it was decided not to renew the contract with the Burma Coal Company. There were no floods during the year and only two accidents, which resulted in slight damage to the rolling-stock and permanent-way.

Mu Valley State Railway.

Length of line.

215. The length of line sanctioned for the Mu Valley Railway at the end of 1894-95 was 315¼ miles, of which 158½ miles were open for traffic in March 1894. The length from Wuntho to Nankan, 15½ miles, was opened for traffic on the 1st November 1894, so that, on the 31st March 1895, the total length of line open was 174 miles, a length of 141 miles (from Nankan to Mogaung) remaining to be finished. The section from Nankan to Mohnyin, a distance of 74¼ miles, with the Katha branch, 14¼ miles, is expected to be opened after the rains of 1895, and the remaining length of 52½ miles to Mogaung in December 1895.

Works completed and in progress.

216. The length of line from Wuntho to Mogaung, including the Katha branch, is 156¾ miles. The section from Wuntho to Nankan having been made over to the Burma State Railway, it is only necessary to report on the remainder of the line under construction (141 miles).

Fourth Division.—From Nankan, mile 168¼, to Indaw, line 194. Work has progressed satisfactorily during the year; the heavy earthwork and cuttings have been practically completed and rails have been laid almost throughout the division, a gap of 4 miles only remaining. Nearly all the minor and half the number of major bridges have been completed.

* This includes Rs. 7,72,929, value of stores, &c., in stock held for construction of Mu Valley Railway unopen line rolling stock.

Combined Division.—From Indaw, mile 194, to Mogaung, mile 295, together with the branch from Nahakaung to Katha, 14¼ miles. This length was till recently divided into the Fifth and Sixth divisions, but the two were amalgamated on the 1st January 1895. Earthwork has been completed up to Mohnyin and has made fair progress onwards from there to Mogaung. Bridgework has been somewhat delayed owing to difficulties that arose in the supply of lime. In the section up to Mohnyin, nearly all the bridgework has been completed; but in the length from Mohnyin to Mogaung the construction of bridges was not commenced. Rails have been laid from Indaw to Mohnyin (including the Katha branch) on the permanent bank and on from Mohnyin to mile 280 partly on the bank and partly on the cess. The usual heavy sickness which prevailed in this division throughout the year retarded work.

Lines under survey.

217. The survey for the extension of the railway beyond Mogaung to Akyè on the Irrawaddy was completed in May 1894. A fairly good line was found, but subsequently Myitkyina having been settled on as the terminus, a fresh survey to the former place was put in hand under the Engineer-in-Chief, Burma State Railway.

Telegraphs.

Lower Burma division.

218. There has been no construction of lines of any importance, and no new cable has been laid down during the year in this division. The ordinary maintenance repairs were carried out on all lines throughout the year, except on the portion of the Kawkareik-Myawaddi line, which falls within Siamese territory. This portion of the line has been abandoned and communication with Siam during the year was carried on by the Myittha-Kanburi route; but even this was interrupted frequently on the Siamese side of the border.

There has again been a falling off in the traffic of the Rangoon office from 752,851 messages to 709,297, apparently from the same cause as last year, *i.e.*, slackness of trade; the paid messages sent have fallen from 173,217 to 170,360, those received from 186,258 to 182,462 and messages in transit from 352,860 to 321,690. With regard to combined offices there has been an increase in revenue in the case of 16 of them. The offices which showed a decrease are Kawkareik 6 per cent., Lemyethna 7 per cent., Minhla 24 per cent., Ngathainggyaung 4 per cent., Salin 10 per cent., Taungdwingyi 6 per cent. Danubyu, Dedayè and Pyinmana have not been open long enough for comparison. On the other hand, Kemmendine shows an increase of 38 per cent., Kyaiklat 51 per cent., Kyaikto 19 per cent., Mupun 35 per cent. and Yandoon 48 per cent. The number of offices remains the same at the end of the year as it was at the beginning, none having been opened or closed.

Arakan division.

219. The old coast line was dismantled, causing a decrease of 60 miles in the line mileage and 121·12 miles in the wire mileage of the division. No other alteration in mileage was effected. Eighteen bridges were erected during the year, namely, seven wire suspension bridges in the Sandoway district, five wire suspension bridges and one log pile bridge in the Kyaukpyu district, and five wire suspension bridges in the Akyab district. The following roads (or pathways) were made, most of them being across marshes and swamps. The footpath under the telegraph lines was cleared of jungle as usual. The ordinary maintenance repairs to telegraph lines, roads, and bridges were carried out.

The offices remained the same as last year, namely, Akyab, Maungdaw, Pabru, Ru, and Taungup. The number of messages decreased from 214,853 in 1893-94 to 194,791 in the year of report. There was an increase of 5,533 in the number of messages sent and of 5,547 in the messages received, the decrease being due to the decline in the number of transit messages in consequence of the adoption of Melhuish's transformers at the Akyab office, which enable Calcutta and Rangoon to work direct.

The receipts on account of private messages increased from Rs. 23,233-15-5 in 1893-94 to Rs. 31,177-15-8 in the past year. The receipts from State messages were Rs. 3,978-4-0 as compared with Rs 3,650 in the year 1893-94. None of the offices in the division is self-supporting.

Upper Burma division.

220. During the year 1894-95, 117·89 miles of line and 132·13 miles of wire were added to the previously existing telegraph lines in Upper Burma, while 86 miles of line and 79·25 miles of wire were dismantled, resulting in a net increase of 31·89 miles of line and 52·88 miles wire. The number of telegrams disposed of during the year was 1,045,286, or 102,527 less than in the previous year. The number of offices on 31st March 1894 was 60, and on 31st March 1895 62.

Post Office.

Post Offices.

221. Considerable progress was made in all branches of the business of the Postal Department. The total number of post offices open at the end of 1894-95 was 2,709 compared with 263 at the end of 1893-94.

Mail lines.

222. The total mileage served by the Post Office was as follows :—

Year.	Railway.	Mail carts or ponies.	Runners and boats.	Steamers.
1893-94	732	612	3,540	4,858
1894-95	799	607¼	3,596¾	4,766¼

The sea mail services are those performed under contract by the vessels of the British India Steam Navigation Company between Rangoon and Calcutta, Rangoon and the Coast ports both north and south, and Rangoon and Madras. There is also a service conducted by the vessels of the Asiatic Steam Navigation Company between Calcutta, Rangoon, and Port Blair. The inland mails are carried by the Burma State Railway, by the steamers of the Irrawaddy Flotilla Company and of Mr. G. Dawson, and by local boats, mail-carts and runners. All these services were satisfactorily conducted throughout the year.

Mails.

223. The amount of delivery work done by the Post Office is shown in the following figures :—

Year.	Letters and post-cards.	Newspapers.	Packets.	Parcels.	Total.
1893-94	12,245,854	2,186,975	988,654	186,697	15,608,180
1894-95	11,872,955	2,136,684	1,112,650	202,523	15,324,812
Percentage of increase or decrease	−3·05	−2·3	+12·5	+8·5	−1·8

Money orders.

224. There was a marked increase in the work of the money-order branch as shown by the following figures :—

Year.	Money-orders issued.		Money-orders paid.	
	Number.	Value.	Number.	Value.
		Rs.		Rs.
1893-94	471,582	1,74,72,764	121,420	59,84,272
1894-95	493,151	1,79,32,179	141,297	71,42,595
Increase	21,569	4,59,415	19,877	11,58,323

The amount of money misappropriated during the year by Post Office servants was Rs. 3,117-12-11, of which Rs. 1,430-4-0 were recovered.

Savings Banks.

225. The savings banks continued to be popular. New banks were opened during the year, and the total number of savings banks in the province on the 31st March 1895 was 166. The extent of the business done by this branch of the Post Office during the year was as follows:—

Year.	Deposits.		Withdrawals.		Accounts open.	Balances.
	Number.	Value.	Number.	Value.	Number.	Value.
		Rs. A. P.		Rs. A. P.		Rs. A. P.
1893-94 ...	61,095	23,15,599 5 3	27,188	17,64,287 11 4	34,697	47,55,370 9 5
1894-95 ...	64,611	21,87,682 8 5	29,300	17,54,500 7 3	38,552	52,80,381 13 3
Increase	3,516	.....	2,112	.....	3,855	5,25,011 3 10
Decrease	...	1,27,916 12 10	...	9,787 4 1	.....	.....

Insurance and Value-payable systems.

226. The total amount of work done in the conveyance of insured and value-payable articles was as follows:—

Year.	Insured articles.			Value-payable articles.			Ordinary.
	Number.	Value.	Insurance fees.	Number.	Amount specified for recovery.	Commission.	
		Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs. A. P.	
1893-94 ...	7,810	26,55,066 3 1	7,207 2 0	36,737	6,77,945 14 0	10,142 12 0	56,730
1894-95 ...	11,288	60,86,907 1 9	15,891 8 0	43,075	7,33,505 4 0	10,920 1 0	58,235
Increase...	3,478	34,31,840 14 8	8,684 6 0	6,338	55,559 6 0	777 5 0	1,505

Miscellaneous.

227. Ten Post Office servants were convicted of offences punishable by law against twelve in 1893-94.

V.—REVENUE AND FINANCE.

1.—Revenue.

(*a*) *Lower Burma.*

228. The following statement exhibits the demand, the remission, and the net demand under each head of revenue during the past two years for Lower Burma :—

Item of revenue.	1893-94.			1894-95.			Increase or decrease.
	Demand.	Remissions.	Net demand.	Demand.	Remissions.	Net demand.	
LOWER BURMA.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1. Land revenue ...	1,07,70,365	55,287	1,07,15,078	1,06,52,590	48,209	1,06,04,381	— 1,10,697
2. Customs ...	65,26,817	...	65,26,817	87,17,380	...	87,17,380	+21,90,563
3. Capitation-tax ...	39,03,714	16,688	38,87,026	38,91,180	29,341	38,61,839	— 25,187

12. Registration ...	51,372	...	51,372	55,699	...	55,699	+ 4,327
Total ...	3,27,22,319	77,651	3,26,44,668	3,43,99,255	79,918	3,43,19,337	+16,74,669

Land revenue.

229. The gross land revenue demand of the year was Rs. 1,06,52,590 against Rs. 1,07,70,365 in the previous year. These figures include the tax on fruit trees assessed separately from land. The area of assessed paddy-lands, including fallows taxed at lower rates, was 5,420,256 acres against 5,320,288 in the previous year. The area of lands under other crops also increased slightly. The diminution in gross demand, which occurred chiefly in the Hanthawaddy, Pegu, and Thôngwa districts, was due to the ravages of cattle-disease, which forced cultivators to let their fields lie unploughed, and to agricultural depression, which prevented non-agriculturist landlords from obtaining tenants. The majority of districts indeed showed small increases of assessed area. The collection of the land revenue was less troublesome than in 1893-94. After the deduction of Rs. 1,65,410 remitted, the net demand was Rs. 1,12,24,196, of which Rs. 1,07,66,207 were collected and Rs. 4,57,989 (against Rs. 7,06,579 in the previous year) were left outstanding on the 31st March. In Kyaukpyu out of a current demand of Rs. 1,78,912 and an arrear demand of Rs. 71,053 no less than Rs. 1,06,322 were left uncollected at the end of the year. The Hanthawaddy, Pegu, and Thôngwa districts showed Rs. 48,955, Rs. 13,459, and Rs. 24,796 under remissions of arrear demand. These sums were mostly irrecoverable, the lands on account of which the arrears accrued being unsaleable. In Myaungmya, Toungoo, and Shwegyin the whole demand was collected within the year.

Capitation-tax.

230. The gross demand on account of capitation-tax was Rs 38,93,932 against Rs. 39,03,727 in the previous year, and the number of assessees fell from 946,014 to 940,852.

The decrease is attributed to the return of Upper Burmans to their homes from the districts of Hanthawaddy and Pegu, to cholera in Kyaukpyu, to forest laws in Thayetmyo, and to mismanagement in Shwegyin and Henzada. Remissions increased in every district but Henzada, Tavoy, Toungoo, and Salween; they were largest in Tharrawaddy. The net demand fell from Rs. 38,87,026 to Rs. 38,61,839 and the outstandings rose from Rs. 2,752 to Rs. 9,570. The arrears were due almost entirely in Kyaukpyu and Thôngwa. The total of persons exempted fell from 107,043 to 103,840.

Fisheries.

231. The gross demand of fishery revenue was Rs. 16,01,429, being Rs. 2,01,463 below that of 1893-94. The net demand was Rs. 15,99,378 and the collections were Rs. 15,85,261, or Rs. 1,52,715 below the yield of the previous year. The commercial depression of 1893-94 acted upon the fisheries in three ways. It lowered the demand for, and consequently the price of, fish; it raised the rate of interest and so rendered it difficult for fishery lessees to borrow money; and it depreciated the value of land and so made it more difficult and more costly for the lessees to provide adequate security for their payments of rent. The results were seen in the surrender of 97 leases in the Thôngwa district and in a drop of two lakhs in the rents of leased inland fisheries in Myaungmya and Thôngwa. In spite of the attention lately given to the issue of net licenses the revenue from them decreased. The Mergui pearl fisheries showed a decrease of revenue which was due to certain irregularities in the dates of payment. The system of leasing the fisheries has been settled, after consideration of the expert's report, but the industry has not progressed to the anticipated extent.

Salt excise.

232. The demand of Rs. 1,87,185 was Rs. 2,087 below that of the preceding year, and the collections, which amounted to Rs. 1,70,374, were Rs. 11,861 less than in 1893-94. The Kyaukpyu district was responsible for Rs. 26,848 of decreased yield and Rs. 6,913 of increased outstandings, in consequence, it is said, of over-production in the previous year. The three seaboard districts of the Irrawaddy division taken together also showed a decrease, but Hanthawaddy, Amherst, and Tavoy showed increases.

Process of collection.

233. There was a considerable increase in preliminary processes issued for realization of revenue. Thus, 27,992 notices, 13,963 warrants of arrest, and 12,788 orders of attachment were issued against 23,457 notices, 7,166 warrants, and 8,203 orders in the previous year. Sales of property also increased and numbered 2,468 against 1,766. But the other ultimate process, namely, imprisonment of the defaulter, was resorted to in only seven cases against 15 in the previous year. Sales were most numerous in the Hanthawaddy, Pegu, Prome, and Thôngwa districts, and many of them realized nothing as no one would purchase.

Stamps.

234. The gross stamp revenue was Rs. 13,57,909, being Rs. 96,002 more than that of 1893-94. The charges were almost identical with those of that year, the net revenue being Rs. 13,15,453 against Rs. 12,21,656, and reaching the highest amount that the stamp revenue of Lower Burma has ever yielded in any one year. The improvement was shared by all four divisions, but not by all districts, and it occurred under each kind of stamps except foreign bill, bill of exchange, and other general stamps. The precise causes of these variations cannot be indicated with any exactness, but the depression in general trade, every branch of which continued to feel the bad effects of the rice millers' combination, was in the main accountable for the decrease. There was less speculation in rice shipments to the Straits Settlements, less hypothecation of land, and greater difficulty in borrowing money on the security of land. On the other hand, the revenue from court-fee stamps was aided to a considerable extent by litigation on the part of money-lenders, who became alarmed and pressed the cultivators keenly for payment of outstandings.

Opium excise.

235. As the main event of 1893-94 was the introduction of the new Opium Regulations, so the principal interest of 1894-95 lay in the history of their working in Lower Burma.

The amount of opium sold from treasuries to licensed vendors fell from 44,620 to 11,593 seers, and the amount sold by direct Government agency rose from 375 to 681 seers. The license fees rose from Rs. 3,97,574 to Rs. 9,11,087. In Rangoon and some other places there were special reasons for the rise of fees, but on the whole the realization of this large amount, which exceeds the sum obtained under the old rules before the consumption of opium by Burmans was restricted, may be attributed to a general expectation that illicit importation and illicit sales would be checked by the extra preventive and detective establishments entertained. The quantity of opium confiscated rose from 39,414 to 49,424 tolas. But on the other hand, the number of offences reported, of persons arrested, of persons convicted, and of persons imprisoned was less than in the year preceding. The consumption of opium by Burmans has probably been materially reduced. The diminution of legitimate issues from 44,995 to 19,275 seers must have had considerable effect, though possibly the secret demand has been and may still be partially met by increased secret supplies. There are signs, indeed, of a new development in the secret trade, since opium is now brought down from Upper Burma as well as from Bengal. The non-Burman demand in Upper Burma seems to be supplied largely by smuggled Shan or Chinese opium, while the Bengal opium issued from Upper Burma treasuries is sent down to Lower Burma. The extra cost of the preventive establishment since the revision of the rules has been in Lower Burma Rs. 1,649 per mensem. Three shops, all in the Amherst district, for the retail sale of opium were closed. Seventeen remained, from which the Government derived Rs. 9,11,087 in license fees and Rs. 6,70,515 by the sale of opium. The gross receipts from opium fell from Rs. 18,35,476 to Rs. 15,96,117 in consequence of the large diminution of the quantity of opium sold. The result of the restrictive measures and of the competition for licenses was to raise the incidence per seer of the gross revenue from nearly Rs. 41 to over Rs. 82 and to enhance the retail price of opium, *i.e.*, the price at which it is bought by the consumer, throughout Lower Burma. The lowest retail price shown in the returns was Rs. 1-4-0, while the highest was Rs. 1-14-0 for raw and Rs. 2-2-0 for prepared opium. The license fees were abnormally low in 1893-94 because that was a period of transition and the licenses were sold from month to month up to the 31st December. In 1891-92 51,725 seers gave an average revenue of nearly Rs. 43 per seer, while in 1892-93 there were issued 64,127, which gave a revenue of about Rs. 40-8-0 per seer. The Government sale centres, or depôts for retail vend by direct Government agency, worked smoothly enough, but both at Shwegyin and at Myaungmya considerable illicit sales in the area served by the depôts were suspected. Enquiries concerning the sale of opium by non-Burmans and registered Burmans to non-registered Burmans were completed and left no doubt that the practice prevailed to a greater or less extent all over Lower Burma. But the Chief Commissioner decided that the practical difficulties preventing the registration of non-Burmans were so great that no action in that direction should be proposed. As some check upon the practice, the officers in charge of sales at Government depôts in Arakan were directed not to allow the purchase in a month by a registered Burman of more than a quantity reasonable for his own consumption.

Liquor excise.

236. The following statement compares the receipts on account of liquor in 1894-95 with the receipts of 1893-94:—

Year.	Customs duty on imported foreign liquor and spirit of all kinds.	Excise duty on distillery liquor and spirit.	License fees for sale of distillery and foreign liquor and spirit.	License fees for manufacture and sale of country spirit.	Licenses for sale of country fermented liquors.		Total.
					Tari.	Rice-beer.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1893-94	8,82,199	2,29,079	6,80,039	76,051	3,11,756	5,54,605	27,33,729
1894-95	8,81,885	1,38,834	5,94,837	79,769	2,92,774	5,11,771	24,99,870

There was a decrease under each head of revenue except license fees for the sale of country spirits. The depression of the standard of living consequent on the low paddy market of 1893-94 was doubtless responsible for the diminution. The distilleries at Toungoo and Moulmein continued to work, but the depôts at Akyab and Bassein were closed and the Rangoon distillery was not re-opened. The outturn of the Toungoo distillery was 752 gallons more, and of the Moulmein distillery 2,084 gallons less, than in the preceding year. The imports of Madras spirit fell from 21,557 gallons to 8,472 gallons. The decrease seems to have been due partly to a decreased consumption of alcoholic liquor in general, owing to depression of trade, and partly to the competition of the country spirit shops. It does not seem that distillery spirit was supplanted by spirits made in Europe. The beer brewed by Messrs. Dyer and Company in Mandalay was even less successful than in 1893-94, the amount of revenue produced by 19 licenses being only Rs. 13,115 against Rs. 21,936 realized from 17 licenses in the year preceding. From several districts the beer is reported to be unpopular. Another opening has been given to it by permitting it to be sold at hotel bars.

The license fees obtained at the auctions for the shops which deal in foreign liquor and spirit also fell considerably, namely, from Rs. 6,02,057 to Rs. 5,23,046. Shopkeepers' licenses everywhere showed a decrease, and the majority of districts showed a decrease also in combined licenses. But for public houses Rs. 13,730 were obtained against Rs. 12,670 in the preceding year. Depression of trade is the explanation generally given for the decrease and is probably correct. In 10 out of 20 districts one or more outstills were allowed. The total number of licenses was 34 against 36 in the preceding year. The revenue advanced from Rs. 76,051 to Rs. 79,769. In Tavoy and Mergui, where country-made beer is unknown, there were 14 shops subsidiary to outstills. In these districts the license fees for outstills increased. Two hundred and twenty-seven licenses spread over 11 districts were granted for the vend of various kinds of beer made after the native fashion. In Hanthawaddy and Thôngwa districts one each and in Prome district two more licenses were given than in 1893-94. The fees aggregated Rs. 5,11,771, being Rs. 42,834 less than in the preceding year, but Rs. 18,905 more than in 1892-93. Licenses for the sale of tari were given in every district except Salween and the Arakan Hill Tracts. The total number of licenses, which was 857, exceeded by one that of the year preceding, but the fees decreased from Rs. 3,11,403 to Rs. 2,92,506, and were also below the amount realized in 1892-93. The largest decrease was in Akyab, where the purchasers of licenses in the preceding year are said to have been under the mistaken belief that they could establish a drinking-shop in every palm garden in their area of consumption. Illicit sales of tari are very common, and in the Prome district farms of the privilege of selling tari throughout a circle and of opening as many shops as the Deputy Commissioner may consider necessary are being tried.

Income-tax.

237. No extension of operations under the Income-tax Act took place during the year. The tax was levied from the general inhabitants of 88 towns and villages of Lower Burma as in 1893-94, and from Government servants and pensioners in both Upper and Lower Burma. The original demand, apart from the amount deducted from salaries and pensions of Government servants and from the interest on Government securities, was Rs. 5,95,583 compared with Rs. 5,86,867 in 1893-94. After revision of the assessment by Collectors and Commissioners, the final demand was Rs. 5,31,288 against Rs. 5,19,826 in that year. Of this sum Rs. 5,27,914 were actually collected, and Rs. 11,240 recovered on account of fines and arrears brought the total collections under the Act to Rs. 5,39,154 against Rs. 5,49,577 in the previous year. The aggregate proceeds of the tax from all sources for the year amounted to Rs. 7,65,186 and in 1893-94 to Rs. 7,55,013, the outstandings on 31st March 1895 being only Rs. 3,475. In the gross collections the increase of Rs. 15,000 from Government servants' salaries was balanced by a decrease under "Other sources;" salaries of private individuals yielded about the same as in 1893-94; and the total increase of Rs. 10,000 was composed of Rs. 3,000 from salaries paid by local authorities, of Rs. 6,000 from Companies' pro-

fits, and of Rs. 1,000 from interest on Government securities. Government servants being excluded, the number of persons assessed to income-tax on salaries was 3,938 against 2,967 in 1893-94. The fluctuations in the number of persons assessed were trifling except in the town of Rangoon, where the number of assessees increased by 992. This increase, which raised the total for Rangoon above that of 1892-93, was partly due to the fact that some persons, who received fees for conducting examinations, were counted several times over. The final demand under this Part was Rs. 1,07,171 against 3,879 persons, and at the close of the year only Rs. 620 were outstanding, a still further improvement on the satisfactory results of the previous year. The popularity of the contract system was not maintained, eight fewer mercantile firms in Rangoon having accepted it than in 1893-94. The collections under that system amounted to Rs. 28,534 against Rs. 33,322. Outside Rangoon only eight companies were assessed, the amount of tax recovered from them being Rs. 3,282. In Rangoon the number of companies included in the original demand of the year was 111, of which 69 were struck off because their chief offices were in other provinces. After revision, the total final demand was Rs. 91,584 from 49 companies compared with Rs. 85,815 from 122 companies in 1893-94. Out of the abovementioned amount Rangoon contributed Rs. 88,302. The entire demand was recovered. A number of Chetty firms in Moulmein, formerly taxed under Part II, were in the year of report included under Part IV. The amount of tax realized from interest on securities was Rs. 8,873, of which Rs. 2,840 was payable on securities of the Government of India and Rs. 6,033 on debentures of the Rangoon Municipality and Rangoon Port Trust. The total collections in 1893-94 amounted to Rs. 7,743. The increase was mainly due to the holding of a larger quantity of Government promissory notes in Rangoon. There was a considerable decrease in the number of assessees and a slight decrease in the demand from "other sources of income" as compared with 1893-94. It would have been greater but for the transfer to this part of the schedule of a number of Chetty money-lenders who had hitherto been assessed under Part II. The original demand of the year under this Part was Rs. 3,89,489, assessed on 10,507 persons, against Rs. 3,90,052, assessed on 11,679 persons, in 1893-94. The result of the revision of these assessments by Collectors and Commissioners was the reduction of the demand to Rs. 3,26,500 on 9,380 persons. Including a sum of Rs. 8,977, arrears brought forward from the previous year, the total net demand for 1894-95, after all revisions and remissions had been allowed for, was Rs. 3,34,802, the whole of which, except the small sum of Rs. 2,776, was recovered within the year. The total amount remitted was Rs. 675. The final demand, though nearly identical with that of the previous year, was presented to 9,380 persons against 10,530. There were variations in several districts, but in Rangoon alone the number of assessees decreased by 984. The actual collections of 1894-95 in the Arakan division were only Rs. 40 below the total demand, and in the Irrawaddy division Rs. 349, while in Tenasserim they were only Rs. 8 below it. The final demand in Rangoon, which yielded about two-thirds of the entire assessment under this part of the schedule, was Rs. 5,336 more than in 1893-94. The net assessment on incomes of Rs. 2,000 and over, after all appeals and objections had been disposed of, was Rs. 1,47,424 on 775 persons compared with Rs. 1,36,842 on 980 persons in 1893-94, and the demand on incomes below Rs. 2,000 was Rs. 34,699 on 2,219 persons against Rs. 40,888 on 2,996 persons. The average demand from each person was Rs. 61 against Rs. 45 in 1893-94. In Akyab, Kyaukpyu, Pegu, Prome, and Thayetmyo trade was still depressed and decreases occurred. In Moulmein also there would have been a decrease but for the transfer to this section of Chetty firms. The improvement which showed itself in the administration of the Act in 1893-94 was maintained in the year of report. The difference between the original and final demand amounted to Rs. 64,295 against Rs. 67,041 in 1893-94 and Rs. 82,448 in 1892-93. There was less friction in connection with the recovery of the tax and there were fewer fines and penalties and smaller receipts under that head. Particulars of the extent to which coercive measures had to be adopted for the recovery of the tax in each of the past three years are given in the following table.

Year.	Warrants issued.		Realized.					
			Before distraint.		*After distraint, but before sale.*		*By sale of property.*	
	Number of persons.	Amount of tax.	Number of persons.	Amount of tax.	Number of persons.	Amount of tax.	Number of persons.	Amount of tax.
		Rs.		Rs.		Rs.		Rs.
1892-93	855	24,176	551	17,486	82	1,112	7	84
1893-94	1,669	53,756	1,407	45,164	117	5,735	63	1,373
1894-95	927	19,915	588	13,702	78	1,133	10	83

In Rangoon the number of warrants issued was only 297 against 924 in 1893-94 and it was found necessary to resort to the sale of property in two cases only, representing a sum of Rs. 15, compared with 50 cases representing Rs. 1,220 in that year. In the Pegu district there was again resistance to the tax, and both there and in the Prome district a considerable amount of coercion had to be applied, although only six actual sales of property were found necessary. Elsewhere the tax was collected without more than the ordinary difficulties inseparable from the recovery of an impost of this nature. A satisfactory feature was the moderate cost of collecting the tax. In 1894-95 it amounted to Rs. 21,236 and was equivalent to 2·78 per cent. of the total net collections.

(*b*) *Upper Burma.*

238. The following statement exhibits the demand, the remissions, and the net demand under each head of income in Upper Burma during the past two years :—

Item of revenue.	1893-94.			1894-95.			Increase or decrease in demand.
	Demand.	Remissions.	Net demand.	Demand.	Remissions.	Net demand.

Thathameda.

239. The number of households assessed to thathameda was 583,497 against 559,042 in the previous year. Mandalay and the Upper Chindwin were the only districts which showed a decrease. In the former district cholera and failure of crops were said to have caused a temporary emigration, but the decrease seems also to have been due to the incorrect inclusion in the assessment-roll of 1893-94 of persons who should have been omitted. In the Upper Chindwin district the decrease was due to the non-assessment of bachelors and others who had been wrongly counted as separate households in the previous year. The average incidence per household throughout Upper Burma was Rs. 9-13-0, the same as in the preceding year, and the gross demand rose from Rs. 54,90,719 to Rs. 57,79,838. In the Shwebo district, which was the last to recover from the bad harvests of 1891-92 and 1892-93, the full rate of Rs. 10 was in the year of report assessed over the greater part of the dis-

trict. In Kyauksè it was decided to return to the method of maintaining the distributary irrigation channels which prevailed under the Burmese Government, and under the British Government up to 1893. Accordingly the rate of thathameda was lowered to Rs. 7, and the villagers were made responsible for keeping up the distributaries while the Public Works Department undertook to look after the headworks and main canals. The collections of thathameda aggregated Rs. 56,25,951 on account of current demand and Rs. 60,508 of arrears, and Rs. 1,20,852 were left outstanding at the close of the year. This amount, which exceeded the previous year's balance by Rs. 31,579, was mainly attributable to failure of dry crops in Minbu and Thayetmyo and consequent postponement of collections.

State land.

240. The State land revenue demand was Rs. 14,16,314 against Rs. 10,55,924 in the previous year. The increase is, however, deceptive, since the total is swelled by Rs. 2,81,927 on account of the assessment on the *kaukkyi*, or main rice crop, of 1893-94 in the Kyauksè district, which was delayed under circumstances explained last year. If this sum is changed from the year of report to the previous year, the demand for 1894-95 becomes Rs. 11,34,387 and is over two lakhs of rupees less than the proper demand of 1893-94. Several circumstances combined to produce this decrease. Floods and a deficiency of water from the irrigation channels in Mandalay; the low price of paddy in Bhamo; floods in Sagaing; reduction of both area and rates in Upper Chindwin; failure to clear out the irrigation channels in Kyauksè; and change of system of assessment in Yamèthin are the main causes assigned. The collections for the year of report aggregated Rs. 11,30,316, and Rs. 2,33,547 recovered on account of arrears, swelled the total to Rs. 13,63,863 as compared with Rs. 9,60,061 in the preceding year. The collections were raised by the same abnormal cause as the demand. The outstandings rose from Rs. 2,51,641 to Rs. 2,75,012. In Mandalay district the arrears were the result of changing late in the year from the new rates proposed by the Settlement Officer to the old rates ascertained by the thugyis. In Kyauksè it was thought expedient not to press the people very hard since the previous year's demand had come late and the season was not good. In other districts the uncollected balances were not large in themselves, but in some cases they formed a large percentage of the demand. In Yamèthin, Upper Chindwin, Ruby Mines, and Shwebo over 10 per cent. was left outstanding.

Other revenue.

241. Miscellaneous land revenue collection for the year excluding arrears rose from Rs. 6,82,243 to Rs. 9,88,194, owing mainly to the recovery of rent from the Ruby Mines Company and to increased yield of water-rates. Fisheries produced Rs. 3,06,128 against Rs. 3,07,406 in the previous year, but this decrease was owing to the non-realization of Rs. 18,386 of the demand, which was nearly Rs. 4,000 above that of the previous year. Water-rate was collected in nine districts and brought in Rs. 1,93,460 against Rs. 87,689 in the previous year. A considerable part of the increase was due as in the case of State land revenue to the collection of two years' revenue in one. In point of fact the assessment in the Kyauksè district, which is the most important district for irrigation works, decreased owing to delays in the clearing of the channels. In Meiktila there was an increase, satisfactory in every way, from Rs. 42,273 to Rs. 69,690. In consequence of increased activity in the Shwebo district the collections on account of salt excise rose from Rs. 8,852 to Rs. 14,035. There remained uncollected Rs. 4,473, all in the Shwebo district.

Process of collection of revenue.

242. The total number of processes employed in the realization of the revenue was 8,573, a number largely in excess of the previous year's figures. Arrests increased from 627 to 1,236, imprisonments from 6 to 14, sales of moveable property from 85 to 114, but sales of land fell from 13 to 5.

Agricultural advances.

243. The amount lent to agriculturists in the year of report was Rs. 1,00,895, being nearly a lakh less than in the previous year. The loans were generally applied to the purchase of seed-grain and cattle, and were given most largely in the Shwebo district, where

Rs. 28,000 were taken. The recoveries in 1894-95 amounted to Rs. 2,50,179 for the whole of Upper Burma and the outstanding loans on the 31st March 1895 totalled Rs. 2,56,453.

Stamps.

244. The gross revenue from stamps was Rs. 3,36,595 compared with Rs. 2,99,668 in 1893-94. The charges were Rs. 12,872 against Rs. 9,917, and the net revenue Rs. 3,23,723, or Rs. 33,972 more than that of 1893-94. There was a trifling decrease in the Northern division and a substantial increase in the other three, particularly in the Eastern division. The most marked increase occurred in the revenue from court-fee stamps, which has never before been so high. No particular reason is known for the increase, nor for the trifling decline in sales of one-anna receipt stamps, except that the exposure of the fraudulent use of these latter by money-lenders on documents requiring stamps of much larger value led to fewer purchases of one-anna receipt stamps.

Opium excise.

245. The opium revenue was in 1894-95 for the first time administered in entire accordance with the new rules and 5,704 seers of opium yielded a gross revenue of Rs. 3,23,310 against Rs. 2,47,521 yielded by 7,303 seers in the previous year. This result was due, firstly, to the replacement of Shan and Chinese opium, which pays a duty of only Rs. 15 per viss (3·65 lbs.), by Bengal excise opium, which is issued at Rs. 32 per seer from the treasuries, secondly, to the enormous rise in the license fees from Rs. 69,485 to Rs. 1,48,495, and thirdly (and to a very small extent), to the establishment of two new shops in the Bhamo district. The increase in license fees was not clearly explained and there seemed reason to fear that, partly at all events, it was due to speculation on the chance of being able to evade the law. The distribution among districts of licenses to native doctors and tattooers was capricious. There can be little doubt that persons following these occupations supply themselves with opium illicitly. Experience shows that the smuggling of Chinese opium into the Bhamo and Myitkyina districts is practised on a large scale.

Liquor excise.

246. The following statement exhibits the Upper Burma liquor revenue of 1893-94 and 1894-95 under the main heads of receipt:—

License fees for spirit and liquor manufactured after the European method at distilleries and breweries in Upper Burma.		License fees for imported liquor and spirits.		License fees for country spirit and fermented liquor other than tari.		License fees for tari.		Duty on liquor and spirit passed out of a distillery or brewery.	
1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
31,904	29,064	1,17,705*	1,00,957	40,030	30,235	68,769	74,732	94,715	1,12,740

The revenue of Upper Burma from duties and licenses for the sale of alcoholic liquors amounted to Rs. 3,47,728 against Rs. 3,53,123 in the preceding year. Only tari licenses and duty on distillery products showed an increase. There were, as before, three distilleries and one brewery at work. The output of both the brewery and the distilleries increased, but it appears that the amount of spirits issued duty free rose from 10,000 to 15,000 gallons. Orders have been issued for preventing the abuse of the privilege accorded to the Sikhs and Gurkhas of the Upper Burma Military Police and the Burma Regiments. The licenses for the vend of distillery spirits and those for the sale of Messrs. Dyer and Company's beer both realized less than in 1893-94. The shops for the sale of foreign liquor yielded Rs. 1,29,671 in license fees against Rs. 1,49,259 in the previous year. The decrease in revenue was common to all districts, except

* Revised figures.

Pakôkku, in the case of shopkeepers' auctioned licenses, but was confined to Mandalay, Ruby Mines, Upper Chindwin, Yamèthin, and Myingyan in the case of combined shop and public house licenses. The return of convictions for drunkenness showed eight Burmans and two non-Burmans in the year of report against 10 Burmans and 21 non-Burmans in the previous year. With the exception of one at Taungdwingyi in the Magwe district, all the outstills were in those districts of the Northern division which are inhabited largely by non-Burman races. The revenue fell in that division from Rs. 38,430 to Rs. 29,185. The tari revenue was progressive in all districts but Mandalay, Ruby Mines, Upper Chindwin, Pakôkku, and Yamèthin. The aggregate revenue was Rs. 74,732 for 78 licenses against Rs. 68,769 for 75 licenses in 1893-94.

2.—Finance.

Lower Burma.

247. The following statement exhibits the gross receipts and expenditure for the two years 1893-94 and 1894-95 distributed between Imperial, Provincial, Incorporated Local, Excluded Local, and Municipal Funds. Debt and remittance transactions have been excluded from the figures under Imperial, Provincial and Incorporated Local Funds. The transactions of the Rangoon Port Trust Fund and the Rangoon Municipality are included in these figures, although the Funds do not bank with Government.

	1893-94.		1894-95.	
	Receipts.	Expenditure.	Receipts.	Expenditure.
	Rs.	Rs.	Rs.	Rs.
Imperial	2,01,92,595	16,23,147	2,40,19,666	15,69,853
Provincial	1,93,89,675	2,02,96,203	1,74,79,806	2,02,80,735
Incorporated local	13,00,150	13,19,578	13,56,211	14,35,696
Excluded local	20,88,290	22,45,731	27,10,888	23,49,758
Municipalities	27,10,926	31,78,584	34,41,819	37,18,452
Total ...	4,56,81,636	2,86,63,243	4,90,08,390	2,93,54,494

Imperial Revenue.

248. There is a net increase in Imperial receipts of Rs. 38,27,071 as compared with the previous year, which is made up as follows:—

	Rs.
Increases.	
Land revenue	21,39,465
Stamps	24,126
Customs	26,65,651
Assessed taxes	866
Registration	1,714
Interest	4,139
Receipts in aid of superannuation	4,649
Stationery and printing	6,483
Miscellaneous	104
Military works	725
Total ...	48,47,922
Decreases.	
Opium	1,87,398
Salt	4,91,443
Excise	2,19,431
Forest	1,07,572
Civil works	15,007
Total ...	10,20,851
Net increase ...	38,27,071

249. The increase under Land Revenue is due to the special contribution of Rs. 18,00,000 from Provincial Revenues to Imperial ordered by the Government of India in their Finance and Commerce Department letter No. 1126A., dated the 1st March 1894, and to collection of arrears of the previous year in the year of report. Under Stamps the improvement was due solely to a greater sale of court-fee stamps owing to increased litigation. The better receipts under Customs were owing to the new Customs duties and to an improvement in the export trade in rice. A greater amount of interest was realized in the year under report on the loan to the Lord Bishop for the construction of the Cathedral, hence the increase under Interest, while larger receipts from subscribers to the Civil Funds produced the better result under Receipts in aid of superannuation. Larger supplies of stationery to the Burma State Railway advanced the receipts under the head Stationery and Printing.

250. The falling off under Opium is due to the restrictions imposed on the sale of the drug, that under Salt to a decline in local manufacture and to the heavy clearances of imported salt about the close of the previous year, when it was thought by purchasers that the duty was about to be raised. The restriction on the sale of opium is also solely responsible for the falling off under Excise. This head would otherwise have shown an advance owing to the receipts from license and distillery fees having been better than in the previous year by about three lakhs of rupees. Under Forest the falling off occurred chiefly in the Pegu circle, in which all the the heads of receipt fell short of those of the previous year as shown below.

	1893-94. Rs.	1894-95. Rs.
1. Timber and other produce removed by Government agency	8,77,553	7,85,412
2. Timber and other produce removed by consumers or purchasers...	3,70,038	3,10,871
3. Confiscated drift and waif wood	40,958	24,882
5. Miscellaneous	15,199	13,004

In the Tenasserim circle the receipts from timber and other produce removed by consumers have been better than those of the previous year by Rs. 42,737, those from confiscated drift wood by Rs. 23,378, and those from forests not managed by Government by Rs. 7,696. Under Civil works there was a special receipt in 1893-94 on account of arrears of rent from 3rd July 1888 of the Danidaw saw-mills leased to the Bombay-Burma Trading Corporation, Limited.

Imperial Expenditure.

251. On the expenditure side there is a net decrease of Rs. 53,294 as compared with the year 1893-94. The gross decrease is Rs. 1,03,276, which has occurred as follows :—

	Rs.
Refunds	2,201
Stamps	1,491
General Administration	8,295
Ecclesiastical	3,780
Military works	84,216
Petty decreases under Civil furlough and absentee allowances, Territorial and political pensions, and Civil works	3,293
Total ...	1,03,276

But this was partly counterbalanced by an excess expenditure of Rs. 49,982, the details of which are given below :—

	Rs.
Excise	14,943
Forest	20,537
Political	10,140
Petty excesses under certain other heads	4,362
Total ...	49,982

252. The decrease under Refunds occurred chiefly in the refund of stamp revenue, but it was largely counterbalanced by an increase under refunds of Land revenue and Customs export duties. Under Stamps the supplies from Central Stores have not been as high as in the previous year. Under General Administration there was special expenditure in 1893-94 on account of compensation to the extent of Rs. 7,216 paid to Mr. T. Hesketh Biggs, Comptroller, and in pur-

chasing net bags for the Currency Department. The absence of the Lord Bishop on long leave accounts for the decrease under Ecclesiastical. There has been less expenditure on Military works, both original and repairs, in the year under report.

253. The increase under Excise is due to the employment of additional establishment and to heavier outlay on rewards than in the previous year. Under Forest larger expenditure on establishment in both the Pegu and Tenasserim circles and on account of timber removed by Government agency and for drift and waif wood charges account for the increase. There has been a special expenditure under Political in the year under report on account of a moiety of the salary of Mr. Scott as Chargé d'Affaires, Bangkok, which was charged to Burma under the orders of the Secretary of State.

Provincial Revenue.

254. The Provincial Revenue shows a net falling off of Rs. 19,09,869 as compared with the previous year. The gross decrease amounts to Rs. 21,10,368, which has occurred as follows:—

	Rs.
Land revenue	16,49,635
Excise	73,144
Forest	1,07,572
Police	37,169
State Railways	2,34,654
Petty decreases under other heads	8,194
Total ...	21,10,368

255. These decreases were partly made up by an improvement of Rs. 2,00,499 as per details given below:—

	Rs.
Stamps	72,378
Courts of Law	7,722
Jails	11,370
Marine	16,993
Receipts in aid of superannuation	3,402
Miscellaneous	15,825
Minor works and navigation	33,398
Civil works	35,448
Petty increases under other heads	3,963
Total ...	2,00,499

256. The falling off under Land Revenue is due to the transfer of Rs. 18,00,000 to Imperial as mentioned in paragraph 249 above. The receipts under the heads Stamps, Excise, and Forest are divided in a fixed proportion between Imperial and Provincial, and the variations under these heads have been explained under the Imperial section. The decrease under Police is due to special receipts in 1893-94 on account of the additional police quartered in Rangoon after the riots between the Hindoos and the Mahomedans and that under State Railways was the result of an unfavourable paddy market.

257. The improvement under Courts of Law was chiefly due to increased copying fees and sale-proceeds of excise confiscations, that under Jails to better receipts on account of hire of convicts, and that under Marine to Coast light-dues. The contribution made by Mr. Foy, Executive Engineer, whose services were temporarily lent to the Rangoon Municipality and the annuity deduction of Mr. Hall, C.S., the President of the Rangoon Municipality, advanced the receipts under Receipts in aid of Superannuation, while the lapse of certain heavy items of deposit caused the increase under Miscellaneous. The better result under Minor Works and Navigation is due to increased traffic through the Pegu and Sittang canals and to levy of higher rates of toll, and that under Civil Works to the sale of the old Public Works Department Secretariat building to the Municipality.

Provincial Expenditure.

258. The Provincial expenditure fell short of that of the previous year by Rs. 15,468, which is the net result of a decrease of Rs. 4,473 under Stamps,

Rs. 1,907 under Post Office, Rs. 1,01,286 under Marine, Rs. 1,55,799 under State Railways, and Rs. 4,83,858 under Civil Works counterbalanced by an increase of Rs. 7,31,855 as per details given below :—

Increases.

	Rs.
Land revenue	1,63,360
Excise	4,981
Customs	26,028
Forest	20,537
General Administration...	72,599
Courts of Law	1,31,283
Jails	36,547
Police	1,49,126
Education	21,629
Medical	17,769
Superannuation allowances and pensions	14,644
Stationery and printing	21,040
State Railways' interest on debt	21,087
Minor works and navigation	17,633
Petty increases under other heads	13,592
Total ...	7,31,855

259. The variations under the heads Stamps, Excise, and Forests which are divided heads have been explained in the Imperial section. The decrease under Post Office is due to the stoppage of the subsidy payable for the Thatôn and Duyinzeik Railway, that under Marine to the transfer of certain launches to Local Bodies and to a decrease in the outlay on purchase of vessels and light-ships, that under State Railways to diminished expenditure on maintenance and way expenses, and that under Civil Works to the surrender of two lakhs of rupees, which was necessary to prevent the reduction of the Provincial balance below the prescribed minimum and to restriction of expenditure on the new public offices.

260. The payment of exchange compensation at a higher rate partly explains the increases under the various heads, but the following causes also contributed towards the result. The sanction of a larger establishment of surveyors for the village headmen who were entrusted with the collection of revenue and payment of arrear commission and a larger outlay on land records explain the increase under Land Revenue. The sanction of additional establishment on the imposition of the new customs duties accounts for the larger expenditure under Customs; that under General Administration is due to privilege leave arrangements, the return of the permanent Chief Commissioner from furlough, and the sanction of the Outside Audit Department of the Account office. The increase under Courts of Law is due to privilege leave arrangements and to larger outlay on diet and travelling expenses of witnesses, remuneration to copyists, and process-serving establishment; that under Jails to heavier expenditure on manufactures; that under Police to the re-organization of the civil police; that under Education to the transfer of the charges on account of pay of Deputy Inspectors of Schools to Provincial; that under Medical to changes of officers; that under Superannuation allowance and pensions to sanction of pensions in excess of lapses; and that under Stationery and Printing to heavier expenditure in the Government Press and to larger supplies of stationery from Central Stores. The increase in capital expenditure on Railways accounts for the larger expenditure on Interest on debt and the excess expenditure under Minor Works and Navigation is due to increased outlay on agricultural works.

Local Funds.

261. The transactions of the Incorporated Local Funds in Lower Burma show a net increase of Rs. 56,061 in receipts and of Rs. 1,16,118 in expenditure as compared with the accounts of the previous year. The gross improvement in receipts amounted to Rs. 69,181 and was contributed as follows :—

	Rs.
Land revenue	4,342
Provincial rates	62,391
Miscellaneous	2,448
Total ...	69,181

On the other hand there was a falling off of Rs. 13,120, of which Rs. 8,679 occurred under Education owing to the stoppage of the contributions paid by the Municipalities towards the pay of the Deputy Inspectors of Schools. The pay of these officers is now charged to Provincial Revenues. The decrease of Rs. 3,220 under Civil Works is due to a decline in the receipts from ferries. The balance represents petty decreases under Post Office, Police, Marine, and Medical.

262. The gross increase in expenditure is Rs. 1,41,310, of which Rs. 21,161 occurred under Provincial Rates, Rs. 7,937 under Marine, Rs. 6,901 under Veterinary Establishments, and Rs. 99,249 under Civil Works, and the balance Rs. 6,062 under other heads. On the other hand, there was a decrease of Rs. 25,192, of which Rs. 19,867 occurred under Education owing to the transfer of the expenditure on account of pay of the Deputy Inspectors of Schools to Provincial. The balance Rs. 5,325 is distributed as follows:—

	Rs.
Police	1,297
Medical	816
Superannuation allowance and pension	1,132
Minor Works and Navigation	2,080
Total ...	5,325

Upper Burma.

263. The receipts and expenditure of Upper Burma for the past two years, inclusive of the transaction of the Public Works and Railway Departments, are shown in the following statement:—

	1893-94.		1894-95.	
	Receipts.	Expenditure.	Receipts.	Expenditure.
	Rs.	Rs.	Rs.	Rs.
Imperial	1,16,64,925	1,78,72,061	1,24,57,459	1,61,67,914
Incorporated Local	3,04,548	3,43,893	3,63,365	3,49,803
Excluded Local	89,306	84,515	78,471	82,897
Municipalities	7,17,358	6,49,263	8,42,645	8,25,922
	1,27,76,137	1,89,49,732	1,37,41,940	1,74,26,536

Imperial Revenue.

264. The net result of a comparison of the receipts for the two years is an increase of Rs. 7,92,534 in 1894-95. The gross increase is Rs. 9,49,436, which is distributed as follows:—

	Rs.
Land revenue	7,53,731
Salt	5,436
Stamps	36,964
Excise	50,498
Assessed taxes	3,264
Interest	3,786
Police	18,723
Receipts in aid of superannuation	24,517
State Railways	42,148
Military Works.	6,646
Petty increases under other heads	3,723
Total ...	9,49,436

But these increases were partly counterbalanced by a falling off of Rs. 1,33,174 under Forest, Rs. 7,434 under Jails, Rs. 4,736 under Stationery and Printing, Rs. 10,322 under Miscellaneous, and Rs. 1,236 under other heads.

265. The improvement under Land Revenue was chiefly caused by an increase in the receipts from State Lands, due partly to surveys and partly to arrear collections, and also to thathameda and fines under Regulation XIV of 1887. The better result under Salt is due to an increase in local manufacture, that under Stamps to an increase in the number of civil suits and closer administration. The advance under Excise was the outcome of increased receipts from the sale of licenses for the vend of opium, that under Assessed taxes to changes among officers whose salaries are subject to taxation, that under Interest to an increase in the receipts from interest on advances to cultivators. The contribution paid by the Möngmit State towards the cost of the military police and better receipts from fines account for the increase under Police. The increase under Receipts in aid of Superannuation was caused by the realization of the pension contribution (for three years) of the officers lent to the Möngmit State, of the Adviser to the Hsipaw Sawbwa, and of an Assistant Engineer temporarily lent to the Mandalay Municipality; that under State Railways by an increase in the mileage open to traffic; and that under Military Works by an improvement in the receipts from rentable quarters.

266. The decrease under Forest is due to a falling off in the receipts on account of timber removed by consumers, that under Jails to a decline in the sale-proceeds of manufactures, that under Stationery and Printing to smaller supplies of stationery to State Railways from Central Stores, and that under Miscellaneous to diminished receipts from premia on bills owing to telegraphic money-orders having largely taken the place of the supply bills hitherto issued by Mandalay on Mogôk.

Imperial Expenditure.

267. On the expenditure side there is a net decrease of Rs. 17,04,147, which is made up as follows:—

		Rs.
Decreases.		
Refunds and drawbacks		17,156
General administration		14,936
Jails		20,248
Police		4,20,624
Marine		46,881
Medical		23,059
Political		26,189
State Railways		49,888
Miscellaneous Railway expenditure		1,39,910
Military Works		5,99,806
Civil Works		4,70,771
Petty decreases under other heads		7,821
	Total	18,37,289
Increases.		
Forest		23,078
Education		17,924
Ecclesiastical		7,607
Superannuation allowances and pensions		13,905
Minor Works and Navigation		52,727
Petty increases under other heads		17,901
	Total	1,33,142
	Net decrease	17,04,147

268. The refunds of land revenue have not been as high as in the previous year. Under General Administration there were two privilege leave arrangements in 1893-94, which caused an excess expenditure in that year. The closing of the Pyinmana Jail in February 1894 and less outlay on manufactures account for the decrease under Jails; that under Police is due to the transfer of eight companies of the military police to the Military Department in October 1893, and that under

Marine to less outlay on purchase of vessels. Under Political the expenditure on Frontier Commissions, durbar presents and entertainment of Envoys and Chiefs has not been as high as in the previous year. Under State Railways there was a decrease in the charges for maintenance of way and locomotive expenses. Under Miscellaneous railway expenditure the outlay on the Mogaung-Irrawaddy and Mandalay-Kunlôn surveys was less than that incurred in 1893-94. Owing to want of funds there was a decrease in the expenditure on Military and Civil Works as compared with the previous year.

269. Under Forest the increase has occurred under Timber removed by Government agency and under Establishments. The expansion of educational operations accounts for the larger expenditure under Education, that under Ecclesiastical is due to vacancies in the Ecclesiastical establishment in 1893-94, that under Superannuation allowances and pensions to sanction of new pensions in excess of lapses, and that under Minor Works and Navigation to larger funds having been allotted for the works.

Local Funds.

270. The receipts of the District Funds in Upper Burma show a net increase of Rs. 58,817 as compared with the previous year, which is made up of an improvement of Rs. 9,847 under Police and Rs. 2,627 under Miscellaneous and Rs. 50,194 under Minor Works and Navigation counterbalanced by a decrease of Rs. 3,851 under Civil Works.

271. The expenditure is also higher than that of 1893-94 by Rs. 5,910, which is the net outcome of an increase of Rs. 24,141 under Minor Works and Navigation and Rs. 3,034 under other heads and a decrease of Rs. 141 under Interest and Rs. 21,124 under Civil Works.

Lower Burma.

272. These comprise the following funds: Town, Port, Cantonment, Dispensary, Rangoon Port Trust, and Syndicate. The transactions of the Rangoon Port Trust do not appear on the Government books.

Excluded Local Funds.

273. The transactions of the above-mentioned funds during the year under report were as follows:—

Funds.	Opening balance.	Receipts.	Total.	Disbursements.	Closing balance.	
					As per Treasury.	As per Medical Officer's special cash-book.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Town	72,723	1,23,714	1,96,437	1,29,190	65,514	1,733
Port	1,91,511	2,35,797	4,27,308	2,36,722	1,90,586	...
Cantonment	16,646	69,448	86,094	71,029	15,065	...
Syndicate	42,648	1,66,306	2,08,954	1,83,608	25,346	...
Dispensary	1,317	13,567	14,884	12,904	1,855	125
Rangoon Port Trust	65,362	11,75,920	12,41,282	11,35,129	1,06,153	...
Total ...	3,90,207	17,84,752	21,74,959	17,68,582	4,04,519	1,858

274. The nature of these funds has been described at length in previous reports. The total outlay on public works during the year amounted to Rs. 4,68,678 as under:—

	Rs.
Town Funds	21,892
Port Funds	50,225
Cantonment Funds	17,147
Dispensary Funds	293
Rangoon Port Trust	3,71,751
Syndicate	7,370

275. The following shows the indebtedness of the several Funds at the close of the year on account of loans:—

To the Government.

	Rs.
Moulmein Port Fund	11,748

To the Public.

Rangoon Port Trust	6,44,041

Upper Burma.

Excluded Local Funds.

276. The Cantonment Fund is the only Excluded Local Fund in Upper Burma. The Funds are established at Mandalay, Myingyan, Maymyo, Meiktila, Bhamo, and Shwebo. The transactions for the year were as given below, with a Public Works expenditure of Rs. 6,385.

Opening balance.	Receipts.	Total.	Charges.	Balance.
Rs.	Rs.	Rs.	Rs.	Rs.
11,810	78,471	90,281	82,897	7,384

Upper and Lower Burma.

Municipalities.

277. Excluding the Rangoon Municipality, which does not bank with Government, there were 41 Municipalities in 1894-95 as against 39 in 1893-94. The increase was due to two Town funds having been raised to the status of Municipalities during the year under report.

278. The following statements show the transactions of each Municipality and its financial condition at the end of the year:—

Lower Burma, 1894-95.

Municipalities.	Opening balance.	Receipts.	Total.	Disbursements.	Closing balance.	
					As per Treasury.	As per Medical Officer's special cash-book.

279. The liabilities of the Municipalities as regards loans on the 31st March 1895 were as detailed below :—

Due to Government.

	Rs.
Rangoon (water-works)	64,856
* Akyab (scavenging scheme)	20,000
Prome (water-works)	73,062
Mergui (construction of a bazaar)	2,762
Ma-ubin (construction of a bazaar)	6,286
Paungdè (construction of a bazaar)	14,640
Yandoon (purchase of a bazaar)	71,541
*Shwegyin (re-shingling Municipal bazaar)	2,500
Pakôkku (construction of a bazaar)	8,711
Pyinmana (construction of bazaar)	16,344
Sagaing (construction of a bazaar)	4,798
Mônywa (construction of a bazaar)	8,331
Ye-u (construction of a bazaar)	3,264
Kyauksè (construction of a bazaar)	15,885
Taungdwingyi (construction of a bazaar)	7,499
Myingyan (purchase of a bazaar)	14,475
Yamèthin (construction of a bazaar)	7,255

Due to the Public.

Rangoon (water-works)	3,50,000
Rangoon (drainage scheme)	20,70,000
Rangoon (drainage and high-pressure water-supply) ...	7,00,000
Rangoon (drainage, &c., of Block J)	2,50,000
Rangoon (high-level water-supply)	7,10,000

The Municipalities marked with an asterisk took up loans during the year.

280. The new system of audit in the local offices of the accounts of the Excluded Local Funds in Burma not managed by Government was introduced for the first time during the year under the authority of the Chief Commissioner's Circular No. 30, dated the 28th April 1894.

Paper Currency.

281. The net circulation of notes on the 31st March of each year since the office was first opened in August 1883 has been as follows :—

	Rs.
31st March 1884	20,90,495
31st March 1885	13,36,705
31st March 1886	15,86,780
31st March 1887	32,01,200
31st March 1888	37,42,850
31st March 1889	28,44,310
31st March 1890	28,90,800
31st March 1891	53,11,715
31st March 1892	39,46,175
31st March 1893	66,77,090
31st March 1894	39,75,125
31st March 1895	56,50,720

282. The net issues and receipts of notes during the years 1893-94 and 1894-95 has been as follows:—

Year.	Issues.	Receipts.
	Rs.	Rs.
1893-94	5,12,01,310	5,39,03,275
1894-95	6,41,15,270	6,24,39,675

283. The details by denomination being—

Rupees	Issues.		Receipts.	
	1893-94.	1894-95.	1893-94.	1894-95.
	No.	No.	No.	No.
5	32,420	29,450	33,167	30,113
10	137,358	169,861	133,942	159,571
20	38,089	42,938	37,251	41,130
50	20,995	24,737	21,290	22,548
100	42,001	64,723	45,840	56,909
500	4,306	5,749	4,477	5,731
1,000	8,361	10,427	8,976	10,237
10,000	3,314	4,040	3,479	3,995
Total ...	286,844	351,925	288,422	330,234

284. The circulation of notes of denominations from Rs. 10 to Rs. 100 shows a considerable increase over that of previous years. Those of Rs. 500, 1,000 and 10,000 also show an increase over the circulation of the previous year. That of the five rupees notes which fell off in 1892, owing to the forgery of these notes discovered in April 1891, has steadily declined year by year since.

VI.—VITAL STATISTICS AND MEDICAL SERVICES.

Vital Statistics of the General Population.

Vital statistics.

285. The number of births registered in Lower Burma was 124,753, or 7,291 more than in 1893. The ratio per mille was 27·62. This is the highest that has been yet recorded, but as it has been calculated on the census population of 1891 it is probable that the increase on the ratio for 1893 (26·03), like that of the two previous years, is more apparent than real. The deaths recorded reached an aggregate of 106,407 as compared with 98,147 in the preceding year, the ratio per mille being 23·56. Of the births registered 64,364 were those of males and 60,389 those of females, that is to say, the proportion of males born to females was 100 to 107. This is practically the same as in 1893, when the corresponding ratio was 100 to 108. The percentage of births was highest in the Pyindayè circle and lowest in Kyaukpyu town, where it was ·8 only. The deaths of 58,537 males and of 47,870 females were recorded during the year. In 1893 the deaths of 123 females were registered to every 100 deaths of males; for the year of report the ratio was 122 to 100. In Rangoon, Mergui, and Shwegyin useful work seems to have been done by vaccinators in the matter of detecting non-registration of births, but elsewhere the assistance rendered by the vaccination staff in this regard appears to have been insignificant. The mortality in the month of July was heavier than that of any other month in the year, but it was only slightly in excess of that recorded in August. Reckoned according to death statistics, April was the healthiest month, and after April, March, and February. As is usually the case, the connection between heavy rainfall and severe mortality is very noticeable. The largest number of deaths took place among infants and the smallest among persons between 10 and 20 years of age. The ratios of deaths ranged from 17 and 18 in the Shwegyin and Toungoo districts to 35 and 37 in Thayetmyo and Kyaukpyu.

Chief diseases.

286. Cholera caused the death of no less than 7,428 persons, or over 5,000 more than in the previous year. Of the total of deaths from this disease 4,079, or more than half, occurred in the Arakan division. In the Kyaukpyu district alone there were 2,072 deaths, a total which is only 321 less than that for the whole province during 1893. The districts which suffered least from this form of sickness were those of Hanthawaddy, Pegu, Prome, Toungoo, and Tavoy. The total of deaths in the last district was six only, though in the adjoining district of Mergui 423 males and 339 females succumbed to the disease. There were no deaths at all from cholera in Toungoo. Taking the returns for the province as a whole, the disease raged with the greatest severity in July and August. Small-pox accounted for 1,737 deaths as compared with 3,081 in 1893. The districts of Kyaukpyu, Prome, Tavoy, Mergui, and Toungoo enjoyed complete immunity from this disease, and it was only in the Irrawaddy division and in the Hanthawaddy, Pegu, and Tharrawaddy districts of the Pegu division that the number of deaths was heavy. The mortality from fevers was only slightly lower, comparatively speaking, than in 1893, which was in this respect by far the most unhealthy year hitherto recorded. The number of deaths due to fevers was 48,104 in all. The Akyab and Prome districts were those in which most deaths occurred. The scheme for the sale of quinine in small quantities at post offices and through the medium of local vendors was introduced shortly before the close of the year. It is hoped that in a very short time the drug will have been placed within the reach of the residents of the remotest parts of the province. Dysentery and diarrhœa, which caused 8,653 deaths, or 1,774 more than the highest number recorded during any of the past 20 years, were most prevalent in the Akyab and Hanthawaddy districts. Dysentery, diarrhœa, and cholera were more prevalent in the towns than in the

rural tracts, but small-pox was commoner in rural than in urban areas, where for the most part the provisions of the Vaccination Act are in force.

Immigration and Emigration.

287. The following table shows the number of immigrants and emigrants who passed through the principal ports of the province during the year :—

	Emigrants.	Immigrants.
Akyab	18,600	16,244
Rangoon	74,718	85,008
Moulmein	25,875	28,399
Mergui	321	297

The capitation-tax and thathameda returns show that a considerable number of Upper Burmans returned from Lower Burma to their homes during the year of report, being attracted back by the good seasons in Upper Burma. The number of Bihari families settled on Mr. Mylne's grant at Kyauktaga in the Shwegyin district is 163, including 654 persons. Besides the usual paddy crop, these settlers grow oil-seed and sugarcane. The outlying regions of Upper Burma have attracted some immigrants from beyond the frontiers. Shan-Chinese are colonizing the Sinkan valley, Bhamo district, and the number of Panthays residing permanently in the Ruby Mines district has increased. In the Sagaing district natives of India are reported to be coming in freely and settling down.

Medical Relief (Lower Burma).

288. Forty-one dispensaries were open in Lower Burma at the end of the year as compared with 39 at its commencement. Three new dispensaries were opened, one at Kyaiklat, one at Myaungmya, and one (a branch dispensary) at Akyab, and the Wakèma dispensary was closed. In all 18,812 indoor patients were treated in the dispensaries of Lower Burma during the year. This number was 411 higher than in the previous year, but was rather below the total for 1892. The only dispensaries at which there were substantial decreases were those at Thayetmyo, Henzada, Prome and Shwedaung. The number of outdoor patients treated rose from 300,281 to 337,085; for this increase all the dispensaries of Lower Burma were responsible except those at Akyab, Mergui, Henzada, Amherst, Ye, Mingyi, Thônzè, and Gyobingauk. The proportion of deaths to admissions in the case of in-patients ranged from 15 per cent. at Akyab to 1 per cent. at Paungdè, Ngathainggyaung and Myanaung, the average for the whole of Lower Burma being 9 per cent. Accommodation for in-patients was increased during the year to the extent of 157 beds. The statement giving details of the different diseases for which treatment was sought shows that, as compared with 1893, the year under review was fairly free from smallpox, but that cholera was more prevalent than during the preceding twelvemonth. Dysentery cases rose from 7,187 to 9,361, and cases of malarial fever from 58,529 to 58,633. There was a large diminution in the number of cases of eye-disease, the causes of which are apparently obscure. Six hundred and ninety-nine major operations were performed as compared with 477 in the previous year. The increase in the number of major operations in the Rangoon General Hospital from 253 to 451 was the main factor in this general increase. Minor operations rose from 8,587 to 9,513. A sum of Rs. 16,866 was realized from subscriptions during the year as compared with Rs. 17,450 in 1893. Of this sum Rs. 10,577 were subscribed by Europeans and Rs. 6,012 by Natives. Fees from paying patients fell from Rs. 9,406 to Rs. 8,304 and receipts from the sale of medicines from Rs. 1,550 to Rs. 1,155. There was a large increase in the expenditure on establishment, which was due mainly to the opening of new dispensaries and to the grant of approved service allowances to Hospital Assistants. The outlay on medicines and on diet was higher than in 1893, but there was a marked decrease in the expenditure on buildings. The total increase in expenditure over the figures of the previous year for the whole of Lower Burma amounted to Rs. 16,212. The Rangoon General Hospital was managed with due regard to economy throughout the year. The idea of erecting an annex to the hospital in the Horticultural Gardens immediately opposite the existing buildings

Dispensaries.

has, for the present, been abandoned, as it would cost a larger sum than the Municipal Committee can provide.

Rangoon Lunatic Asylum.

289. In order to secure greater efficiency in the working of the Rangoon Lunatic Asylum, which had been extended to meet the requirements of the whole province, the post of Deputy Superintendent was resuscitated and that of Local Assistant Surgeon was abolished. By the end of the year the 62 criminal lunatics who had before, for want of accommodation, been confined in the Rangoon Jail were housed in the asylum. The transfer from the jail to the asylum was rendered possible by the completion of the greater portion of the new buildings on the asylum premises. There was at the commencement of 1895 accommodation in the institution for 350 lunatics. On the 31st December 1893 the accommodation was for 266 only.

During the year there were 331 lunatics in the asylum, of whom 146 were criminal males, 155 civil males, and 30 females of both classes; 152 were admitted or re-admitted, 48 were discharged, cured or otherwise, or made over to their friends, and 26 died. The percentage of deaths to the daily average strength (9·96) was lower than in 1893 and compares on the whole favourably with the figures of previous years. The death-rate was swelled by an epidemic of *beriberi* which attacked the asylum in October and carried off seven victims. The origin of the outbreak is doubtful and the reason of its severity obscure, but it seems clear that it cannot be attributed to any special sanitary defect in the asylum.

The total expenditure of the year amounted to Rs. 35,568 as compared with Rs. 31,408, the corresponding figure for 1893. This is exclusive of a sum of Rs. 88,682 charged on account of work performed by the Public Works Department for the asylum. The cost of bazaar medicines rose from Rs. 76 to Rs. 240, and the expenditure on account of contingencies from Rs. 1,797 to Rs. 2,815. The total cost of the establishment proper was Rs. 8,457 as compared with Rs. 8,494 in 1893. The result of the dairy transactions of the year shows a net profit of Rs. 1,059 under this head. The statement of receipts and expenditure on account of manufactures in the asylum shows a net profit of Rs. 3,600 as against Rs. 3,283 in 1893.

Medical Relief (Upper Burma).

Dispensaries.

290. At the close of the year 47 dispensaries were open in Upper Burma. This is one less than the number open at the end of the preceding year. New dispensaries were opened at Mahlaing and Taunggyi, and the dispensaries at Pwinbyu, Natmauk, and Fort Stedman were closed. There was a decrease of 665 in the number of indoor cases treated. The outdoor attendance improved during the year, the number of out-patients treated being 204,976 as compared with 173,603 in 1893. The increase was shared by all but 12 of the dispensaries. Forty-three additional beds were provided for the male inmates of the Upper Burma dispensaries during the year. The ratio of mortality to admissions among the indoor patients was 6 per cent., or 3 per cent. lower than in Lower Burma. The highest ratio of deaths was at Myitkyina (16 per cent.) and the lowest at Wundwin, Pakôkku, and Yenangyaung (1 per cent.). As in Lower Burma, there was a decrease in the number of small-pox cases treated, 9 of the total of 14 shown in the returns having been admissions into the dispensary at Chaungu, and cholera cases aggregated 254 as against 114 in 1893. Malarial fevers were responsible for 49,675 cases and dysentery for 4,688; eye-diseases were nearly 2,000 more in number than in the previous year. The increase under this latter head in Upper Burma is somewhat remarkable, as in Lower Burma the number of eye cases treated was much smaller than the total for 1893. The number of major operations performed was 139 as compared with 123 in 1893, and the number of minor operations 2,460. The aggregate number of Burmans treated during the year was 135,703, or 63 per cent. of the total of patients treated. This is slightly in excess of the Lower Burma percentage. It is noteworthy that females resort to dispensaries somewhat more freely in Upper than in Lower Burma. The income of the Upper Burma dispensaries amounted to Rs. 11,146 as compared with Rs. 10,480 in

1893, and the expenditure incurred in their upkeep Rs. 99,329, or Rs. 1,323 less than in that year. There was a satisfactory increase under the head of subscriptions. Of the sum of Rs. 8,560 subscribed, Rs. 5,898 were received from European and Rs. 2,662 from Native donors.

Military Police hospitals.

291. The number of police hospitals remained the same as in the previous year. The total number of admissions was 19,183 or 1,322 less than in the previous year, but the daily average sick per mille of strength was 3 per cent. higher. Deaths were fewer by ten than during the preceding year.

Sanitation.

Sanitary rules.

292. The work done during the year by the Sanitary Board was unimportant, and till the appointment of a Sanitary Engineer for Municipalities has been created its sphere of action must of necessity continue to be limited. A set of simple rules inculcating the first principles of rural sanitation was sanctioned by the Chief Commissioner towards the close of the year and the rules have since been prescribed in all the divisions of the province.

Sanitary works.

293. No sanitary works of special importance were undertaken outside Rangoon during the year. At Rangoon the high level reservoir below the Shwe Dagôn pagoda was completed and the town is now being supplied with water from it. Schemes for still further supplementing the existing water-supply system of Rangoon are now under consideration. The Shone sewage system was steadily extended in the town during the year. In Moulmein the area of conservancy operations was extended and the initial steps were taken towards introducing a scheme for improving the water-supply. A sanitary survey of the town is in contemplation. In Akyab and Bassein the importance of bettering the sanitary condition of the town and of securing a really pure water-supply has been occupying the attention of the authorities. Substantial expenditure was incurred in Upper Burma on sanitary works of different kinds. The Municipal Committee of Mandalay has under consideration a scheme for conservancy and another for improving the water-supply.

Vaccination.

Lower Burma.

294. The number of vaccinations in Lower Burma during the year was 206,092 as compared with 175,808 in 1893-94. In the Arakan, Pegu, and Tenasserim divisions the number of persons vaccinated was higher than in the previous year, but in the Irrawaddy division the aggregate of vaccinations was 36,020 against 41,857 in 1893-94. Including the Thayetmyo figures, however, which in the previous year formed part of the Irrawaddy division, the total was higher, so that the aggregate rise in vaccinations may be said to have been in point of fact common to all the divisions of Lower Burma. It was in the Arakan division that the increase was least marked. In the Kyaukpyu district there was a heavy diminution, which is attributed by the Superintendent of Vaccination to deficient supervision and to the failure to fill a vacancy which occurred in the vaccination staff. In Henzada also the figures fell by 1,632, but elsewhere decreases were unimportant. On the other hand there was a large and satisfactory increase in the number of people vaccinated in the districts of Hanthawaddy, Akyab, Myaungmya, and Prome. The totals also for Tavoy, Tharrawaddy, and Pegu were appreciably higher than in 1893-94. Vaccinations at Akyab numbered 2,962 more than in the previous year, but although the number performed in 1893-94 was exceptionally low, the number of successful operations for the year of report was in this district below the mean of the previous five years. In all the other districts of Lower Burma except Kyaukpyu and Toungoo the total was above the quinquennial average. In Akyab and in the districts of Myaungmya, Pegu, Kyaukpyu, Bassein, and Toungoo there is, according to the Superintendent, much still to be done to place the work of the vaccinators on a sound and satisfactory basis. The percentage of success in primary and secondary operations was very slightly

higher than in 1893-94. The provincial average of operations performed by each vaccinator was 2,677 as compared with 2,254 in 1893-94. The cost of the Vaccination Department was Rs. 36,841 or Rs. 3,451 more than in 1893-94, and the average cost of each successful case was 3 annas 7 pies as compared with 3 annas 9 pies in the previous year. The average cost was lowest in the Sandoway and Henzada districts, where it did not exceed 1½ annas, and highest in the Akyab district, where it was over 7 annas. The work of verification was, on the whole, performed satisfactorily. Outside Rangoon 31,760 cases were inspected by Civil Surgeons and 30,704 by other inspecting officers. The Municipalities of Kyaukpyu, Myaungmya, Ramree, Zalun, and Kyangin were brought under the operation of the Vaccination Act during the year.

Upper Burma.

295. The total number of persons vaccinated in Upper Burma was 114,863 as compared with 98,726 in 1893-94. This increase was shared by all the districts of Upper Burma save those of Mandalay, the Upper Chindwin, Pakôkku, Yamèthin, and Myingyan, and in none of these districts except Yamèthin was the decrease on the figures of the previous year very marked. The diminution at Yamèthin and Myingyan had the result of reducing the total number of vaccinations in the Eastern division from 23,036 to 21,420. In the other three divisions the total number of vaccinations was higher than in the previous year. The largest increase on the figures for 1893-94 were apparent in the districts of Shwebo, Sagaing, and the Lower Chindwin. The percentages of success in the case of primary vaccinations rose during the year from 86·35 to 88·91 and in the case of secondary vaccinations from 44·73 to 45·59. Success was on the whole least marked in the more remote and inaccessible portions of the upper province, where for the most part communication is far from easy and difficulty is experienced in maintaining a constant supply of good lymph. A notable exception to this rule was, however, furnished by the Upper Chindwin district, which labours under considerable disabilities in the above respect, and in which the percentage of success in primary vaccinations (93·82) was well above the provincial mean. It was in the Upper Chindwin district that the average number of persons vaccinated by each vaccinator was highest. The average for the whole province was 2,393. The two vaccinators employed during the year in the Upper Chindwin performed 3,837 vaccinations each. In the Myitkyina district the average was 425 only and in Mogaung 326. The same causes that brought about the low percentage of success at Myitkyina and Mogaung appear to have militated against a large outturn of work on the part of the vaccination staff in these two districts. The total expenditure on account of the Vaccination Department in Upper Burma was Rs. 16,781 as compared with Rs. 15,212 in 1893-94. Of this total Rs. 6,864 was paid from Municipal funds. The cost of the vaccination establishment rose from Rs. 11,792 to Rs. 13,046, but in other respects the expenditure of the year was practically the same as that of the previous year. The average cost of each successful case was 2 annas 8 pies, or 3 pies less than in 1893-94 and 11 pies less than the average cost during the year in Lower Burma. The return showing particulars of verification performed by inspecting officers in Upper Burma compares favourably with that giving details of the work of verification in Lower Burma. At Shwebo, Ye-u, Sagaing, and Mônywa the Civil Surgeons did specially useful work in the matter of verifying vaccinations. The Vaccination Act was extended during the year to the Municipalities of Bhamo, Shwebo, Kyauksè, and Sagaing, and to the Cantonments of Bhamo, Myingyan, Shwebo, and Meiktila.

VII.—INSTRUCTION.

Education.

General results.

296. The total number of educational institutions in the province rose during the year from 14,823 to 15,084 and the number of pupils from 237,550 to 244,734. This advance occurred under the head of private institutions. Higher education, as judged of by the number of public institutions and the attendance at them, showed a considerable falling off, the total of schools having decreased from 4,830 to 4,533 and that of scholars from 138,934 to 132,723. This apparent retrogression is explained partly by the fact that greater strictness has been used in the classification of schools and partly by the depressed condition of Lower Burma during the year. Notwithstanding the addition of the Baptist College, Rangoon, to the list of collegiate institutions, the number of students undergoing University education has fallen from 76 to 71. High schools have increased by two, and the attendance of scholars at institutions of this class has risen from 4,043 to 4,413. An advance of 25 (140 to 165) in the number of female public institutions and of over 1,000 in the number of pupils is a satisfactory feature of the report. Middle English schools were less in number by one than in 1893-94, and, though the total of middle Vernacular schools rose from 103 to 107, the attendance fell by 31. The largest decrease occurred, however, under the head of primary schools. These fell from 4,493 in 1893-94 to 4,162, and the diminution in attendance was proportionate.

Financial.

297. The net cost to Government of education in the province increased roughly by Rs. 30,000. The expenditure from Provincial revenues rose by Rs. 57,136, while that from Municipal and Local Funds showed a fall of Rs. 25,501. The enhanced expenditure is largely due to increased grants for primary and secondary education and for female schools. The receipts from fees in schools of all classes increased by Rs. 942. Building grants made by Government aggregated Rs. 27,456, and on the whole the expenditure on account of buildings fell by Rs. 11,231. The large increase of Rs. 5,361 apparent under the head "Miscellaneous" is attributed by the Director to the fact that in the accounts submitted by Presidents of Municipalities and Town Committees under the local audit system many items have been lumped together under the head of "Miscellaneous," which should have been shown under other and separate heads.

University education.

298. The number of colleges has been raised to two by the creation of the Baptist College. This college has as yet only three students on its rolls. The year shows a marked improvement in results as well as in the number of candidates offering themselves for examination. Twenty-five F. A. and six B. A. passes is a creditable total compared with the figures of 1893-94, which showed nine of the former and none of the latter. The attention of the Educational Syndicate was devoted during the year to the amendment of the College curriculum, and proposals which provide for the teaching of the A. course to the B. A. students of the College and for separating the College and High departments from the Middle and Primary departments have been sanctioned since the close of 1894-95. The Law class showed an average attendance of 22 against 13 in 1893-94.

Educational Syndicate.

299. The Educational Syndicate met, as a whole, once during the year only. The meetings held by the Executive Committee were 13 in number, 11 of them being ordinary meetings and two special. Among other matters discussed by the Executive Committee were the revision of the Grant-in-Aid Rules, the rules relating to the examinations for teachers' certificates and the standards of examination prescribed in the Burma Education Code, the reduction of examination centres and

a number of questions connected with the Advocates' examinations. The Bernard Free Library was freely patronized during the year, and the number of both members and visitors has increased. Good progress was made by the Library authorities in the work of copying Pali manuscripts for the Royal Library at Bangkok. The year opened with a balance of Rs. 42,648 to the credit of the Syndicate fund. The receipts of the fund aggregated Rs. 1,66,306, its expenditure amounted in all to Rs. 1,83,607, and the year closed with a total credit balance of Rs. 25,346. The fund has now a sum of Rs. 81,800 invested in Government securities, from which it derives an annual income of Rs. 2,863.

Secondary education.

300. Two new high English schools, St. Luke's S. P. G. School, Toungoo, and St. Gabriel's Tamil School, Rangoon, were started during the year and the total number of pupils studying at schools of this class rose from 4,043 to 4,413. Middle English schools fell from 50 to 49, and the number of pupils from 4,751 to 4,375, and middle Vernacular schools, while they increased by four in number, had 31 scholars less than in 1893-94. The total number of pupils undergoing secondary education in the province fell during the year from 15,599 to 15,562. A considerable improvement is noticeable in the results of the Eighth standard and Entrance examinations. The total of candidates for the former examination was 206 and for the latter 162, and the number of passes was 184 and 65 respectively, as compared with 133 and 43 in the previous year. The results of the provincial Seventh standard examination were also on the whole satisfactory. On the other hand, there was a falling off in the figures for Standards V and VI.

Primary education.

301. The total number of primary schools under inspection was 4,500, as compared with 4,800 in 1893-94. Public schools under public and private management rose from 99 to 104. In Lower Burma seven new primary schools were opened, three were closed, and two (in the Thayetmyo district) transferred to the Upper Burma list. In Upper Burma three new primary schools were opened and one was closed for want of due support. The attendance at "public" primary schools is shown as having risen during the year from 8,173 in 1893-94 to 8,243. The total of passes in all four primary standards was 4,053, as compared with 4,916 in 1893-94. The decrease is said to have been due to a large extent to the substitution of the Education Department for the teaching and superintending staff as the examining agency. Notwithstanding the addition of 47 Tamil schools to the list, the number of indigenous schools under inspection decreased by 305, and the number of pupils under instruction by 6,261. In Lower Burma 577 monastic schools were withdrawn from inspection, while only 215 were added to the list. In Upper Burma, on the other hand, there was a net increase of 51 schools. Upper primary full passes in Karen schools fell from 925 to 878 and lower primary full passes from 3,608 to 2,921. No sufficient explanation of this marked falling off in the results obtained by Karen schools is forthcoming. Good work continues to be done by the Muhammadan and Tamil schools in the province. The progress made by the Tamil schools during the year is specially noticeable.

Education in special subjects.

302. As in the previous year, there were five Normal schools for teachers and 188 pupils attended, as compared with 190 in 1893-94. The results of the annual examination of the first and second year classes and of pupil teachers showed a substantial advance in all respects except in the number of passes obtained by pupils of the second year of the vernacular course, which fell from 20 to 14. The percentage of passes to pupils presented for the final theoretical tests in the examinations for teachers' certificates was more than twice as high as in 1893-94 (46·3 against 22·4). The rules laying down the course of study in Normal schools have been under revision during the year, but the new rules as finally approved were not issued till shortly after its close.

Technical education.

303. The necessary preliminaries to the starting of the Government Engineering School were completed during the year and the school was opened shortly after its close. A Technical class connected with the Railway Workshops at Insein was opened on the 1st April 1894.

Education of girls.

304. There was a falling off of 172 (501 against 673) in the number of private girls' schools. The number of pupils was 26,911, as compared with 25,352 in 1893-94, and 22 passes were obtained in Standards VIII and IX against four in the previous year. There was also an increase in the number of passes in the lower primary stage, but a slight diminution in passes took place in the middle standards. As in the previous year, one girl passed the F. A. examination.

Education of special classes.

305. The number of boys and girls attending schools confined to Europeans was 1,563, as compared with 1,364 in 1893-94. The increase was common to both sexes. On the other hand, only 776 European pupils attended schools open to all races, instead of 805 in the previous year. The net cost of European education to Government during the year was Rs. 37,882, or Rs. 5,341 more than in 1893-94. In all 816 European pupils secured passes, as compared with 1,223 in the previous year. The Director ascribes the decrease mainly to the results of the examination of the Diocesan Boys' School, Rangoon. One B. A. pass was gained, as against none in the previous year, and the number of F. A. passes rose from six to eight. The question of the grant of special assistance to the Talaings was taken in hand during the year, and since its close a special Talaing Sub-Inspector has been appointed. Forty-seven Tamil schools have been brought on the register, and steady progress may now be anticipated in the education of the Tamil-speaking residents of Burma. The question of establishing a school at Taunggyi for the education of the sons of Shan Chiefs is still under consideration.

General remarks.

306. Examinations in all standards up to the seventh were conducted in the vernacular of the student. The change was introduced without any such difficulties arising as were anticipated in some quarters. The quinquennial revision of the Grant-in-Aid Rules was carried out after careful consideration and with the advice of conferences of school managers. The scheme for reviving the Patamabyan examination in Pali, which was abandoned in 1893 for the time being owing to want of support on the part of the ecclesiastical heads of the Buddhist church, was resuscitated during the year and progress has been made in completing the necessary arrangements and in providing suitable text-books. The examination is to be conducted by the Education Department.

Literature and the Press.

307. Judged by the marked decrease in the number of publications, literary activity declined during the year under report. This is probably due to the commercial depression, which, there is reason to believe, has affected the book trade. There were 35 publications, of which 8 were printed at Mandalay against 52 in 1893, 66 in 1892, and 176 in 1891. Of the 35 publications one was in Sgau-Karen and the rest were in English, Burmese, and Burmese and English or Pāli. Sixteen of them were designed for educational purposes, and 11 were classified under the head "Religion."

The only works deserving of notice are the new edition of Judson's Dictionary and the "Celestial Mirror," by J. A. Maung Gyi and Cheah Toon Hoon. The new edition of Judson's Dictionary was prepared by Mr. R. C. Stevenson, of the Burma Commission, and is the result of many years' labours. Dr. Judson's work has been enlarged by many new words, examples, and phrases, and the dictionary in its present shape has been pronounced by competent judges to be a most valuable addition to Anglo-Burmese literature. The "Celestial Mirror" is a collection of Chinese tales translated into English. Although the language of the translation is fair, the moral tone of the stories selected is not of a high order.

Arts and Sciences.

308. A monograph on pottery and glassware was written by Mr. Taw Sein Ko, Government Translator and Honorary Archæological Officer, during the year of report. The project for converting the Phayre Museum into a Provincial Museum is still under consideration.

VIII.—ARCHÆOLOGY.

309. Dr. Führer, Archæological Surveyor, North-Western Provinces, who visited the province last year, has only completed a portion of his report, namely, a *résumé* of his researches in Burmese archæology which was embodied in the annual progress report of the Archæological Survey circle, North-Western Provinces and Oudh, for the year ending the 30th June 1894. He is still engaged on the preparation of a revised list of archæological and architectural remains of the province, and on a larger work to be called the "Monumental Antiquities and Inscriptions in Burma." The question of appointing an Archæological Officer for Burma was again under consideration during the year, but no definite proposals could be made until the complete reports of Dr. Führer and Mr. Oërtel had been received and considered in consultation with Dr. Hultzsch, the Government Epigraphist.

The appointment of Honorary Archæological Officer was held throughout the year by Mr. Taw Sein Ko, Government Translator. The archæological work done during the year mainly consisted in the printing of the collection of inscriptions of the Arakan Pagoda, Mandalay, made by Major Temple, and in the collection by Mr. Taw Sein Ko at Mônywa of more inscriptions, the supply of which appears, at present, to be inexhaustible. The preparation of the Index of Burmese inscriptions was continued.

IX.—MISCELLANEOUS.

Ecclesiastical.

310. The construction of the new Cathedral in Rangoon was completed during the year and the building is now in use. The old Town Church was dismantled and its site was sold in January 1895 by public auction and realized the sum of Rs. 1,77,800, the greater part of which went to repay the loan of Rs. 1,40,000 made by Government in connection with the construction of the new Cathedral. The expenditure incurred during 1894-95 on the Cathedral aggregated Rs. 46,277. A small Protestant church was built at Yamèthin at a cost of Rs. 3,995. But beyond this and the erection of an enclosure wall round the cemetery at Mandalay, no ecclesiastical works of importance were undertaken in Upper Burma during the year.

Stationery.

311. As in former years, the stationery required in the province was supplied by the Stationery Department, Calcutta. The advantages of the guard-books of forms referred to in last year's report were felt during the year by both indenting officers and the Government Printing Department, and their introduction has effected a saving in stationery and printing. Further improvement was shown in the general quality, evenness, and finish of Indian-made papers, which are now used almost exclusively in Government offices in Burma.

PART III.

BURMA STATISTICAL RETURNS.

II.—STATISTICS OF PROTECTION.

A.—LEGISLATIVE.

[No. 13.] *1.—Statement of Acts passed by the Legislature of Burma in the year 1894 and sanctioned as required by law.*—Blank.

[No. 14.] *2.—Statement of Bills proposed or pending in the Legislature of Burma in the year 1894.*—Blank.

[No. 15.] *3.—Statement of Draft Bills and Regulations submitted by the Chief Administrative Authority of Burma for the consideration of the Legislature of India during the year 1894.*

Title of Bill.	By whom proposed.	Object and character of Act.	Fate, result, or present position of the proposed Bill.
To amend the Lower Burma Village Act.	Chief Commissioner ...	(i) To take power to confer on headmen the powers and privileges of police officers. (ii) To determine the liability of village headmen to supply food and carriage to Government officers and others.	Under consideration at close of year. Since enacted as Act XVIII of 1895.
Regulation to amend the Upper Burma Village Regulation.	Chief Commissioner ...	(i) To take power to confer on headmen the powers and privileges of police officers. (ii) To determine the liability of village headmen to supply food and carriage to Government officers and others.	Under consideration of the Government of India.
The Kachin Hill-Tribes Regulation.	Chief Commissioner ...	To declare the law applicable to the Hill tribes in the Kachins Hill tracts of Upper Burma.	Passed into law as Regulation No. I of 1895.
Regulation to amend the Upper Burma Land and Revenue Regulation.	Chief Commissioner ...	To give Revenue Officers legal authority to cut crops on non-State lands.	Passed into law as Regulation III of 1894.
Cattle-Disease Bill ...	Chief Commissioner ...	To provide for the prevention of contagion amongst cattle in Burma.	Not accepted by the Government of India, but amendments to the Village Act and Regulation were sanctioned.
Pegu and Tenasserim Proceedings Validation Bill.	Chief Commissioner ...	To remove certain doubts as to the validity of certain proceedings and acts of certain officers of the Pegu and Tenasserim divisions in Lower Burma and to prevent their being raised in the future.	Passed into law as Act XI of 1895.
A Bill to amend the law relating to municipal taxation in the Municipality of Rangoon.	Chief Commissioner ...	To enable the Municipal Committee to raise taxes sufficient to cover the growing needs of the town.	Not accepted.
A Bill to amend the Lower Burma Municipal Act, 1884.	Chief Commissioner ...	To provide for the raising of additional taxation by the Rangoon Municipal Committee.	Passed into law as Act XIV of 1894.

[No. 52.] *3.—Statement showing Religion and Caste of Native Officers and Men of the Army in the Rangoon District on the last day of the year 1894-95.*

Classified according to religion, race, &c.		Average age.		Average height.		Average weight.	General physiognomy and characteristics of each race and caste.
		Yrs.	M.	Feet	In.	lbs.	
ACCORDING TO RELIGION	Christians	26	6	5	5½	123½	Dark, no peculiarity in physiognomy.
	Mahomedans	26	8	5	7	137¼	Light coloured, as a rule of average height, with regular features, quick tempered and easily excited. This class in Burma Battalions consists of Punjabis varying with their districts from the sturdy Jat to the more wiry man from the Pathan border districts.
	Hindus	27	6	5	7	135	Small faced, with sharp cut features, thin lips, intelligent when young, but get old prematurely. This class in Burma Battalion is composed of Sikhs and Brahmins also a few Rajputs.
ACCORDING TO COUNTRIES AND RACES	Punjabis	26	2	5	8¾	147¼	Caucasian type, tall, fine looking men, good soldiers, fond of recreation.
	Hindustanis	27	5	5	7½	130¾	Dark, above average height, of good physique, regular features.
	From Mahratta country	26	10	5	5¾	121	Slight, wiry, brave-looking men, reliable and courageous, fairly intelligent, capable of enduring hardship.
	Telingas	29	5	5	6¾	130¾	Dark brown, average height.
	Tamils	26	0	5	6¼	131¾	Dark, small set men, fairly regular features, capable of cheerfully undergoing fatigue and hard work, intelligent, and wear well in old age.
	Others	26	11	5	6½	128¼	Physique generally good, mostly low caste men, generally reliable.
